Health Psychology Michele Crossley, 2000-10-16 What are the main theories methods and applications relevant to the study of health and illness from a psychological perspective In what ways can contemporary health psychology be critically rethought What are the implications of this rethinking for the future of health psychology This introductory text presents a coherent overview of prevalent theories methods and applications within contemporary health psychology In particular it provides a critical analysis of mainstream health psychology by drawing on newer approaches such as discourse narrative postmodernism and material discursive analysis In this way the largely decontextualized individualist and cognitively orientated field of health psychology is brought up to pace with critical developments in other areas such as social psychology These theoretical ideas provide the basis of the book's main thesis that contemporary health psychology needs to be rethought After presenting an overview of the different theories and methods associated with mainstream and newer approaches within health psychology the application of these approaches is logically and critically pursued across a range of substantive areas These include risky health related behaviours such as eating alcohol and drug use exercise and sex health promotion related to these risky behaviours living and coping with chronic illnesses mental health and illness communicating and relating with health professionals and living with dying Finally this book locates the growing popularity of health psychology within the contemporary social and political context particularly in relation to recent changes in the way health care is organized and the commodification and commercialization of health and lifestyles Bodymind Energetics Mark D. Seem, Joan Kaplan, 1987-12 Dr Seem proposes an integration of Traditional Chinese Medicine and psychosomatics in this model of health care that acknowledges the connection of body and mind *Knowledge, Power, and Practice* Shirley Lindenbaum, Margaret M. Lock, 1993-10-04 Ranging in time and locale these essays which combine theoretical argument with empirical observation are based on research in historical and cultural settings The contributors accept the notion that all knowledge is socially and culturally constructed and examine the contexts in which that knowledge is produced and practiced in medicine psychiatry epidemiology and anthropology from publisher description *My Imaginary Illness* Chloe Atkins, 2011-05-15 How Patients Think At age twenty one Chlo Atkins began suffering from a mysterious illness the symptoms of which rapidly worsened Paralyzed for months at a time she frequently required intubation and life support She eventually became quadriplegic dependent both on a wheelchair and on health professionals who refused to believe there was anything physically wrong with her When test after test returned inconclusive results Atkins's doctors pronounced her symptoms psychosomatic Atkins was told not only that she was going to die but also that this was her own fault they concluded she was so emotionally deranged that she was willing her own death *My Imaginary Illness* is the compelling story of Atkins's decades long battle with a disease deemed imaginary her frustration with a succession of doctors and diagnoses her immersion in the world of psychotherapy and her excruciating physical and emotional journey back to wellness As both a political theorist and patient Atkins provides a narrative critique of contemporary medicine and its problematic handling of uncertainty and of

