Egyptian Miracle An Introduction To The Wisdom Of The Temple:

The Egyptian Miracle R. A. Schwaller de Lubicz, 1985-11-01 The discoveries of R A Schwaller de Lubicz are proof that the temple is the true embodiment of the ancient Egyptian wisdom Presented here in the more accessible language of oral tradition The Egyptian Miracle is an indispensable guide to the superhuman science expressed by the architecture the texts and the proportions of the temple

Rebel in the Soul Bika Reed, 1997-04 This controversial text speaks to us with intriguing relevance to the problems of today Taking the form of a dialogue between a man and his soul this sacred text explores the inner discourse between doubt and mystical knowledge and deals with the rebellion and despair of the intellect at a crucial stage of spiritual development

The Spiritual Technology of Ancient Egypt Edward F. Malkowski, 2007-10-03 How ancient Egyptians understood quantum theory Investigates the history of how modern religion and the Age of Science were inspired by the sacred science of the ancients Examines how quantum theory explains that the cosmos arises from consciousness Reveals the unanimity between Schwaller de Lubicz's sacred science and the science of a cosmos governed by quantum mechanics Since the dawn of the Age of Science humankind has been engaged in a methodical quest to understand the cosmos With the development of quantum mechanics the notion that everything is solid matter is being replaced with the idea that information or thought may be the true source of physical reality Such scientific inquiry has led to a growing interest in the brain's unique and mysterious ability to create perception possibly through quantum interactions Consciousness is now being considered as much a fundamental part of reality as the three dimensions we are so familiar with Although this direction in scientific thought is seen as a new approach the secret wisdom of the ancients presented just such a view thousands of years ago Building on Ren A Schwaller de Lubicz's systematic study of Luxor's Temple of Amun Mut Khonsu during the 1940s and 50s Edward Malkowski shows that the ancient Egyptians worldview was not based on superstition or the invention of myth but was the result of direct observation using critical faculties attuned to the quantum manifestation of the universe This understanding of reality as a product of human consciousness provided the inspiration for the sacred science of the ancients precisely the philosophy modern science is embracing today In the philosophical tradition of Schwaller de Lubicz *The Spiritual Technology of Ancient Egypt* investigates the technical and religious legacy of ancient Egypt to reveal its congruence with today's New Science

The Stargate Conspiracy Lynn Picknett, 2001-09-01 In recent years alternative historians have gained remarkable insight into the mysteries of ancient Egypt but according to Lynn Picknett and Clive Prince their discoveries tie into a dangerous conspiracy nearly fifty years in the making At the center of this conspiracy is a group of respected powerful individuals who believe that the ancient Egyptian gods are really extraterrestrials who will soon return to earth The conspirators have intimate and exclusive knowledge of this momentous second coming but they insist on keeping it to themselves What could be the purpose of such a conspiracy Why are the conspirators so desperate to keep their information a secret And what does it mean for mankind In this riveting well

