legend the park s history dates back to a time before the Hawaiians first arrived It was a time when gods and goddesses roamed throughout these islands the most famous the fierce goddess of the volcanoes Pele is believed to live here still It took a decade of lobbying efforts to finally preserve this unique area as Volcanoes National Park Since 1916 not only has this area been a national park for all to experience but also the scientific advances due to the ability to constantly monitor the volcanic activity here has had a huge impact on the science of volcanology understanding earthquakes and creating an early warning system for tsunamis
