 China Inland Mission revealing the motivations of Victorian Protestant missionaries *The Original Religion of China* John
 Ross, 1909 **The Chinese HEART in a Cognitive Perspective** Ning Yu, 2009-02-26 This book is a cognitive semantic
 study of the Chinese conceptualization of the heart traditionally seen as the central faculty of cognition The Chinese word xin
 which primarily denotes the heart organ covers the meanings of both heart and mind as understood in English which upholds
 a heart head dichotomy In contrast to the Western dualist view Chinese takes on a more holistic view that sees the heart as
 the center of both emotions and thought The contrast characterizes two cultural traditions that have developed different
 conceptualizations of person self and agent of cognition The concept of heart lies at the core of Chinese thought and
 medicine and its importance to Chinese culture is extensively manifested in the Chinese language Diachronically this book
 traces the roots of its conception in ancient Chinese philosophy and traditional Chinese medicine Along the synchronic
 dimension it not only makes a systematic analysis of conventionalized expressions that reflect the underlying cultural models
 and conceptualizations as well as underlying conceptual metaphors and metonymies but also attempts a textual analysis of an
 essay and a number of poems for their metaphoric and metonymic images and imports contributing to the cultural models
 and conceptualizations It also takes up a comparative perspective that sheds light on similarities and differences between
 Western and Chinese cultures in the understanding of the heart brain body mind self and person The book contributes to the
 understanding of the embodied nature of human cognition situated in its cultural context and the relationship between
 language culture and cognition **Primary Care in the Twenty-First Century** Geoff Meads, 2018-10-08 Quality is at the
 heart of the government's strategy for NHS development and which is to be delivered through clinical governance This book
 explores accreditation through practical case studies and research findings and outlines how it can assure the quality of care
 Systems of accreditation for measuring and improving quality are described and show how they can be used easily and
 effectively to meet the challenges of the new NHS It is clear concise and relevant to all the current changes in healthcare
 provision All those responsible for delivering a service based on clinical and cost effectiveness will find it essential reading In
 the United Kingdom primary health care is based almost wholly on general practice From April 1999 all general practices
 will belong to primary care groups Questions of quality and accountability will be high on their agenda as part of the new
 arrangements for clinical governance This book on accreditation in primary care is therefore most timely Sir Donald Irvine