researched book Picknett and Price offer compelling evidence that the conspiracy exists and expose the insidious motivations of the individuals and organizations behind it **In Search of the Cradle of Civilization** Georg Feuerstein, Subhash Kak, David Frawley, 2005-01-01 The book shows that the ancient Indians were no primitives but possessed a high spiritual culture which not only influenced the evolution of the Western world in decisive ways but which still has much to teach us today India's archaic spirituality is codified in the rich symbols metaphors and myths of the magnificent Rig Veda which is shown to be much older than has been widely assumed by scholars The present book also unravels the astonishing mathematical and astronomical code hidden in the Vedic hymns Anyone interested in ancient cultural history India archaeo astronomy or spirituality will find this well researched and cross cultural work spellbinding and enriching **A General Theory of Entropy** Kofi Kissi Dompere, 2019-08-02 This book presents an epistemic framework for dealing with information knowledge and certainty uncertainty problems within the space of quality quantity dualities It bridges between theoretical concepts of entropy and entropy measurements proposing the concept and measurement of fuzzy stochastic entropy that is applicable to all areas of knowing under human cognitive limitations over the epistemological space The book builds on two previous monographs by the same author concerning theories of info statics and info dynamics to deal with identification and transformation problems respectively The theoretical framework is developed by using the toolboxes such as those of the principle of opposites systems of actual potential polarities and negative positive dualities under different cost benefit time structures The category theory and the fuzzy paradigm of thought under methodological constructionism reductionism duality are used in the fuzzy stochastic and cost benefit spaces to point to directions of global application in knowing knowledge and decision choice actions Thus the book is concerned with a general theory of entropy showing how the fuzzy paradigm of thought is developed to deal with the problems of qualitative quantitative uncertainties over the fuzzy stochastic space which will be applicable to conditions of soft hard data fact evidence and knowledge over the spaces of problem solution dualities decision choice actions in sciences non sciences engineering and planning sciences to abstract acceptable information knowledge elements *Pyramid Quest* Robert M. Schoch, Robert Aquinas McNally, 2005-06-02 The Egyptologist acclaimed for re dating the Great Sphinx at Giza sets his sights on one of the true mysteries of antiquity the Great Pyramid of Giza What is the Great Pyramid of Giza Ask that basic question of a traditional Egyptologist and you get the basic traditional answer a fancy tombstone for a self important pharaoh of the Old Kingdom This Egyptologists argue is the sole finding based on the data and the only deduction supported by science By implication anyone who dissents from this point of view is unscientific and woolly minded a believer in magic and ghosts Indeed some of the unconventional ideas about the Great Pyramid do have a spectacularly fabulous ring to them Yet from beneath the obvious terms of this controversy a deeper more significant question arises how is it that the Great Pyramid exercises such a gripping hold on the human psyche adding cryptic grace to the back of the one dollar bill and framing myriad claims of New Age pyramid power In *Pyramid Quest*

Robert M Schoch and Robert Aquinas McNally use the rigorous intellectual analysis of scientific inquiry to investigate what we know about the Great Pyramid and develop a stunning hypothesis This ancient monument is the strongest proof yet that civilization began thousands of years earlier than is generally thought extending far back into a little known time In tracing that story we come to understand not only the Great Pyramid but also our own origins as civilized beings **Initiation into Dream Mysteries** Sarah Janes,2022-12-27 A psychomagic journey to awaken lucid dream consciousness Presents effective exercises and techniques inspired by ancient texts to deepen your personal awareness of the dream state and experiment with dreams for healing and divinatory purposes Each initiatory chapter includes a psychodramatic narrative designed to generate the perfect dream for each stage in the initiation Explains how dreaming has influenced cultural religious and spiritual thinking Includes access to a seven part hypnagogic guided journey recording Invoking Mnemosyne Greek goddess of memory and eloquence daughter of Heaven and Earth mother of the Muses and archetypal deity of the Asklepios dream temple tradition this book initiates you into full dream consciousness offering a lucid dreaming ritual experience in the spirit of the Mystery Schools of antiquity Sharing her more than a decade of research on Sleep Temples and Mystery Schools of the Esoteric Tradition lucid dreaming instructor Sarah Janes explores the evolution of imagination memory and consciousness throughout the ages and proposes that dreams have been fundamental in the creation and development of culture Dreams play an important role in ancestor worship afterlife beliefs animism religion and wisdom traditions Explaining how a conscious dream life is essential for self discovery deep integration and healing Sarah presents exercises techniques initiations and seven guided audio meditations to help you explore the inner depths of your psyche Sarah reveals how dreams offer us an opportunity to remember and directly experience our divinity to transcend the limitations of our mortality and enter timeless imaginal realms These realms accessible through dreams can help you to form a better understanding of who you are Employing the power of story to affect the mind and lay down new neural pathways as if one were really living the story Sarah connects each initiatory chapter with a psychodramatic narrative as well as a guided audio meditation Using symbolism and powerful imagery these stories combined with her meditations help you generate the perfect dreams for each stage in the initiation And by becoming a better dreamer you can make better more aware decisions in your waking life

