

## Review

Reviews of books for this section are welcomed from osteopathic physicians and from faculty members in osteopathic medical institutions. Interested individuals will be sent information on format on request. A certain number of reviews are invited for books supplied to JAOA by publishers; persons wishing to be part of this program should write to the editors, giving background and areas of interest.

### Health Care Job Explosion: Careers in the 90s

By Dennis V. Damp. Pp 384, with illus. D-Amp Publications, PO Box 1243, Coraopolis, PA 15106, 1993, \$14.95 (paper).

With 3.9 million career opportunities projected by the year 2005, the healthcare field is one of the fastest growing areas of employment. Knowing just how to get into the healthcare field can be a job in and of itself. To that end, *Health Care Job Explosion: Careers in the 90s* serves as a valuable reference by providing readers with a place to begin their search. It is also one of the few source materials that accurately describe osteopathic physician education and practice:

*There are two types of physicians: The MD—Doctor of Medicine and the DO—Doctor of Osteopathy. MDs are also known as allopathic physicians. While MDs and DOs may use all accepted methods of treatment, including drugs and surgery, DOs place special emphasis on the body's musculoskele-*

*tal system. They believe that good health requires proper alignment of bones, muscles, ligaments, and nerves.*

This definition appears in chapter 9, "Health diagnosing occupations and assistants." Besides physicians, this chapter includes chiropractors, dentists, optometrists, physician assistants, and veterinarians.

Like the chapters before it, this chapter lists related occupations; the nature of the work, including working conditions; educational requirements; job outlook; and salary. (Because the American Osteopathic Association does not keep track of DOs' incomes, only salaries for allopathic physicians are included here.) Publications that list job openings in the occupation being described are featured as well. Unfortunately, in this section, *The DO* magazine is not among these listings. However, the American Osteopathic Association is included under the list of associations found at the end of the section.

Five additional chapters focus on other opportunities within the healthcare field: technologists; technicians; dietitians, pharmacists, therapists; nurses; medical assistants, social workers, human services workers, and home health aides. The author profiles persons who work as a radiological technologist, emergency medical technician, physical therapist, registered nurse, social worker, and physician assistant. Each of these positive vignettes features the interviewees offering readers general advice on the required education for the job and sharing their overall experiences in their positions, including their

compensation. These individuals obviously enjoy their occupations.

Besides providing guidance in finding a job in specific healthcare areas, the author outlines those general educational requirements and job search skills that are necessary to be hired for any position, not just those in medicine. These skills include making contacts, interviewing, and following up after the interview. As in those chapters discussing specific positions, here, common job sources are listed, along with periodicals publishing classified advertising sections, job placement services, and associations.

Despite some editorial and production oversights and shortcomings (misspellings; amateurish graphics), *Health Care Job Explosion: Careers in the 90s* nicely introduces interested individuals to the field of healthcare.
