Agroecological Footprints Management for Sustainable Food System Arnab Banerjee,Ram Swaroop Meena,Manoj Kumar Jhariya,Dhiraj Kumar Yadav,2020-12-16 Agroecological footprints are a unique and popular concept for sustainable food system Measuring and keeping a tab on the agroecological footprints of various human activities has gained remarkable interest in the past decade From a range of human activities food production and agriculture are most essential as well as extremely dependent on the agroecosystems It is therefore crucial to understand the interaction of agroecosystem constituents with the extensive agricultural practices The environmental impact measured in terms of agroecological footprints for a healthy for the sustainable food system The editors critically examine the status of agroecological footprints and how it can be maintained within sustainable limits Drawing upon research and examples from around the world the book is offering an up to date account and insight into how agroecology can be implemented as a solution in the form of eco friendly practices that would boost up the production curbs the environmental impacts improves the bio capacity and reduces the agroecological footprints It further discusses the changing status of the agroecological footprints and the growth of other footprint tools and types such as land water carbon nitrogen etc This book will be of interest to teachers researchers government planners climate change scientists capacity builders and policymakers Also the book serves as additional reading material for undergraduate and graduate students of agriculture agroforestry agroecology soil science and environmental sciences National and international agricultural scientists policymakers will also find this to be useful to achieve the Sustainable Development Goals

From the City as a Project to the City Project Fernando Carrión Mena,Sebastián Rodríguez Alvarez,2025-09-26 The city has historically been conceived as a project with a sense of duty to be it is the prefiguration of a reality that emerges from the negation of the pre existing city The city anticipates a desired future from an ideal perspective that tends to overcome the existing structural or particular challenges of the present It can be argued that this proposition represents the historical trajectory of urban thought on a planetary scale Therefore the prospective dimension of the city constituted a central dynamic in urban theory throughout history leading to the emergence of planning as a key approach The history of the city as a project is the core of the first volume in this two part contribution It presents an overview of diverse city projects that have been pursued throughout history providing a framework for exploring new perspectives of urban development The cities profiled and analyzed here reflect a living catalog of initiatives that can inform promising directions More than a compilation this volume compares and critically assesses these historical projects to provide a grounding for the contemporary advances presented in the second volume

World Regional and Cultural Footprints and Environmental Sustainability Ebenezer O. Aka,2017-04-26 The book examines the issues of sustainability in general It addresses various socioeconomic determinants of ecological footprints in different world s nations regions and

cultures Major socioeconomic determinants of ecological footprints are fleshed out using Comparative Model Analysis and rigorous Multiple Regression Analysis The study exposes the inequitable distribution of the world s ecological footprints and also heightens the concern about ecological imbalances and overshoots It explains how sustainable development can be promoted and achieved in regional national and local jurisdictions The study provides information that will likely help various governments and policy makers determine if a given nation region or culture is on a sustainable path It helps government leaders planners policy makers and even students of sustainability make a difference in mitigating the effects of various environmental stressors If this book makes people and policy makers in different countries regions and cultures think globally but act locally then the objectives are well served

THE TRIASSIC TETRAPOD FOOTPRINT RECORD

HENDRIK KLEIN,SPENCER G. LUCAS,2021-04-16 **Water Harvesting in Sub-Saharan Africa** William Critchley,John Gowing,2013-01-04 Agriculture in Sub Saharan Africa is constrained by highly variable rainfall frequent drought and low water productivity There is an urgent need heightened by climate change for appropriate technologies to address this problem through managing and increasing the quantity of water on farmers fields water harvesting This book defines water harvesting as a set of approaches which occupy an intermediate position along the water management spectrum extending from in situ moisture conservation to irrigated agriculture They generally comprise small scale systems that induce collect store and make use of local surface runoff for agriculture The authors review development experience and set out the state of the art of water harvesting for crop production and other benefits in Sub Saharan Africa This includes an assessment of water harvesting schemes that were initiated two or three decades ago when interest was stimulated by the droughts of the 1970s and 1980s These provide lessons to promote sustainable development of dryland agriculture in the face of changing environmental conditions Case studies from eight countries across Sub Saharan Africa provide the evidence base Each follows a similar format and is based on assessments conducted in collaboration with in country partners with a focus on attempts to promote adoption of water harvesting both horizontally spread and vertically institutionalization Introductory cross cutting chapters as well as an analytical conclusion are also included *Proceedings of the Global Symposium on Soil Erosion* Food and Agriculture Organization of the United Nations,2019-10-15 The proceedings book of the Global Symposium on Soil Erosion GSER19 contains all papers presented both orally and in poster format during the symposium 15 17 May 2019 FAO HQ The papers presented have provided sufficient scientific evidence to show that soil erosion is a global threat to food production systems available land for future demand rural livelihoods human health and biodiversity and that coordinated effective action needs to be fostered and accelerated to address this issue Studies presented provided scientific evidence that soil erosion is accelerated by anthropogenic action In the current context of population increase and climate change urgent action is needed from governments to support farmers and land users in the transition to sustainable production systems and crucial action is needed at global level to raise awareness of the importance of healthy and

productive soils to ensure a sustainable future and the achievement of many of the SDGs targeting hunger water quality and life on land amongst others

