Experiences of War and Nationality in Denmark and Norway, 1807-1815 R. Glenthøj, M. Nordhagen

Western Europe, 1550-2020 Gunner Lind, 2024-12-09 This book is a transnational history of European weapons law that utilizes the law and primary sources to trace the development from early portable firearms to modern day weapons

Challenging many conventional assumptions this book establishes that weapons control in the current sense is a new phenomenon Control with possession only became dominant between 1918 and 1939 thereby establishing a high degree of uniformity for the first time Weapons law is old in Western Europe but only as a palette of possible solutions Possession control triumphed as a tool against Communist and Fascist attacks on democracy and remained as an instrument against crime and accidents It is argued that previously the laws on possession furthered rather than hindered ownership For centuries governments sought security by encouraging trusted men to arm themselves rather than disarming the suspect Legislators used a range of carrying restrictions sometimes many but mostly few as a tool against armed crime The author examines attitudes and policies towards power law violence social hierarchy national defence and civic freedom This volume offers historians and social scientists a new perspective on the long term development of Western European states and societies and it will be of value to undergraduate and postgraduate students of history sociology and politics **Det**
