*Power Structure* John E. Kwoka Jr.,2007-08-28 Power Structure examines the effects on economic performance of several key features of the U S electric power industry Paramount among these are public versus private ownership vertical integration versus deintegration and retail competition versus monopoly distribution Each of these as well as other structural characteristics of utilities and their markets are analyzed for their effects on costs and price These issues are important for a number of reasons The U S electric power industry is presently embarking on a fundamental restructuring in terms of integration and competition In other countries privatization of state owned enterprises is being viewed as the answer to unsatisfactory performance From a longer perspective the question of the relative performance of publicly owned versus privately owned utilities in the U S has never been resolved And despite much speculation there is little reliable evidence as to the importance of either vertical integration or competition Competition in Network Industries Michael U. **Management of Regulatory Influences on Corporate Strategy and Structure** Sebastian Frankenberger,2007-10-29 Foreword In recent years regulation and deregulation issues grew into a major concern of corporate management Asked about their biggest pain points managers from different businesses not only network based industries like telecommunications transportation and energy but also chemicals or food and beverages mentioned uncertainty resulting from regulation Despite this fact strategic management has so far widely neglected the interactions and inter dependencies between corporate and regulatory actors With this dissertation the author aims at closing this gap through a better integration of external regulatory actors into the strategy formation process More specifically he asks how regulatory actors

impact corporate strategy and structure and how corporate management can proactively manage this type of external involvement Based on an extensive literature review the author shows that extant models of the strategy formation process focus almost exclusively on actors internal to the firm external actors are widely neglected In general they have been condensed under rather abstract conditions of the environment such as uncertainty or complexity If explicitly considered only selected elements e g innovativeness diversification or organizational design have been analyzed in primarily content based quantitative cross sectional studies A broader understanding of the complex inter dependencies and mutual influences between corporate and external actors remains lacking