symptoms that are not easily diagnosed or known. She convincingly illustrates that medicine's belief in evidence-based practice does not mean that individual doctors are capable of objectivity nor that the presence of biomedical ethics invokes ethical practices in hospitals and clinics. A foreword by Bonnie Blair O'Connor who teaches medical students how to listen to patients and a clinical commentary by Dr. Brian David Hodges, a professor of psychiatry, enrich the book's narrative with practical guidance for medical practitioners and patients alike. *The Finest Traditions of My Calling* Abraham M. Nussbaum, 2016-03-28. Patients and doctors alike are keenly aware that the medical world is in the midst of great change. We live in an era of continuous healthcare reforms, many of which focus on high volume efficiency and cost effectiveness. This compelling, thoughtful book is the response of a practicing psychiatrist who explains how population-based reforms have diminished the relationship between doctors and patients to the detriment of both. As an antidote to failed reforms and an alternative to stubbornly held traditions, Dr. Abraham M. Nussbaum suggests ways that doctors and patients can learn what it means to be ill and to seek medical assistance. Using a variety of riveting stories from his own and others' experiences, the author develops a series of metaphors to explore a doctor's role in different healthcare reform scenarios: scientist, technician, author, gardener, teacher, servant, and witness. Each role influences what a physician sees when examining a person as a patient. Dr. Nussbaum cautions that true healthcare reform can happen only when those who practice medicine can see and be seen by their patients as fellow creatures. His memoir makes a hopeful appeal for change, and his insights reveal the direction that change must take. *Illuminating the Diversity of Cancer and Palliative Care Education* Lorna Foyle, Janis Hostad, 2018-04-19. *Illuminating the Diversity of Cancer and Palliative Care Education* examines a myriad of original approaches, techniques, methods, educational strategies, and imaginative innovations within this vital field of medicine. Its contributors share a range of educational techniques and tactics from Neuro-Linguistic Programming to creative teaching strategies for bereavement support, allowing readers to reflect on best practice and inventive ways of working which can be used or adapted to suit. This book is an ideal companion to its sister volumes: *Innovations in Cancer and Palliative Care Education* and *Delivering Cancer and Palliative Care Education*. **The Illusion of Trust** E.R. DuBose, 2012-12-06. This book is about trust and its implications for a medical-theological ethics. Beginning with its earliest work, there has been attention to trust running through the bioethics literature in the United States, and much of this discussion has examined its theological elements. Clearly, trust is indispensable when describing the patient-physician relationship, so why is there a need for yet another study? There is no doubt that people generally trust physicians. Traditionally, the physician is the patient's fiduciary agent whose sole obligation is to act only in the patient's best interest. In recent times, however, there is a perception on the part of people within and without health care that physicians have other obligations that compete with their obligation to the patient. If we acknowledge that one price for the successes of technological biomedicine is high in terms of financial cost, another price of success seems to be distrust, cynicism, and suspicion directed by the public toward the medical profession. If

this uneasiness is the price society pays for medical success what is the price of success for the doctor Because of their role within the social order physicians have claimed and been granted autonomy authority and special status In return the profession has pledged to serve the well being and interests of humankind This fiduciary commitment becomes a taken for granted aspect of the physician's identity both for the physician for whom this dedication is definitional and for the public which expects trustworthy service from this person

**Cancer in the Community** Martha Balshem, 2013-04-09 Focusing on deep conflicts between the medical establishment and the working class Martha Balshem chronicles a health education project in Tannerstown a pseudonym for a blue collar neighborhood in northeast Philadelphia

Reconstructing Illness Anne Hunsaker Hawkins, 1999 Serious illness and mortality those most universal unavoidable and frightening of human experiences are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times As modern medicine has become more scientific and dispassionate a new literary genre has emerged pathography the personal narrative concerning illness treatment and sometimes death Hawkins's sensitive reading of numerous pathographies highlights the assumptions attitudes and myths that people bring to the medical encounter One factor emerges again and again in these case studies the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease Pathography allows the individual person a voice one that asserts the importance of the experiential side of illness and thus restores the feeling thinking experiencing human being to the center of the medical enterprise Recommended for medical practitioners the clergy caregivers students of popular culture and the general reader Reconstructing Illness demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human

**Bodies in a Broken World** Ann Folwell Stanford, 2004-07-21 In this multidisciplinary study Ann Folwell Stanford reads literature written by U.S. women of color to propose a rethinking of modern medical practice arguing that personal health and social justice are inextricably linked Drawing on feminist ethics to explore the work of eleven novelists Stanford challenges medicine to position itself more deeply within the communities it serves especially the

poor and marginalized However she also argues that medicine must recognize its limits and join forces with the nonmedical community in the struggle for social justice In literary representations of physical and emotional states of illness and health Stanford identifies issues related to public health medical ethics institutionalized racism women s health domestic abuse and social justice that are important to discussions about how to improve health and health care She argues that in either direct or indirect ways the eleven novelists considered here push us to see health not only as an individual condition but also as a complex network of individual institutional and social changes in which wellness can be a possibility for the majority rather than a privileged few The novelists whose works are discussed are Toni Cade Bambara Paule Marshall Gloria Naylor Leslie Marmon Silko Toni Morrison Louise Erdrich Sandra Cisneros Bebe Moore Campbell Sapphire Ana Castillo and Octavia Butler