The Theory of Problem-Solution Dualities and Polarities Kofi Kissi Dompere,2022-04-25 This book is concerned with the development of the understanding of the relational structures of information knowledge decision choice processes of problems and solutions in the theory and practice regarding diversity and unity principles of knowing science non science and information knowledge systems through dualistic polar conditions of variety existence and nonexistence It is a continuation of the sequence of my epistemic works on the theories on fuzzy rationality info statics info dynamics entropy and their relational connectivity to information language knowing knowledge cognitive practices relative to variety identification problem solution dualities variety transformation problem solution dualities and variety certainty uncertainty principle in all

areas of knowing and human actions regarding general social transformations It is also an economic theoretic approach in understanding the diversity and unity of knowing and science through neuro decision choice actions over the space of problem solution dualities and polarities The problem solution dualities are argued to connect all areas of knowing including science and non science social science and non social science into unity with diversities under neuro decision choice actions to support human existence and nonexistence over the space of static dynamic dualities The concepts of diversity and unity are defined and explicated to connect to the tactics and strategies of decision choice actions over the space of problem solution dualities The concepts of problem and solution are defined and explicated not in the space of absoluteness but rather in the space of relativity based on real cost benefit conditions which are shown to be connected to the general parent offspring infinite process where every solution generates new problem s which then generates a search for new solutions within the space of minimum maximum dualities in the decision choice space under the principle of non satiation over the space of preference non preference dualities with analytical tools drawn from the fuzzy paradigm of thought which connects the conditions of the principle of opposites to the conditions of neuro decision choice actions in the zone of variety identifications and transformations The Monograph would be useful to all areas of Research Learning and Teaching at Advanced Stages of Knowing and Knowledge Production

Genesis of the Cosmos Paul A. LaViolette, 2004-04-15 Provides compelling evidence that creation myths from the dawn of civilization correspond to cutting edge astronomical discoveries Exposes the contradictions in current cosmological theory and offers a scientific basis for the ancient myths and esoteric lore that encode a theory of continuous creation By the scientist who was the first to disprove the Big Bang theory on the basis of observational data Recent developments in theoretical physics including systems theory and chaos theory are challenging long held mechanistic views of the universe Many thinkers have speculated that the remnants of an ancient science survive today in mythology and esoteric lore but until now the scientific basis for this belief has remained cloaked in mystery Paul LaViolette reveals the remarkable parallels between the cutting edge of scientific thought and creation myths from the dawn of civilization With a scientific sophistication rare among mythologists LaViolette deciphers the forgotten cosmology of ancient lore in a groundbreaking scientific tour de force In direct nontechnical language he shows how these myths encode a theory of cosmology in which matter is continually growing from seeds of order that emerge spontaneously from the surrounding subquantum chaos Exposing the contradictions that bedevil the big bang theory LaViolette offers both the specialist and the general reader a controversial and highly stimulating critique of prevailing misconceptions about the seldom questioned superiority of modern science over ancient cosmology By restoring and reanimating this ancient scientific worldview *Genesis of the Cosmos* leads us beyond the restrictive metaphors of modern science and into a new science for the 21st century

Awakening Higher Consciousness Lloyd M. Dickie, Paul R. Boudreau, 2015-04-23 Explains the relevance of ancient myths to the awakening to higher states of consciousness and enlivened experience of the world Shows how higher

