Teaching Business Ethics for Effective Learning Ronald R. Sims, 2002-05-30 The key to teaching business ethics successfully says Sims is to start with clear goals and a sensible expectation of outcomes and with a true knowledge and appreciation of how people actually learn Seems obvious enough he says but the surprise is that so few understand this Thus the teaching of business ethics is often an unproductive frustrating exercise in futility Sims hopes to change that Proceeding with the conviction that open communications between teacher and student before during and after the teaching experience is vital Sims identifies key teaching processes gives practical advice on designing and planning the curriculum and offers guidance on how to develop a climate conducive to effective learning He highlights the importance of creating a classroom climate that encourages open dialogue good moral conversation and conversational learning And throughout he emphasizes that learning styles and experiential learning theory are cornerstones of teaching business ethics thus taking an approach unlike any in the literature An important guide for those who are new to teaching this essential subject Sims book will also be helpful for more experienced teachers who are wondering why their own methods do not always work or do not work as well as they believe they should Sims identifies important processes that must be managed if business ethics is to be taught and learned successfully processes such as creating stakeholder commitment to the goals purposes and outcomes of the teaching effort and curriculum design and planning that are attuned to individual differences in learning styles motivation and values Also included in Sims processes are the development of individual school outcomes and expectations and the assessment procedures that can measure them He discusses the importance of incorporating debriefing into an experiential learning exercise or discussion and goes on to give an in depth discussion of the pedagogical

approaches that allow teachers to teach the practical and theoretical components of the subject simultaneously Well illustrated with examples such as an interdisciplinary approach to teaching and a way to institutionalize outcomes assessment by means of total quality management Sims book returns constantly to his major theme that to teach business ethics effectively the teacher must first create a climate of trust and sharing within and between students and between students and teacher and that the teacher must have a concrete way to measure the impact of the teaching effort s results

Handbook of Research on Teaching Ethics in Business and Management Education Wankel, Charles, Stachowicz-Stanusch, Agata, 2011-12-31 This book is an examination of the inattention of business schools to moral education addressing lessons learned from the most recent business corruption scandals and financial crises and also questioning what we re teaching now and what should be considering in educating future business leaders to cope with the challenges of leading with integrity in the global environment Provided by publisher **A Handbook for Teaching and Learning in Higher Education** Heather Fry, Steve Ketteridge, Stephanie Marshall, 2003-12-16 The Handbook is sensitive to the competing demands of teaching research and scholarship and academic management Against the contexts the book focuses on developing professional academic skills for teaching Dealing with the rapid expansion of the use of technology in higher education and widening student diversity the fully updated and expanded edition includes new material on for example e learning lecturing to large groups formative and summative assessment and supervising research students

The Palgrave Handbook of Learning and Teaching International Business and Management Maria Alejandra Gonzalez-Perez, Karen Lynden, Vas Taras, 2019-09-05 This handbook which serves as a follow up text to The Palgrave Handbook of Experiential Learning In International Business reviews theoretical and empirical approaches of experiential learning pedagogy and its role in increasing the effectiveness in teaching and learning of international business and also in the incorporation of international business related concepts and competences in business and non business programs This edition offers a broader and updated perspective on experiential learning pedagogy for international business and management and beyond The first part provides an updated overview of the theories of experiential learning and effectiveness of teaching and learning in international business through the use of experiential learning projects Part two provides a collection of specific applications of experiential learning in International Business and related fields This handbook is a one stop source for international managers business educators and trainers seeking to either select and use an existing experiential learning project or develop new projects and exercises of this kind **Learning, Teaching and Social Justice in Higher Education** Noah Riseman, Sue Rechter, Ellen Warne, 2010 This book brings together a wide range of higher education practitioners from across disciplines Their chapters suggest innovative approaches to learning teaching and delivering a tertiary education experience that centres social justice as a core mission of universities The authors address the ways in which universities grapple with the challenges involved in the selection processes administration teaching and

learning and student support associated with an increasingly large student population drawn from a broad range of socioeconomic and cultural backgrounds including many students who will be returning to live overseas. Some of the specific challenges of these developments have included those of selection, academic literacy, independent learning, student support and student engagement. A second dimension is the traditional role of the universities as sources of independent intellectual and ethical critique of social institutions both in terms of research and public intellectual contribution to political and social policy debates and in terms of the formation of students in their capacities as critical ethical citizens and professionals. This social ethical critique has traditionally been built into the humanities and the social science disciplines and the helping professions but has now found its way into other disciplines and professional areas such as business and engineering. As well as broader social policy and political discourse has more explicitly embraced social ethical agendas of inclusiveness and marginalisation of social groups, recognition of the damage to the overall society of enduring and increasing social inequality.
