choices and some speculation about why they made the choices they did. Contrary to received ideas, men in the provinces were the principal customers for eighteenth century novels including those written by women. Provincial customers preferred to buy rather than borrow fiction and women preferred plays and novels written by women. Women's works would have done better had women been the principal consumers. That is, demand for fiction written by both men and women was about equal for the first five years but afterward the demand for women's works declined. Both men and women preferred novels with identifiable authors to anonymous ones, however, and both boys and men were able to cross gender lines in their reading. *Goody Two Shoes* was one of the more popular children's books among Rugby schoolboys and men read the *Lady's Magazine*. These and other findings will alter the way scholars look at the fiction of the period, the questions asked and the histories told of it.

Lives of the Sonnet, 1787-1895 Marianne Van Remoortel, 2016-05-06

In a series of representative case studies Marianne Van Remoortel traces the development of the sonnet during intense moments of change and stability, continuity and conflict from the early Romantic period to the end of the nineteenth century. Paying particular attention to the role of the popular press which served as a venue of innovation and as a site of recruitment for aspiring authors, Van Remoortel redefines the scope of the genre including the ways in which its development is intricately related to issues of gender. Among her subjects are the Della Cruscan and their primary critic William Gifford, the young Samuel Taylor Coleridge and his circle, Elizabeth Barrett Browning's *Sonnets from the Portuguese*, George Meredith's *Modern Love*, Dante Gabriel Rossetti's *House of Life* and Augusta Webster's *Mother and Daughter*. As women became a force to be reckoned with among the reading public and the writing community, the term sonnet often operated as a satirical label that was not restricted to poetry adhering to the strict formalities of the genre. Van Remoortel's study, in its attentiveness to the sonnet's feminization during the late eighteenth century, offers important insights into the ways in which changing attitudes about gender and genre shaped critics' interpretations of the reception histories of nineteenth century sonnet sequences.
