Transportation of Hazardous Materials Leon N. Moses, Dan Lindstrom, 2012-12-06 Leon N Moses In June 1991 the Transportation Center at Northwestern University sponsored Hazmat Transport 91 A National Conference on the Transportation of Hazardous Materials and Wastes The faculty associated with the center were aware that there had been many professional industrial and government conferences and meetings on the subject However they believed that the unique capacity of the Transportation Center to bring together leaders from industry and government as well as leading scholars from economics law engineering psychology and sociology who have done research on the problems associated with the transportation of hazardous materials and wastes hazmats could produce a set of integrated insights and understandings that would go well beyond those of previous conferences The papers that make up this volume were all delivered at Hazmat Transport 91 From a legislative point of view they tend to deal with issues associated with the Hazardous Materials Transportation Act of 1975 HMTA the original act passed to regulate the transportation of hazardous materials and the Hazardous Materials Transportation Uniform Safety Act of 1990 HMTVSA There were talks and papers presented at the conference that focused on other recent legislation and transportation issues with which HMTUSA does not deal The conference proceedings volume also had discussions and papers on significant managerial and regulatory issues that could not be included in this volume because of constraints on its size Therefore this essay is made up of three parts

material capable of posing an unreasonable risk to health safety or property when transported in commerce Hazmat
accidents can result in significant impact to the population death injuries and damage to the environment destroyed or
damaged buildings and infrastructure Further hazmat especially explosive materials can potentially be used by terrorists to

area important issues include measurement of accident probabilities and consequences in hazmat transport Example works
in the risk assessment area include modeling risk probability distribution over given areas considering hazmat types and
transport modes and environmental conditions The first half of this handbook covers the two fields of risk assessment and
shipment planning while the second half of this handbook provides useful models and insights on other important issues
