## **Fast Cycle Time How To Align Purpose Strategy And Structure For Speed:**

**Fast Cycle Time** Christopher Meyer, 2010-05-11 Today tens of thousands of companies are struggling to become time based competitors inspired by such corporations as Motorola General Electric Citicorp and a myriad of others who have cut production time in half or more But until now the literature has focused on the theory and philosophy of fast cycle time rather than the tools and techniques for implementing it Here for the first time Christopher Meyer an internationally recognized expert in cycle time reduction presents a step by step blueprint for transforming traditional companies into fast cycle competitors Meyer argues that fast cycle time is achieved not by working faster but by aligning the organization s purpose strategy and structure He demonstrates how the product development cycle must become a learning laboratory in which the four continuous elements Design Fabricate Assemble and Test are analyzed with the intent to improve strategy in the next business cycle Analyzing strategy and core processes enables management to detect and correct problems earlier and leverage knowledge for improved innovation and increased value for customers Employing an ongoing case study Core Products Inc throughout the text Meyer shows how to redesign the organization for manufacturability and assembly how to implement multifunctional teams that work how to analyze and map critical cycle time interdependencies such as co location and how to measure the impact of cycle time on business performance Meyer s practical approach provides a simple methodology for organizations to deliver products to customers rapidly accurately and reliably Chris Meyer interrelates many pieces that we have all read about in different places into a coherent guide to making it happen Ironically as Meyer shows implementing fast cycle time means almost the opposite of what most American managers are inclined to do Many years of practical experience have shown Meyer and his colleagues the wisdom of a paradox that to speed up you often have to slow down From the Foreword by Peter M Senge      *Construction Supply Chain Management Handbook* William J. O'Brien, Carlos T. Formoso, Vrijhoef Ruben, Kerry London, 2008-10-20 Mounting emphasis on construction supply chain management CSCM is due to both global sourcing of materials and a shortage of labor These factors force increasing amounts of value added work to be conducted off site deep in the supply chain *Construction Supply Chain Management Handbook* compiles in one comprehensive source an overview of the dive      Leading Product Development Steven C. Wheelwright, Kim B. Clark, 2007-09-07 Covers pre project planning choosing projects that match the strategic objectives of the company and determining project sequence measurement and incentives      Unnatural Leadership David L. Dotlich, Peter C. Cairo, 2002-01-24 Written by David Dotlich and Peter Cairo two of the country s top executive coaches and educators *Unnatural Leadership* debunks the common notion of the natural leader as a flawless figure The book describes the truth about being a real leader in a business environment turned upside down by e commerce diversity security concerns globalization and matrix structures Drawing on personal experience working with successful leaders in top tier companies throughout the world Dotlich and Cairo identify a style of leadership used by those who succeed in complicated business and

people situations a style that maximizes a leader's strengths and acknowledges weaknesses **Manage It!** Johanna Rothman, 2007-06-07 This book is a reality based guide for modern projects You'll learn how to recognize your project's potholes and ruts and determine the best way to fix problems without causing more problems Your project can't fail That's a lot of pressure on you and yet you don't want to buy into any one specific process methodology or lifecycle Your project is different It doesn't fit into those neat descriptions Manage It will show you how to beg borrow and steal from the best methodologies to fit your particular project It will help you find what works best for you and not for some mythological project that doesn't even exist Before you know it your project will be on track and headed to a successful conclusion

**Contemporary Global Perspectives on Gender Economics** Moore, Susanne, 2015-07-24 The rise of women in the workforce has led to many campaigns for wage equality and the impartial treatment of both sexes as they pursue careers previously designated as either a man's or a woman's job The impact of these campaigns has been felt but a sense of gender stereotyping still affects not only the social and cultural well being of the modern organization but the drive for innovation and economic success as well Contemporary Global Perspectives on Gender Economics challenges current economic theory targeting the way gender is often used for economic gain or increased market share Experts realize that company growth can no longer be achieved by taking a conventional approach but few follow through with introducing new frameworks that change the way diversity is treated By acknowledging that issues like childcare and the wage gap are not only a woman's challenge this book speaks to legislators and policymakers economic developers corporate practitioners educational faculties and students of all disciplines who are looking to change the way gender is viewed in the workforce This essential reference source features chapters that combine the concepts of gender theory sociology and economics and cover topics including economic equality gender bias the history of gender economics industrial creativity and the impact of social connectedness on life satisfaction Cross-Cultural Approaches to Leadership Development C. Brooklyn Derr, Sylvie Roussillon, Frank Bournois, 2002-05-30 Leadership development is critical to organizational competitive advantage The key to successful leadership development programs lies in understanding the complex and always shifting interplay of national culture organizational culture program dynamics and individual differences Editors Derr Roussillon and Bournois explain the interrelationships among these influences demonstrating how national culture may play a greater role in leadership development programs in some countries than in other countries Contributors present varying viewpoints from the United States France the United Kingdom Japan the Netherlands Poland Germany Italy China Vietnam Israel Africa and Latin America Perspectives on leadership management in changing organizations on fast track executives and on the perspective of a clinical psychologist are included In addition the editors have included a discussion of the diversity collaboration model a highly useful tool for modulating the pendulum swings between the two extremes In this context diversity in the extreme is exemplified by a fluid mobile global labor force in which the risks include lack of unifying goals lack of loyalty to the firm and

lack of effective action The converse collaboration in the extreme is characterized by so much internal socialization integration and homogeneity that creativity is squelched and innovation is stifled Preparing future leaders effectively entails straddling the middle by integrating highly acculturated loyal dedicated insiders with free agents culled from the global talent pool The various chapters on leadership development as practiced in both developed and developing countries provide valuable insight into the utility of the diversity collaboration model Human resource managers leadership development consultants and organizational behavior consultants as well as their academic colleagues will find this work tremendously useful
