

WHAT ARE SOME EXAMPLES OF FOOD POLICIES THAT PROMOTE LOCAL FOOD?

MUNICIPAL, PROVINCIAL, AND FEDERAL GOVERNMENT POLICY

Supporting Alberta's Local Food Sector Act

Created the Alberta local food Council, comprised of food policy experts and local food producers.

They are set to make policy recommendations for the Government of AB.

Canada's Food Policy

The Local Food Infrastructure Fund provides funding for community organizations and other groups in building infrastructure to help establish a local food system.

The Food Collection Programme Catalogue gives out information about Canadian agricultural products and how to connect Canadians to purchase.

City of Calgary Food Action Plan

Allows local food vendors to access the LET markets and community areas.
Provides supports for indoor food gardens.

Changes some unused city land into sites for urban farming and community gardens.

How do these policies help us make informed choices?

- By making local food available in more places, consumers aren't forced to buy the grocery store option- there are more choices.
- By providing funding for local food infrastructure, the cost of local food goes down, which means that consumers can choose that option more easily.
- By giving local food producers a voice in government policy, policies are made that allow more varieties of food to become available in the market.
- When the government provides information and education about local food, and healthy food choices, consumers are able to use this information to make informed decisions.

FRESH: Edmonton's

Urban Agriculture Strategy

Develop local food infrastructure capacity, specifically for processing, storage and distribution of local food.

Improve access to local foods by supporting and strengthening local farmer's markets.

Food Policies:

Food Policy in the United States Parke Wilde, 2013 This book offers a broad introduction to food policies in the United States Real world controversies and debates motivate the book's attention to economic principles policy analysis nutrition science and contemporary data sources It assumes that the reader's concern is not just the economic interests of farmers but also includes nutrition sustainable agriculture the environment and food security The book's goal is to make US food policy more comprehensible to those inside and outside the agri food sector whose interests and aspirations have been ignored The chapters cover US agriculture food production and the environment international agricultural trade food and beverage manufacturing food retail and restaurants food safety dietary guidance food labeling advertising and federal food assistance programs for the poor The author is an agricultural economist with many years of experience in the non profit advocacy sector the US Department of Agriculture and as a professor at Tufts University The author's well known blog on US food policy provides a forum for discussion and debate of the issues set out in the book Food policies and their implications on overweight and obesity trends in selected countries in the Near East and North Africa region International Food Policy Research Institute ,Food and Agriculture Organization of the United Nations ,2020-12-16 Regional and global trends in body weight show that the Near East and North Africa NENA region countries especially the Gulf Cooperation Council GCC member countries have the highest average body mass index and highest rates of overweight and obesity in the world There exist several explanations that expound the high rates of overweight and obesity in most NENA countries including the nutrition transition urbanization changes in lifestyle and consequent reduction of physical activities This study examines the implication of food policies mainly trade and government food subsidies on evolving nutritional transitions and associated body weight outcomes We examine the evolution of trade food policies food systems and body weight outcomes across selected countries in the NENA region Egypt Jordan and Iraq In particular we investigate the implications of important trade food policies in shaping diets and food systems as well as their implications on public health outcomes mainly the rising levels of overweight and obesity in the NENA region We provide a simple conceptual framework through which trade policies tariff rates and domestic government food policies subsidies may affect food systems and nutritional outcomes An important and innovative feature of this study is that it compiles several macro and micro level datasets that allow both macro and micro level analyses of the evolution of trade food policies and associated obesity trends This approach helps to at least partly overcome the data scarcity that complicates rigorous policy research in the NENA region Overweight and obesity rates have almost doubled between 1975 and 2016 with varying rates and trends across regions For instance whereas body weight in the NENA region was comparable with that found in high income countries in the early years after the 1990s regional overweight and obesity rates became much higher than those in high income countries Specifically while most high income countries are experiencing a relative slowing of increases in overweight rates the trend for the NENA region continues to

increase at higher rates The evolution of overweight rates for the GCC countries are even more concerning These trends are likely to contribute to the already high burden of non communicable diseases in the NENA region **Russia's Food**

U.S. Food Policy Lisa Markowitz, John Brett, 2013-09-13 Inequity of control over food systems is a particularly insidious form of injustice. Collectively the contributors to this volume posit that this inequity is rooted in power asymmetries in the U.S. food system and codified through U.S. food policies. This process puts the public at risk in the U.S. and via trade and foreign aid policies in the Global South. Inequities are manifest in the allocation of food and food producing resources in favor of the wealthy exploitation of the natural environment for short term gain of private interests over long term public ones, the framing of public discussion on food and food deprivation and finally the deflection of moral challenges posed by human rights to food. The contributors draw on long term anthropological field research to examine these tensions and their on the ground outcomes in diverse cultural and national contexts. The authors' insightful analyses span a wide variety of topics including dietary change, food insecurity, livestock production and organic farming in the light of U.S. trade, food labor and agricultural policies and food assistance programs. The collection highlights the obstacles to and the dilemmas and inconsistencies in shaping policy in the public interest. This book was originally published as a special issue of *Food Foodways*.

Food Trade and Foreign Policy Robert L. Paarlberg, 2019-06-30 When U.S. Secretary of Agriculture Earl L. Butz announced in 1974 that food is a weapon, he voiced a growing national belief in the political power of food resources. President Carter's 1980 decision to embargo grain sales to the Soviet Union appeared at first to confirm this popular notion. But can exporting nations such as the United States really use food as a powerful instrument of foreign policy? If so, are they using that weapon more frequently? Are importing nations taking steps to reduce their vulnerability? Challenging the view that food has emerged as a political weapon, Robert Paarlberg undertakes the first systematic inquiry into the relation between food resources and international power. Paarlberg maintains that food trade is seldom manipulated for reasons of foreign policy due to the greater priority assigned by most nations to domestic food and farm policy objectives. To support his argument, he reviews the recent grain trade experience of three significant and divergent nations: India, the Soviet Union, and the United States. He then examines in detail two exceptional instances in which the coercive power of the U.S. food weapon was put to the test: Lyndon Johnson's manipulation of food aid to India in 1965-1967 and the Carter embargo on grain sales to the Soviet Union in 1980-1981. He concludes that the difficulties experienced in each instance only reinforced the larger trend against linking grain trade policy to foreign policy, a trend that can be applauded by those concerned with world food security and trade efficiency. Robert Paarlberg's challenge of the food power concept provides a valuable comparative insight into the conduct of national as well as international food policies.
