Emotion-Centered Problem-Solving Therapy Arthur M. Nezu, Christine Maguth Nezu, 2018-12-14. Written by the developers of the popular Problem Solving Approach (PST), this evidence-based manual reflects important advances in neuroscience that underscore the important role of emotion as a crucial aspect of behavioral health treatment. This updated treatment model, Emotion-Centered Problem Solving Therapy (EC-PST), moves emotion to a critical position that is integrated throughout its therapeutic strategies. This is a significant shift in interventions that had previously focused on cognitive approaches. Comprehensive and detailed, this manual provides specific treatment guidelines based on a stepped-care model of PST through four major toolkits: clinical examples and case studies for the application of EC-PST; It describes approaches that can be used for a wide variety of populations, including such targeted groups as U.S. Veterans and active military personnel; settings and client issues. It addresses such new implementation systems as telehealth and community collaborative care models. In addition, the authors provide empirically based evidence of the treatment's efficacy, underlying positive functioning factors such as hope, well-being, enhanced leadership, and more. The print version of the book includes free searchable digital access to the entire contents. Therapy client workbook available as an added resource with book purchase. Key Features: Provides evidence-based update of popular treatment modality. Authored by the co-developers of PST and EC-PST. Includes clinical examples, treatment aids, and case studies for treatment with a variety of populations. When Teams Work Best

Frank M. J. LaFasto, Carl Larson, 2001-08-21. What makes some teams achieve extraordinary outcomes while others fall disappointingly short of the mark? Frank LaFasto and Carl Larson have systematically explored that question for more than 20 years. In 1989, they published the best-selling book *TeamWork: What Must Go Right, What Can Go Wrong*, which reported the results of an in-depth study of some of the most successful teams in recent history and identified the eight characteristics of high-performance teams. *When Teams Work Best* advances this groundbreaking research by probing more deeply inside the workings of hundreds of teams, some effective and some faltering. For over a decade, the authors collected and analyzed

Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28

Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained
