*Engineering Feats* Christine Garnaut, 2001-12-06 Encyclopedia of Architectural and Engineering Feats presents more than

200 achievements in architecture and structural engineering in all the inhabited continents from prehistory to the present An

architect once described the built environment as the manifestation of the human spirit in stone wood and steel In this new volume readers can explore the most innovative and magnificent architectural expressions of the human spirit from pre history to the present from all parts of the world Readers can visit the Acropolis and Chartres cathedral along with less familiar places like the ruins of Great Zimbabwe once the greatest city in sub Saharan Africa and China s 71 meter high 1 200 year old Grand Buddha carved from stone They ll learn the secrets behind audacious engineering feats like the Panama Canal the U S interstate highway system and the Deltaworks in the Netherlands They will discover that many of these awe inspiring projects were not the work of trained architects and engineers but of underdeveloped communities where unified will tight social organization and shared commitment to a spiritual ideal were more important than the inventions of the Industrial Age

*The Template-makers of the Paris Basin* John James,1989 The 12th and 13th century early Gothic churches from the region around Paris which form the basis of this study were large scale undertakings Dr James draws on evidence which suggests that work proceeded in a series of projects when funding technical problems for example slow setting mortar and the work of other trades such as roofing and centring allowed Within each project there were generally a number of separately organised phases or campaigns and it is from close study of these campaigns that the author proceeds to an identification of the characteristics of the individual master masons the template makers

*The Architectural History of King's College Chapel* Francis Woodman,2023-01-27 First Published in 1986 The Architectural History of King s College Chapel provides a complete picture of how and why King s College Chapel came to be built Francis Woodman uses the evidence both of structure and style and finance and patronage to present the organisation and mechanics of the structural campaigns spread over more than seventy years He proposes a completely new sequence of constructions from that hitherto accepted together with clear evidence of changes in policy concerning the intention to vault the Chapel part way through construction The book also contains the first complete analysis of the remarkable Tudor building accounts and their significance for the study of mediaeval architectural history King s College Chapel is placed within the context of the contemporary architecture in both England and France and for the first time English late mediaeval architecture is considered and presented as one part of a wider European movement This book is a must read for scholars and researchers of British architecture and architectural history

**The Art of Structures** Aurelio Muttoni,2011-01-01 This book describes the complete panorama of supporting structures and their function by describing how loads are sustained and transmitted to the ground With a minimum of mathematics the reader is guided through the analysis of some of the world s most famous designs and structures from a civil engineering perspective An intuitive approach is taken the basics of equilibrium analysis are explained by visualizing the internal forces of specific structures with the aid of simple graphical tools Ideal for anyone who needs an intuitive and practical approach to the design and appropriate sizing of load bearing structures