consciousness can arise within each of us by following the guidance found in ancient myths Reveals how myths influence our personal development without our awareness through their influence on our core values and culture Examines ancient Sumerian Egyptian Babylonian and Hebrew myths such as the Epic of Gilgamesh and the story of Osiris and Isis In this study of ancient Sumerian Egyptian Babylonian and Hebrew myths authors Lloyd M Dickie and Paul R Boudreau show that many classic myths contain instructions for awakening higher consciousness allowing access to enlivened experience of the world and awareness of the divine within and around us Inspired by the work of R A Schwaller de Lubicz the authors deeply examine creation myths and well known ancient myths from Mesopotamia and Egypt such as the Epic of Gilgamesh and the story of Osiris and Isis They reveal that these myths are not behavioral morality tales but actual delineations of how a higher order can arise within each of us The authors explain how these stories teach us to distinguish the heaven within from the earth within us to find the essential part of our being that provides a link with our higher powers Spending more than a year onsite in Egypt to personally connect with the myths the authors explain how ancient storytellers intentionally chose myths as a vehicle for teachings because story has a seed like capacity to implant itself in the unconscious and influence development without the individual being aware of it By crafting these sacred narratives the ancient Sumerians and Egyptians provide tools to awaken to the presence of higher consciousness as well as a road map for the individual to come into conscious alignment with the perpetual unfolding of the universe

Theory of Philosophical Consciencism Dompere, Kofi Kissi, 2017-09-24 In the Theory of Philosophical Consciencism Professor Dompere establishes how Nkrumah used the theory of categorical conversion housing the necessary conditions of transformation to design strategies for creating the sufficient conditions for socio political transformations The theory of Philosophical Consciencism is about the institutionally destruction creation process for socio political transformation The theory shows the scientific contributions of Nkrumah s thinking to the solution of the transformation problem in science and its application to social systemicity where Nkrumah s analytical weapons were drawn from African conceptual system The theory is developed as logico mathematical foundations that guide the internal management of the command control decision choice systems for creative destruction of socio political varieties in transformations through the development of qualitative mathematics making possible the construct of qualitative equations of motion for connecting varieties in qualitative transfers The qualitative equations of motion through the Philosophical Consciencism constitute the sufficient conditions for transformations The theory links rationality intentionality experiential information structure defective deceptive information structures in the control dynamic games of power and dominance by the duals and poles under the principle of opposites with relational continua and unity relative to decision choice systems that induce negation negation transformations where paths are established by the history of success failure outcomes in the socially control dynamic zero sum games between the duals in any duality and between the poles of any actual potential polarity The main premise of the monograph is that there exists a set of sufficient conditions in support

of the necessary conditions for internal transformation of socio natural varieties The theory is useful in understanding developmental processes and multi polar power zero sum games for global dominance The necessary conditions constitute the natural necessity that constrains cognitive freedom The sufficient conditions constitute cognitive freedom that must overcome the necessity in socio natural systems dynamics Had this conceptual system been familiar to African leaders the African transformation from colonialism to complete emancipation rather than neocolonialism would have been increasingly successful This holds for those seeking triumph over injustices oppression imperialism and social change in all systems

The Mysteries of the Great Cross of Hendaye Jay Weidner,Vincent Bridges,2003-12-10 Decodes the message held by this enigmatic monument revealing the alchemical secret of time and the fate of humanity The Theory of Epistemic Fields Kofi Kissi Dompere,2024-08-13 The book is about the development of the theory of epistemic fields with the corresponding relational and information fields as a framework for the understanding of strategies and tactics of the theory of knowing as the production of intellectual investment flows and the theory of knowledge accumulation as the production of intellectual capital stocks in systems of factories and departments providing the foundations for the development of open algorithms in the open space of problem solution dualities The concepts and the roles of thinking and reasoning with curiosity creativity hope Ill posed problems phantom problems unsolved problems misinformation disinformation fake news and courage are introduced defined and analyzed on the cognitive journeys over the space of ignorance knowledge dualities where dualistic polar conflicts between duals in the space of ignorance knowledge dualities are resolved with the instruments of fuzzy optimization the results of which are used to induced the zones of ignorance the zones of knowledge and the zones of contentions A complete development of the set of connecting paths of spaces and sub spaces is provided where all varieties categories and spaces reside in dualistic polar structures with knowledge stock viewed as a single tree with the same roots one trunk many branches and a fruit cocktail The ontological space contains the space of actual potential dualities as the primary category of knowing and the epistemological space contains the space of imagination reality dualities as the derived category of knowing within the space of primary derived dualities The space of potentials contains the space of imaginations which contains the sub spaces of possibility impossibility probability improbability and possibility probability dualities with corresponding spaces of necessity freedom and anticipation expectation dualities leading to the conception of the possible world impossible world dualities in the space of semantic non semantic dualities This book is also a continuation of the sequence of my works on the theories of paradigms of thought rationality info statics info dynamics entropy problem solution dualities in self contained mathematics and philosophy and their relational connectivity to information language knowing knowledge cognitive practices and open machine learning relative to nominalism and the space of construction reduction dualities over the spaces of fundamental applied production consumption input output and cost benefit dualities **Ancient Egypt and Modern Psychotherapy** Todd Hayen,2016-12-19 In Ancient Egypt and Modern Psychotherapy Todd Hayen