Ecological Footprint Mathis Wackernagel, Bert Beyers, 2019-09-03 The only metric that tracks how much nature we have and how much nature we use Ecological Footprint accounting first introduced in the 1990s and continuously developed continues to be the only metric that compares overall human demand on nature with what our planet can renew its biocapacity and distils this into one number how many Earths we use Our economy is running a Bernie Madoff style Ponzi scheme with the planet We use future resources to run the present using more than Earth can replenish Like any such scheme this works for a limited time followed by a crash Avoiding ecological bankruptcy requires rigorous resource accounting a challenging task but doable with the right tools Ecological Footprint provides a complete introduction covering Footprint and biocapacity accounting Data and key findings for nations Worldwide examples including businesses cities and countries Strategies for creating regenerative economies Whether you re a student business leader future oriented city planner economist or have an abiding interest in humanity s future Footprint and biocapacity are key parameters to be reckoned with and Ecological Footprint is your essential guide AWARDS SILVER 2020 Eric Zencey Prize SILVER 2019 Nautilus Book Awards Ecology Environment FINALIST 2019 Foreword INDIES Ecology Environment , **Ecological Footprints of Climate Change** Uday Chatterjee, Angela Oyilieze Akanwa, Suresh Kumar, Sudhir Kumar Singh, Abira Dutta Roy, 2023-01-01 This book explores global implications of human activities that trigger changes in climate and the appropriate scientific adaptive and sustainable approaches as a proven information tool It reveals that the ecological social and economic dynamics of the changing earth encompasses huge uncertainties coupled with its ability to be linked to other forms of global change From a scientific perspective multiple efforts are expedient to integrate the many aspects of global changes Increases in science and technology have afforded nations the ability to plan for the future by investing in adaptive and mitigative measures to monitor present and future changes Just as the climatic and ecological impacts of climate change are unequally distributed so is the adaptive capacity to cope with these impacts in different nations Considering that wealth infrastructure and political stability all contribute to a nation s capacity to anticipate and respond to change So global South nations who are disadvantaged in these areas are faced with more inequalities and more unique adaptive strategies There is need for increased aggregate efforts and interaction between scientists stakeholders and policy makers to improve both decision making and global change in science Scientists and researchers need to work on expanding the range of policies that are proposed debated and implemented This way novelty new ideas and methodologies are infused into the society At this point of multiple climate footprints there is an immense need to explore all ideas evaluating their possibilities in presenting alternative futures developing alternative policies and adaptive options to solve the intractable ecological footprints of climate change

Environmental Footprint of Bioplastic Additives
 Babafemi Raphael Babaniyi, Sesan Abiodun Aransiola, Gabriel Gbenga Babaniyi, Naga Raju Maddela, 2025-10-21

Plastics derived from renewable sources such as biomass or animal based materials offer an eco friendly alternative to traditional petroleum based plastics These bioplastics being biobased and biodegradable hold great promise in reducing reliance on fossil fuels and mitigating plastic pollution However additives play a crucial role in enhancing the properties of bioplastics improving flexibility durability and overall performance While some additives facilitate biodegradation others such as phthalates bisphenol A BPA and brominated compounds can release harmful substances upon breakdown posing risks to soil and water quality This book offers a comprehensive understanding of bioplastic compositions degradation processes and the environmental impact of various additives Through detailed life cycle analyses it assesses how bioplastic additives compare to conventional plastic additives in terms of sustainability and ecological impact The book also addresses the challenges of managing bioplastic waste including recycling limitations and the lack of standardized disposal methods

Key Features

- In depth analysis of bioplastic compositions degradation processes and additive functions
- Comparative life cycle assessment of bioplastic and conventional plastic additives
- Examination of the environmental impact of bioplastic additives on soil wildlife and water quality
- Discussion on innovative waste management and recycling strategies for bioplastics
- Exploration of policy frameworks public awareness initiatives and case studies promoting sustainable bioplastic usage

Designed to address the knowledge gap in bioplastic additive research this book is an essential resource for researchers policymakers industry professionals and environmental enthusiasts It bridges the gap between scientific understanding and practical implementation empowering stakeholders to make informed decisions and contribute to sustainable bioplastic waste management

Liberia: America's Footprint in Africa Jesse N. Mongrue, 2011-08-05

The history of Liberia and the United States are closely tied together but few people have taken the necessary steps to understand the complicated relationship between the two countries Liberia Americas Footprint in Africa traces the history of an African nation whose fate is closely tied to an uprising of slaves that began on the island that is now Haiti The violence there caused people in the United States to wonder about the future of slavery and blacks in their own nation In this detailed history written by a Liberian educator youll discover how the American Colonization Society played a critical role in the creation of Liberia how courageous blacks living in the United States persevered in seeking freedom how Liberia is culturally socially and politically connected to the United States Discover the rich history of two nations and why Liberia remains relevant today Enriched

with interviews of scholars Liberian community elders and detailed research Liberia Americas Footprint in Africa is a step by step account of an overlooked country Global Political Economy, Geopolitics and International Security Omprakash Mishra,Souradeep Sen,2024-06-11 The volume delves into the intricate web of contemporary permacrisis rooted in the strategic imperatives of nation states Through a historical lens it navigates the evolving landscape of international politics tracing the transition of power dynamics from purely military to a fusion of economic and military prowess The contributions in the volume argue that this shift has redefined the traditional balance of power with economic instruments emerging as potent tools for geopolitical manoeuvring Examining the interplay of geopolitical geoeconomic and security imperatives it scrutinises the complex relationships that often perpetuate crises instead of global stability It sheds light on the unprecedented hybridity of modern warfare where military and economic dimensions intertwine exemplified by the ongoing tensions between the liberal international order on the one hand and Russia and China on the other Recognising this complexity the volume raises concerns about the uneven capacity of states to navigate these imperatives Beneficial for specialists in International Relations and Strategic Studies policymakers security experts scholars and postgraduate students this comprehensive volume offers insights into the intricate dynamics of geopolitics political economy and security issues of our time
