Health Targets In Europe Polity Progress And Promisepb 2002:

Constructive Conversations About Health Marshall Marinker, Fritjof Capra, 2018-08-15 Current health policy is required to respond to a constantly changing social and political environment characterised particularly in Europe by ageing populations increased migration and growing inequalities in health and services With health systems under increasing strain there is a sense that we need to seek new means of determining health policy Much political debate focuses on managerial issues such as the levels of health funding and the setting and missing of targets Meanwhile our moral imperatives our values and principles go relatively unexamined What are these values Can we agree their validity and salience How do we manage the paradox of competing goods Can we find new ways of talking about and resolving our conflicting values and competing priorities in order to create sound appropriate and just health policies for the 21st Century Written by leading health policy makers and academics from many countries *Constructive Conversations about Health* examines in depth the underlying values and principles of health policy and posits a more enlightened public and political discourse The book will be invaluable for those involved in health policy making and governance politicians healthcare managers researchers ethicists health and social affairs media health rights and patient participation groups The literature on health policy is vast On offer are models of health services economic theory management theory disquisitions on ethical principles social analyses literally thousands of publications In a globalised and electronically networked world this literature has already generated its own particular language a policy jargon replete with terms that look deceptively familiar terms that will be much in evidence in what now follows terms whose meanings require our closest attention Marshall Marinker

The Health for All Policy Framework for the WHO European Region World Health Organization. Regional Office for Europe, 2006-01-10 This book is the third update of the Health for All policy framework for the WHO European Region adopted in September 2005 This concluded two years of work integrating the new knowledge accumulated since the previous update in 1998 and incorporating the results from broad consultations with countries and key partner agencies This 2005 update develops the concept of ethical values based governance It also offers policy makers the potential to put values into practice and action A set of concrete tools is proposed that can be used to check national health policies or national health systems for their respect for certain rights and values The update calls for an open ended Health for All process a forum for exchanging experiences examples and case studies of national Health for All activities that countries themselves choose to carry out In this regard the 2005 update may be used as a tool for promoting the ethical development of national health policies in a way that is pragmatic and useful ensuring the continuous evolution of Health for All in the European Region

Health Targets in Europe Wismar M., 2008-11-21 This book looks at the phenomena that have been termed with some variations health targets It seeks to understand their uses and abuses by drawing on the experiences of a number of European countries in which they have been implemented in various ways It explores the methodological issues involved in setting and monitoring targets and the

political issues that arise when using them **Trends in EU Health Care Systems** Winfried de Gooijer, 2007-03-20 For decades the nations of the European Union wrote the book on universal health coverage Recent economic developments however have created problems ranging from widening inequities of care to growing numbers of uninsured a progression expertly described by Win de Gooijer in Trends in EU Health Care Systems De Gooijer's dual background as an economist and the CEO of Dutch health care corporations together with his broad international experience give him a unique understanding of his subject He traces world economic currents that have affected quality of and access to health care throughout the EU trends that took years to develop but are coming to rapid fruition Comparative illustrations from Europe and the US show national interests at odds with global ones as governments transfer social responsibilities to market driven agencies Included in his discussion Expansion versus reform a forty year analysis of Europe's health care systems Why governments cannot completely control the always evolving dynamics of health care Ethical and medical issues arising from the continent's changing politics Predictions on future directions in EU health care how much change is possible how much is necessary Some may find De Gooijer's ideas startling and the book is bound to be the subject of controversy But it is critical reading for health care managers and policymakers politicians and insurers advanced students of public health in short anyone looking to Europe for the next phase of this far reaching evolution This book is a very important contribution to the debate about the future direction of health policy in Europe It captures the economic and social trends that underpin health systems with a keen and objective eye and poses some very challenging questions about the future It will not be a comfortable read for politicians but it is a book that must be read Brian Edwards President of the European Hospital and Health Care Federation HOPE The concept of subsidiarity is prohibitive to a sound discussion of health care systems on a European level Economic principles dominate the debate and their consequences for health care are hardly understood The author bridges the gap between economic and health care developments and wrote a book that is essential reading for policy makers and health care managers who really care Rob Koning Past President of the European Health Management Association EHMA The future development of European health policy should not be an exclusively political affair Hospital managers should also be actively involved particularly as regards the design and organization of present and future European hospitals For this purpose this book is a useful and well founded manual It not only clarifies the dangers but also points to the challenges and possible alternative policy options Therefore this book should be in the boardroom of each and every European hospital Willy Heuschen Secretary General of the European Association of Hospital Managers EAHM Win de Gooijer brings immense clarity to a complex issue In this book he draws major and new conclusions and raises many challenging questions We hope this book will draw the attention it deserves G rard Vincent President International Hospital Federation EBOOK: Purchasing to Improve Health Systems Performance Josep Figueras, Ray Robinson, Elke Jakubowski, 2005-03-16 Purchasing is championed as key to improving health systems performance However despite the

central role the purchasing function plays in many health system reforms there is very little evidence about its development or its real impact on societal objectives This book addresses this gap and provides A comprehensive account of the theory and practice of purchasing for health services across Europe An up to date analysis of the evidence on different approaches to purchasing Support for policy makers and practitioners as they formulate purchasing strategies so that they can increase effectiveness and improve performance in their own national context An assessment of the intersecting roles of citizens the government and the providers Written by leading health policy analysts this book is essential reading for health policy makers planners and managers as well as researchers and students in the field of health studies Contributors Toni Ashton Philip Berman Michael Borowitz Helmut Brand Reinhard Busse Andrea Donatini Martin Dlouhy Antonio Duran Tam s Evetovits Andr P van den Exter Josep Figueras Nick Freemantle Julian Forder P ter Ga l Chris Ham Brian Hardy Petr Hava David Hunter Danguole Jankauskiene Maris Jesse Ninel Kadyrova Joe Kutzin John Langenbrunner Donald W Light Hans Maarse Nicholas Mays Martin McKee Eva Orosz John vretveit Dominique Polton Alexander S Preker Thomas A Rathwell Sabine Richard Ray Robinson Andrei Rys Constantino Sakellarides Sergey Shishkin Peter C Smith Markus Schneider Francesco Taroni Marcial Velasco Garrido Miriam Wiley Hong Kong's Health System Gabriel M.
