**Heads above Water** Alice Fothergill, 2012-02-01 Heads above Water tells the stories of women and their families who survived the Grand Forks North Dakota flood of 1997 one of the worst natural disasters in U S history This book describes the challenges women faced and explores the importance of class race gender sexual orientation and disability in their disaster recovery The women found themselves face to face with social and familial upheaval emotional and physical trauma precarious economic and social status and feelings of loss and violation By exploring the experiences of these women author Alice Fothergill contributes to broader sociological discussions about women s changing roles the stigma of needing and receiving assistance family relationships under stress domestic violence downward mobility and the importance of home to one s identity and sense of self Heads above Water offers poignant insight into women s everyday lives in an extraordinary time Heads Above Water Alice Fothergill, 2004-06-23 An in depth exploration of women s lives after a natural disaster

Gender and the Environment Nicole Detraz, 2016-12-20 Climate change natural disasters and loss of biodiversity are all considered major environmental concerns for the international community both now and into the future Each are damaging to the earth but they also negatively impact human lives especially those of women Despite these important links to date very little consideration has been given to the role of gender in global environmental politics and policy making This timely and insightful book explains why gender matters to the environment In it Nicole Detraz examines contemporary debates around population consumption and security to show how gender can help us to better understand environmental issues and to develop policies to tackle them effectively and justly Our society often has different expectations of men and women and these expectations influence the realm of environmental politics Drawing on examples of various environmental concerns from countries around the world Gender and the Environment makes the case that it is only by adopting a more inclusive focus that embraces the complex ways men and women interact with ecosystems that we can move towards enhanced sustainability and greater environmental justice on a global scale This much needed book is an invaluable guide for those interested in environmental politics and gender studies and sets the agenda for future scholarship and advocacy **Social**

**Vulnerability to Disasters** Deborah S.K. Thomas, Brenda D. Phillips, William E. Lovekamp, Alice Fothergill, 2013-05-09 With chapters that incorporate additional perspectives on social vulnerability this second edition focuses on the social construction of disasters demonstrating how the characteristics of an event are not the only reason that tragedies unfurl It incorporates disaster case studies to illustrate concepts relevant and seminal literature and the most recent data available In addition to highlighting the U S context it integrates a global approach and includes numerous international case studies The book highlights recent policy changes and current disaster management approaches and infuses the concept of community resilience and building capacity throughout the text **Risk and Social Theory in Environmental Management** Tom Measham, Stewart Lockie, 2012 Risk and Social Theory in Environmental Management marks a timely contribution given that

environmental management is no longer just about protecting pristine ecosystems and endangered species from anthropogenic harm it is about calculating and managing the risks to human communities of rapid environmental and technological change First the book provides a solid foundation of the social theory underpinning the nature of risk then presents a rethinking of key concepts and methods in order to take more seriously the biophysical embeddedness of human society Second it presents a rich set of case studies from Australia and around the world drawing on the latest applied research conducted by leading research institutions In so doing the book identifies the tensions that arise from decision making over risk and uncertainty in a contested policy environment and provides crucial insights for addressing on the ground problems in an integrated way First volume to address environmental risk from a social science perspective Latest theoretical developments In depth case studies of contemporary issues e g climate change water shortages

**Resilience for All** Barbara Brown Wilson, 2018-05-24 In the United States people of color are disproportionately more likely to live in environments with poor air quality in close proximity to toxic waste and in locations more vulnerable to climate change and extreme weather events In many vulnerable neighborhoods structural racism and classism prevent residents from having a seat at the table when decisions are made about their community In an effort to overcome power imbalances and ensure local knowledge informs decision making a new approach to community engagement is essential In Resilience for All Barbara Brown Wilson looks at less conventional but often more effective methods to make communities more resilient She takes an in depth look at what equitable positive change through community driven design looks like in four communities East Biloxi Mississippi the Lower East Side of Manhattan the Denby neighborhood in Detroit Michigan and the Cully neighborhood in Portland Oregon These vulnerable communities have prevailed in spite of serious urban stressors such as climate change gentrification and disinvestment Wilson looks at how the lessons in the case studies and other examples might more broadly inform future practice She shows how community driven design projects in underserved neighborhoods can not only change the built world but also provide opportunities for residents to build their own capacities

