Roberts,1997 This study presents the movement from an oral to a literate culture in the West Indies with the English language as central to this movement The period examined from the start of the first English settlement in the islands up to the time of Emancipation was the period which established the foundations of West Indian society The study relates the movement towards a literate culture to the development of methods of communication in the plantation slave society to general literary and intellectual development and to the expansion of formal education Literacy in English is regarded as a barometer of social development because the English language was sustained internally and externally as the language of those who ruled and contrary to fundamental notions associated with the power of literacy it maintained privilege within certain sectors of the society There is no other study which provides the interdisciplinary approach of this work in accounting for the development of literate culture in the West Indies **Yotvata** Lily Singer-Avitz,Etan Ayalon,2023-01-03 This book presents the final report of the excavations at Yotvata the largest oasis in the Arabah Valley conducted by the Sonia and Marco Nadler Institute of Archaeology of Tel Aviv University in 1974 1980 under the direction of Dr Ze'ev Meshel The report covers two central sites a fortified Iron I site and an Early Islamic settlement The Iron I remains consist of an irregular casemate wall surrounding a courtyard The location of this site suggests that the settlement was established in order to protect the water sources and to overlook and supervise the nearby crossroads Based on the relative proximity of the site to Timna it may be concluded that the oasis formed the main source of water and wood for the population involved in copper production in that region The rich finds uncovered at the Early Islamic settlement including a large courtyard building and a nearby bathhouse among other structures point to habitation from the end of the seventh to the early ninth century CE The proximity of the settlement to a sophisticated irrigation system qanat and the administrative economic ostraca discovered at the site suggest that it served as the center of

an agricultural estate owned by an elite Muslim family Among the unique finds is a large assemblage of locally produced handmade pottery which is thoroughly studied here The findings from the excavations at the Yotvata oasis have made a major contribution to the study of Early Islamic settlement and material culture in the greater Arabah region and beyond

How Things Shape the Mind Lambros Malafouris, 2016-02-12 An account of the different ways in which things have become cognitive extensions of the human body from prehistory to the present An increasingly influential school of thought in cognitive science views the mind as embodied extended and distributed rather than brain bound or all in the head This shift in perspective raises important questions about the relationship between cognition and material culture posing major challenges for philosophy cognitive science archaeology and anthropology In *How Things Shape the Mind* Lambros Malafouris proposes a cross disciplinary analytical framework for investigating the ways in which things have become cognitive extensions of the human body Using a variety of examples and case studies he considers how those ways might have changed from earliest prehistory to the present Malafouris's Material Engagement Theory definitively adds materiality the world of things artifacts and material signs into the cognitive equation His account not only questions conventional intuitions about the boundaries and location of the human mind but also suggests that we rethink classical archaeological assumptions about human cognitive evolution

Handbook to Life in Prehistoric Europe Jane McIntosh, 2009-06-01 For most of Europe's long past we have no writing no named individuals no recorded deeds This means that its history is almost entirely that of the ordinary individual the hunter gatherer farmer or metallurgist rather than the king Evidence of privileged elites and material splendor is not lacking however The skills and expertise of prehistoric Europeans were often employed in the production of exquisite jewelry elaborately woven cloth beautifully made tools and finely wrought weapons Though the palaces that have attracted excavators in other lands are absent there are few monuments elsewhere in the world to rival Europe's massive megalithic tombs or great stone circles And though individuals preserve their anonymity and many of their secrets modern technology has made it possible to reveal parts of their life history in astonishing detail *Handbook to Life in Prehistoric Europe* gathers the results of recent archaeological discoveries and scholarly research into a single accessible volume Organized thematically the handbook covers all aspects of life in prehistoric Europe including the geography of the continent settlement trade and transport industry and crafts religion death and burial warfare language the arts and more Complemented with more than 75 illustrations and maps the result is a fascinating introduction to the 7 000 year period that immediately preceded the Roman Empire

Evolution and the Mechanisms of Decision Making Peter Hammerstein, Jeffrey R. Stevens, 2024-03-19 A multidisciplinary examination of cognitive mechanisms shaped over evolutionary time through natural selection that govern decision making How do we make decisions Conventional decision theory tells us only which behavioral choices we ought to make if we follow certain axioms In real life however our choices are governed by cognitive mechanisms shaped over evolutionary time through the process of natural selection Evolution has created strong biases in

how and when we process information and it is these evolved cognitive building blocks from signal detection and memory to individual and social learning that provide the foundation for our choices. An evolutionary perspective thus sheds necessary light on the nature of how we and other animals make decisions. This volume with contributors from a broad range of disciplines including evolutionary biology, psychology, economics, anthropology, neuroscience, and computer science offers a multidisciplinary examination of what evolution can tell us about our and other animals' mechanisms of decision making. Human children, for example, differ from chimpanzees in their tendency to over-imitate others and copy obviously useless actions; this divergence from our primate relatives sets up imitation as one of the important mechanisms underlying human decision making. The volume also considers why and when decision mechanisms are robust, why they vary across individuals and situations, and how social life affects our decisions.

Essouk - Tadmekka, 2017-11-20. Essouk Tadmekka presents the first archaeological exploration of one of the most important market towns on the trans-Saharan camel caravan routes in the early Islamic period, supplying West African gold, slaves, and ivory to the Mediterranean world. Excavation of Essouk Tadmekka's ruins in Saharan West Africa has enabled Sam Nixon and a team of scholars to better understand this town described by early Arabic geographers, therein providing insights into such wider questions as the origins of trans-Saharan trade, the commerce in gold, and the arrival of Islamic culture in West Africa. This window into the earliest period of trans-Saharan exchange includes illustration of some of the best preserved ruins along the camel caravan routes, the earliest known Arabic writing in West Africa, and rare gold-working remains. Contributors are Stephanie Black, Sophie Desrosiers, Laure Dussubieux, Thomas Fenn, Dorian Fuller, James Lankton, Kevin MacDonald, Paulo de Moraes Farias, Mary Anne Murray, Sam Nixon, Thilo Rehren, Peter Robertshaw, Jane Sidell, and Benoit Suzanne.

The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers, Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24. For more than a century, the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate. The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers provides a comprehensive review of hunter-gatherer studies to date, including critical engagements with older debates, new theoretical perspectives, and renewed obligations for greater engagement between researchers and indigenous communities. Chapters provide in-depth archaeological, historical, and anthropological case studies and examine far-reaching questions about human social relations, attitudes to technology, ecology, and management of resources and the environment, as well as issues of diet, health, and gender relations—all central topics in hunter-gatherer research but also themes that have great relevance for modern global society and its future challenges. The Handbook also provides a strategic vision for how the integration of new methods, approaches, and study regions can ensure that future research into the archaeology and anthropology of hunter-gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity.
