**Governing the States and the Nation , National Health Insurance in the United States and Canada** Gerard W. Boychuk,2008-07-02 After World War II the United States and Canada two countries that were very similar in many ways struck out on radically divergent paths to public health insurance Canada developed a universal single payer system of national health care while the United States opted for a dual system that combines public health insurance for low income and senior residents with private primarily employer provided health insurance or no insurance for everyone else In National Health Insurance in the United States and Canada Gerard W Boychuk probes the historical development of health care in each country honing in on the most distinctive social and political aspects of each country the politics of race in the U S and territorial politics in Canada especially the tensions between the national government and the province of Quebec In addition to the politics of race and territory Boychuk sifts through the numerous factors shaping health policy including national values political culture and institutions the power of special interests and the impact of strategic choices made at critical junctures Drawing on historical archives oral histories and public opinion data he presents a nuanced and thoughtful analysis of the evolution of the two systems compares them as they exist today and reflects on how each is poised to meet the challenges of the future *Can Efficiency and Community Service Be Symbiotic?* Sharyn Potter,2018-10-24 In recent years researchers have asserted that the once salient distinctions between not for profit and for profit hospitals are quickly eroding

These converging outcomes represent a striking departure from past differences. Historically, not-for-profit hospitals were larger and treated a higher proportion of seriously ill patients than for-profit hospitals. Not-for-profit hospitals also had larger medical staffs and offered greater opportunities for medical training. Researchers have vigorously debated the implications of the fading distinction between for-profit and not-for-profit hospitals. As these researchers note, numerous communities support not-for-profit hospitals with taxpayer dollars, income and property tax exclusions, and tax-free financing and contributions. Many are concerned that not-for-profit hospitals will jettison community service in an attempt to reduce operating costs. Despite such important implications, this literature is full of philosophical discussions typically employing limited empirical data, limited time frames, and limited consideration of the hospital environment. This limited consideration of environmental factors, i.e., policy, supply, and demand, leaves an important question unanswered: How do environmental factors combine to produce the narrowing distinction between not-for-profit and for-profit hospitals? Potter's book examines the claims of a narrowing distinction between not-for-profit and for-profit hospitals by analyzing short-term general hospital outcomes in the 48 contiguous states over a fifteen-year period in conjunction with various environmental factors. In particular, this book analyzes the claims of a declining distinction between hospital types by focusing on both hospital efficiency and community service outcomes. It examines whether the efficiency and community service outcomes of not-for-profit and for-profit hospitals have converged, finding that hospital type was most significant in explaining the variance in hospital outcomes in the early 1980s than in the mid-1980s and early 1990s. The story is quite different when we examine community service outcomes. In particular, Potter does not find evidence that hospitals are reducing their provision of community care in an effort to reduce expenses.

rising healthcare and pension costs large scale immigration childcare and work life balance and climate change and ask whether such policies might prove effective in the U S context Brief and engaging Lessons from Europe is an ideal supplement for comparative public policy courses and would add a provocative comparative component to U S public policy courses