**Soaking the Middle Class** Anna Rhodes, Max Besbris, 2022-07-15 Extreme weather is increasing in scale and severity as global warming worsens While poorer communities are typically most vulnerable to the negative effects of climate change even well resourced communities are increasingly vulnerable as climate related storms intensify Yet little is known about how middle class communities are responding to these storms and the resulting damage In Soaking the Middle Class sociologists Anna Rhodes and Max Besbris examine how a middle class community recovers from a climate related disaster and how this process fosters inequality within these kinds of places In 2017 Hurricane Harvey dropped record breaking rainfall in Southeast Texas resulting in more than 125 billion in direct damages Rhodes and Besbris followed 59 flooded households in Friendswood Texas for two years after the storm to better understand the recovery process in a well resourced majority White middle class suburban community As such Friendswood should have been highly resilient to storms like Harvey yet Rhodes and Besbris find that the

recovery process exacerbated often invisible economic inequality between neighbors Two years after Harvey some households were in better financial positions than they were before the storm while others still had incomplete repairs were burdened with large new debts and possessed few resources to draw on should another disaster occur Rhodes and Besbris find that recovery policies were significant drivers of inequality with flood insurance playing a key role in the divergent recovery outcomes within Friendswood Households with flood insurance prior to Harvey tended to have higher incomes than those that did not These households received high insurance payouts enabling them to replace belongings hire contractors and purchase supplies Households without coverage could apply for FEMA assistance which offered considerably lower payouts and for government loans which would put them into debt Households without coverage found themselves exhausting their financial resources including retirement savings to cover repairs which put them in even more financially precarious positions than they were before the flood The vast majority of Friendswood residents chose to repair and return to their homes after Hurricane Harvey Even this devastating flood did not alter their plans for long term residential stability and the structure of recovery policies only further oriented homeowners towards returning to their homes Prior to Harvey many Friendswood households relied on flood damage from previous storms to judge their vulnerability and considered themselves at low risk After Harvey many found it difficult to assess their level of risk for future flooding Without strong guidance from federal agencies or the local government on how to best evaluate risk many residents ended up returning to potentially unsafe places As climate related disasters become more severe Soaking the Middle Class illustrates how inequality in the United States will continue to grow if recovery policies are not fundamentally changed Disaster's Impact on Livelihood and Cultural Survival Michele Companion, 2015-03-16 Many facets of disasters generate interest among scholars and practitioners However a vital area of disaster research is consistently underemphasized Little is written about the immediate and long term impacts on a community's livelihood systems and the customs and practices of the culture affected Disaster's Impact on Livelihood and Cultural Survival *Narrating the Storm* Kristen Barber, Danielle A. Hidalgo, 2009-03-26 For those interested in learning more about the personal impact of Hurricane Katrina and its aftermath *Narrating the Storm* serves as an essential read This important and timeless volume is a compilation of sixteen narratives that address the experiences of Gulf Coast residents faculty and graduate students who were caught up in the largest not so natural disaster in United States history Each contributor deploys storytelling sociology as a methodological approach in order to illustrate how personal experiences with disaster are not so personal but rather reflect and are informed by larger social phenomena related to issues including race class gender age bureaucracy risk collective memory the blas and more The narratives in this volume exemplify how inequality and injustice are unveiled exacerbated and created by the occurrence of disaster and reveal the sociological in everyday and not so everyday experiences **The Mekong Delta Environmental Research Guidebook** Edward Park, Ho Huu Loc, Dung Duc Tran, 2024-11-14 The Mekong Delta Environmental Research Guidebook

comprehensively covers the Mekong Delta and presents new evidence on unsolved environmental issues Key experts from around the world offer suggestions for the implementation of more effective mitigation and adaptation measures especially in the context of climate change and upstream hydropower dam development This book will help guide students and scientists both juniors and seniors in their journey of the Mekong Delta Environmental Research by presenting them with all the necessary information and detailed case studies for a more in depth understanding of each issue so they can make informed decisions Presents a multi scale viewpoint about the Mekong Delta from a global to regional and local scale so that readers will gain a more holistic understanding of the issue from the root cause to solutions Includes case studies as empirical evidence to help researchers implement more effective mitigation and adaptation measures Offers the most updated knowledge on strategies in halting environmental pressures i e halting sinking delta and salinity intrusion

*Public Religion and the Urban Environment* Richard Bohannon, 2012-04-26 Nature and the city have most often functioned as opposites within Western culture a dichotomy that has been reinforced and sometimes challenged by religious images Bohannon argues here that cities and natural environments however are both connected and continually affected by one another He shows how such connections become overt during natural disasters which disrupt the narratives people use to make sense of the world including especially religious narratives and make them more visible This book offers both a theoretical exploration of the intersection of the city nature and religion as well as a sociological analysis of the 1997 flood in Grand Forks ND USA This case study shows how religious factors have influenced how the relationship between nature and the city is perceived and in particular have helped to justify the urban control of nature The narratives found in Grand Forks also reveal a broader understanding of the nature of Western cities highlighting the potent and ethically rich intersections between religion cities and nature

