Johnson, 2023-04-14. In 1978 the world's first test tube baby was born from in vitro fertilization (IVF) effectively ushering in a paradigm shift for infertility treatment that relied on partially disembodied human reproduction. Beyond IVF the ability to

extract fertilize and store reproductive cells outside of the human body has created new opportunities for family building but also prompted new conflicts about rights to and control over reproductive cells In collaborative forms of reproduction that build on IVF technologies such as egg and embryo donation and gestational surrogacy multiple women may variously contribute to conception gestation birth and the legal and social responsibilities for rearing a child creating intentionally fragmented maternities Undoing Motherhood examines the implications of such fragmented maternities in the post IVF reproductive era for generating maternity uncertainty an increasing cultural ambiguity about what does and should constitute maternity Undoing Motherhood explores this uncertainty in the social worlds of reproductive medicine and law

He's the single father of an infant. She's the nanny. It started out strictly professional but then things changed. Rowan Brody is known for being a player with women. That's how he ended up caring for a newborn after an ex had his baby and signed over her parental rights. The fact that he's a pediatrician doesn't make it any easier to cope with the sudden massive responsibility of having his daughter's life in his hands. Aurora Padgett is a seasoned child care professional so she thinks she's got things well in hand when Rowan hires her as his baby's nanny. But her experience hasn't prepared her for how Rowan makes her feel: the speeding pulse, the sweaty palms, and the fervent wish that she weren't just playing at being part of his family.