explores what the spiritual concepts of the enigmatic ancient Egyptians can teach us about our own modern psyches and the pursuit of a meaningful life Hayen examines the ancient Egyptians possession of a concept contemporary academics have labeled consciousness of the heart an innate knowledge of the entirety of the universe While all human beings possess this consciousness of the heart our modern culture has largely lost the ability to tap into this inborn knowledge By examining the material accomplishments of ancient Egypt and how their seemingly deeper awareness of their inner world created a harmonious outer world we can begin to understand how modern psychotherapy through a Jungian perspective could be instrumental in achieving a more profound and meaningful personal experience of life Ancient Egypt and Modern Psychotherapy will be insightful reading for analytical psychologists in practice and in training Jungian psychotherapists and psychologists and academics and students of Jungian and post Jungian studies and ancient spirituality

Sacred Symbols of the Dogon Laird Scranton, 2007-10-12 Dogon cosmology provides a new Rosetta stone for reinterpreting Egyptian hieroglyphs Provides a new understanding of Egyptian hieroglyphs as scientific symbols based on Dogon cosmological drawings Use parallels between Dogon and Egyptian word meanings to identify relationships between Dogon myths and modern science In *The Science of the Dogon* Laird Scranton demonstrated that the cosmological structure described in the myths and drawings of the Dogon runs parallel to modern science atomic theory quantum theory and string theory their drawings often taking the same form as accurate scientific diagrams that relate to the formation of matter Scranton also pointed to the close resemblance between the keywords and component elements of Dogon cosmology and those of ancient Egypt and the implication that ancient cosmology may also be about actual science *Sacred Symbols of the Dogon* uses these parallels as the starting point for a new interpretation of the Egyptian hieroglyphic language By substituting Dogon cosmological drawings for equivalent glyph shapes in Egyptian words a new way of reading and interpreting the Egyptian hieroglyphs emerges Scranton shows how each hieroglyph constitutes an entire concept and that their meanings are scientific in nature Using the Dogon symbols as a Rosetta stone he reveals references within the ancient Egyptian language that define the full range of scientific components of matter from massless waves to the completed atom even suggesting direct correlations to a fully realized unified field theory

Embodying Osiris Thom F Cavalli, 2013-08-15 The modern Western movement to embrace Eastern spiritual traditions usually stops with India and the Orient Westerners have yet to discover the wisdom that dates back even further to ancient Egypt With a Jungian perspective clinical psychologist Dr Thom F Cavalli plumbs that wisdom through the myth of Osiris the green skinned Egyptian god of vegetation and the Underworld As no one else has done Cavalli draws on Osiris's death and resurrection as a guide to spiritual transformation The myth represents the joining of the conscious and the unconscious the light and the dark life and death and shows how to live our temporal existence in service to and anticipation of eternal life Cavalli sees the ancient art of alchemy which attempted to turn lead into gold as the key The alchemical recipe solve et coagula solution and coagulation encoded in the myth describes the integration of all parts of a person and the method for achieving an experience of immortality in life and eternal life after death The Osiris myth thus provides a model for the contemporary quest for individuation the Jungian term for integrating ego and self body and soul in the process of becoming whole