Facing Hazards and Disasters National Research Council, Division on Earth and Life Studies, Committee on Disaster Research in the Social Sciences: Future Challenges and Opportunities, 2006-08-10 Social science research conducted since the late 1970 s has contributed greatly to society s ability to mitigate and adapt to natural technological and willful disasters However as evidenced by Hurricane Katrina the Indian Ocean tsunami the September 11 2001 terrorist attacks on the United States and other recent events hazards and disaster research and its application could be improved greatly In particular more studies should be pursued that compare how the characteristics of different types of events including predictability forewarning magnitude and duration of impact affect societal vulnerability and response This book includes more than thirty recommendations for the hazards and disaster community

**The Political Economy of Hazards and Disasters** Eric C. Jones, Arthur D. Murphy, 2009-05-16 Throughout history societies have had to decide whom to sacrifice and whom to help in times of disaster This volume examines how elite groups attempt to maintain power through the use of particular economic political and ideological instruments and how both ruling elites and common people endeavor to create meaningful traditions while enduring hardship The Political Economy of Hazards and Disasters demonstrates how

vulnerability is economically constructed primary producers adapt their production regimes how traders and merchants adapt their practices and how political economic objectives play out in recovery efforts **In Too Deep** Rachel Kimbro, 2021-12-21 In a small Texas neighborhood an affluent group of mothers has been repeatedly rocked by catastrophic flooding the 2015 Memorial Day flood the 2016 Tax Day flood and sixteen months later Hurricane Harvey Yet even after these disrupting events almost all mothers in this neighborhood still believe there is only one place for them to live Bayou Oaks In Too Deep is a sociological exploration of what happens when climate change threatens the carefully curated family life of upper middle class mothers Through in depth interviews with thirty six Bayou Oaks mothers whose homes flooded during Hurricane Harvey Rachel Kimbro reveals why these mothers continued to stay in a place that was becoming more and more unstable Rather than retreating the mothers dug in and sustained the community they have chosen and nurtured trying to keep social emotional and economic instability at bay In Too Deep provides a glimpse into how class and place intersect in an unstable physical environment and underlines the price families pay for securing their futures **Defining Disaster** Aronsson-Storrier, Marie, Dahlberg, Rasmus, 2022-01-18 This timely book unpacks the idea of disaster from a variety of approaches broadening understanding and improving the usability of this complex and often contested concept Including multidisciplinary perspectives from leading and emerging scholars it offers reflections on how the concept of disaster has been shaped by and within various fields of research providing complementary and thought provoking comparisons across many domains Handbook of Disaster Research Havidan Rodriguez, Enrico L. Quarantelli, Russell Dynes, 2009-11-14 Recent disasters such as the 2004 Indian Ocean Tsunami bomb explosions in London Hurricane Katrina the Pakistan Earthquake floods in Central America and landslides in Indonesia among many others have resulted in an extensive loss of life social disruption significant economic impacts to local and national economies and have made headline news in countries throughout the world Thus the Handbook of Disaster Research is a timely and much needed contribution to the field of disasters The editors of this Handbook have brought together a comprehensive and interdisciplinary volume with a diverse and international group of contributors The Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research Attention is given to conceptual issues dealing with the concept disaster and to methodological issues relating to research on disasters including Geographic Information Systems as a useful research tool and its implications for future research how disaster research is increasingly being used in the emergency management curriculum and how research is useful in dealing with emergency operations The Handbook also includes a number of essays focusing on various types of vulnerabilities In addition there are discussions on community processes that are evoked by disasters including warnings search and rescue coordination and organizational adaptation as well as dealing with death and injury and recovery and the role of the media in disasters special attention is given to emergency systems in several nation states The Handbook also includes contributions focusing on the relationship between disaster and development the popular

culture of disasters new dimensions of disaster research as well as projections of disasters into the future Disasters allow the opportunity for social scientists to study human behavior in which adaptation resilience and innovation are often more clearly revealed than in normal and stable times The Handbook of Disaster Research provides an interdisciplinary and international approach to disasters with theoretical methodological and practical applications

**Gendering the International Asylum and Refugee Debate** J. Freedman,2015-06-23 This revised and updated 2nd edition of Freedman s hard hitting study aims to remedy the current lack of gender specific analyses of asylum and refugee issues It provides a comprehensive account of the situation of women in global forced migration and explains the ways in which women s experiences are shaped by gendered relations and structures

*Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation* Christopher B. Field,Vicente Barros,Thomas F. Stocker,Qin Dahe,2012-05-28 This Intergovernmental Panel on Climate Change Special Report IPCC SREX explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters Changes in the frequency and severity of the physical events affect disaster risk but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability Some types of extreme weather and climate events have increased in frequency or magnitude but populations and assets at risk have also increased with consequences for disaster risk Opportunities for managing risks of weather and climate related disasters exist or can be developed at any scale local to international Prepared following strict IPCC procedures SREX is an invaluable assessment for anyone interested in climate extremes environmental disasters and adaptation to climate change including policymakers the private sector and academic researchers
