Empowerment Kenneth McLaughlin, 2016-01-08 Empowerment is a term in widespread use today and one that is often considered to be a self evident good Here McLaughlin explores its emergence in the 1960s through to its rise in the 1990s and ubiquity in present day discourse and interrogates its social status paying particular attention to social policy social work and health and social care discourse He argues that a focus on empowerment has superseded the notion of political subjects exercising power autonomously This innovative volume Discusses the relationship between concepts of empowerment and power as they have been understood historically Analyses changes in the conception and meaning of empowerment in relation to the shifting social and political landscape Acknowledges the positive impact empowerment strategies have had on those who have campaigned to be empowered and also on those who have saw their role as being to help empower others Highlights ways in which talk about empowerment can actually work in such a way as to further disempower those already marginalised Critically examining how empowerment has become embedded in contemporary social and political life this work offers a discussion of the term s multiple meanings what it actually entails and how it constructs and positions those being empowered and those empowering

Gender And The Professional Predicament In Nursing Davies, Celia, 1995-02-01 Gender and the

Professional Predicament in Nursing examines the ways in which our understanding of nursing is gendered and how our notion of nursing is connected to our idea of what it is to be a woman. It explores the implications this connection has for the status of nursing as a profession and re-examines some of the fundamental questions that the nursing profession has tried to address such as what is nursing care, who should do it, why is it so difficult to manage the provision of nursing care. Gender and the Professional Predicament in Nursing demonstrates that once nurses try to define and shape the nature of their work they are marginalized or silenced. Frequent descriptions of them as sentimental, divided or incompetent highlight the need to understand nurses' exclusion from policy debates and why their voices are so seldom heard. Celia Davies contends that in a society divided by gender, defining nursing as women's work is deeply contradictory. We value nurses but devalue nursing. She suggests that alongside the debates about managerial efficiency in the NHS we need another kind of debate about how we organize health and social care, about what we mean by professionalism and about the worth of caring work. This book is important reading for students of women's studies, nursing, allied professions in health and medicine, policy makers and human resource managers.

A Textbook of Social Work Brian Sheldon, Geraldine Macdonald, 2010-02-25 Where did professional social work originate from? How effective are social work interpretations in the lives of vulnerable people? *A Textbook of Social Work* provides a comprehensive discussion of social work practice and its evidence base. It strikes a balance between the need for social workers to understand the social, economic, cultural, psychological and interpersonal factors which give rise to clients' problems and the need for them to know how best to respond with practical measures. Divided into three parts, the text covers the history and of social work as a movement and profession in the first, and social work methods and approaches in the second. The final part looks at the major specialisms including, among others, chapters on Children and families, Youth Offenders and substance misusers, Social work and mental health, Disabled people, Older People. Providing a comprehensive guide to conceptual and methodological issues in social work and containing plentiful case studies and examples, this book is an essential read for social work students as well as a valuable resource for practitioners and academics.

Interprofessional Working in Health and Social Care Judith Thomas, Katherine Pollard, Derek Sellman, 2014-03-19 There will always be a need for professionals to work collaboratively if they are to provide the highest standard of care. Interprofessional working encourages practitioners to understand the roles of other professionals and to learn from each other as well as from service users and carers to ensure the full benefit of this collaboration is realised. It is an essential element of both education and practice for today's professionals. *Interprofessional Working in Health and Social Care* discusses the rationale, skills and conditions required for interprofessional working. In addition, it provides an overview of the roles and perspectives of different health professionals across a broad range of expertise: education, housing, medicine, midwifery, nursing, occupational therapy, physiotherapy, police, probation, radiography, social work and youth work. The second edition offers a broad variety of case studies from a range of fields and settings. Includes a new chapter dedicated to

interprofessional working with service users and carers Looks forward offering brand new content on new and emerging roles such as specialist paramedics and approved mental health practitioners This book is a valuable tool for students and practitioners across the health and social care discipline employing engaging case studies and reflective activities to support learning about interprofessional and interagency collaboration Erratum please note the term Approved Mental Health Practitioner has been used in error instead of Approved Mental Health Professional This will be corrected as soon as possible on the next reprint and the e book version has been corrected *Managing Care in Context* Jeanette Henderson, Dorothy Atkinson, 2003 *Managing Care in Context* looks at the different contexts in which care takes place and considers the impact of policy practice and organisational contexts on managers It explores the complexity and diversity of the management task and the role
