Faster Than Light Superluminal Loopholes In Physics:

Faster Than Light Nick Herbert, 1989-11-30 Even though most physicists believe that the speed of light is as fast as anyone can go Einstein's theory of special relativity does not rule out faster than light FTL travel On the contrary it seems to indicate that certain superluminal or FTL effects would permit us to re experience the past time travel would become a reality not science fiction Through this crack in the cosmic egg steps Herbert a Stanford physicist and author of *Quantum Reality* who summarizes clearly current speculation and theory about faster than light travel Along with space warps black holes and tachyons hypothetical FTL particles he looks at the so called quantum connection an alleged force said to instantaneously link any two subatomic particles long after they have bumped into each other Free of the woolgathering that tints much writing on the new physics this brave exciting book should send scientists back to their drawing boards for the nonspecialist reader it reveals a world much stranger than *Star Trek* Publishers Weekly Original challenging and audacious San Diego Magazine

H. Spence,2020 This book tells the story of one of man s greatest intellectual adventures how it came to be understood that light travels at a finite speed so that when we look up at the stars we are looking back in time From the ancient Greeks measuring the distance to the sun to today s satellite navigation the book offers a gripping historical journey **The Mathematical Theory of Information** Jan Kåhre,2012-12-06 The general concept of information is here for the first time defined mathematically by adding one single axiom to the probability theory This Mathematical Theory of Information is explored in fourteen chapters 1 Information can be measured in different units in anything from bits to dollars We will here argue that any measure is acceptable if it does not violate the Law of Diminishing Information This law is supported by two independent arguments one derived from the Bar Hillel ideal receiver the other is based on Shannon s noisy channel The entropy in the classical information theory is one of the measures conforming to the Law of Diminishing Information but it has however properties such as being symmetric which makes it unsuitable for some applications The measure reliability is found to be a universal information measure 2 For discrete and finite signals the Law of Diminishing Information is defined mathematically using probability theory and matrix algebra 3 The Law of Diminishing Information is used as an axiom to derive essential properties of information Byron s law there is more information in a lie than in gibberish Preservation no information is lost in a reversible channel Etc The Mathematical Theory of Information supports colligation i e the property to bind facts together making two plus two greater than four Colligation is a must when the information carries knowledge or is a base for decisions In such cases reliability is always a useful information measure Entropy does not allow colligation *The Church of Jesus Christ of Latter-day Saints And Science* Joseph Mark Holmes,2023-08-15 No About the Book information at this time
