exception to using bread and wine however was a bread and water Christian meal an ancient ascetic form of the Eucharist This tradition also involved rejection of meat from general diet and reflected the concern of dissident communities to avoid the cuisine meat and wine characteristic of pagan sacrifice This study describes and discusses these practices fully for the first time and provides important new insights into the liturgical and social history of early Christianity [The End of Roman Britain](#) Michael E. Jones,1998 Jones offers a lucid and thorough analysis of the economic social military and environmental problems that contributed to the failure of the Romans drawing on literary sources and on recent archaeological evidence **The Diet of John the Baptist** James A. Kelhoffer,2005 James A Kelhoffer offers a comprehensive analysis of Mark 1 6c par Matt 3 4c in its socio historical context the Synoptic gospels and subsequent Christian interpretation The first chapter surveys various anecdotes about John s food in the Synoptic gospels and notes that there has never been a consensus in scholarship concerning John s locusts and wild honey Chapters 2 and 3 address locusts as human food and assorted kinds of wild honey in antiquity Chapter 4 considers the different meanings of this diet for the historical Baptist Mark and Matthew Contemporary anthropological and nutritional data shed new light on John s experience as a locust gatherer and assess whether these foods could have actually sustained him in the wilderness The last chapter demonstrates that the most prevalent interpretation of the Baptist s diet from the third through the sixteenth centuries hails John s simple wilderness provisions as a model for believers to emulate **A Handbook of Food Processing in Classical Rome** David Thurmond,2006-07-01 Rome was able to support a huge urban population by providing it with the rudiments of human nutrition in the form of processed foods This volume contains a careful analysis of those food processes The work is organized on the basis of the presumed importance of those foods beginning with the so called Mediterranean Triad of cereals particularly wheaten bread olive oil and wine then dealing with plant products such as legumes vegetables and fruits then animal products and ending with the condiments salts sugars acids spices which were themselves the agents for the preservation of other foods The work combines analysis of literary and archaeological evidence from antiquity with that of traditional comparative practices and modern food science **Connecting Indian Wisdom and Western Science** Luisella Verotta,Maria Pia Macchi,Padma Venkatasubramanian,2015-04-24 A truly integrated collection of research Connecting Indian Wisdom and Western Science Plant Usage for Nutrition and Health compares Ayurvedic and Western conceptions of wellness healthy lifestyle and diet Examining the phyto pharmacological phytochemical clinical ethnobotanical sociocultural and biomedical approaches to plant and herb b *Anchoring Science and Technology in Greco-Roman Antiquity* ,2024-12-19 This collection of essays explores processes of innovation in Greco Roman technology and science It uses the concept of anchoring to investigate the microhistories of technological and scientific practices and ideas The volume combines broad theoretical essays with more targeted case studies of individual inventions and innovations In doing so it moves beyond the emphasis on achievement that has traditionally characterized modern scholarship on ancient technology and science Instead

the chapters of this volume analyse the manifold ways in which new technologies and ideas were anchored in what was already known and familiar and highlight how once familiar technologies and ideas could themselves become anchoring points for inventions and innovations
