Transitions to Sustainable Development John Grin,Jan Rotmans,Johan Schot,2010-05-26

Over the past few decades there has been a growing concern about the social and environmental risks which have come along with the progress achieved through a variety of mutually intertwined modernization processes In recent years these concerns are transformed into a widely shared sense of urgency partly due to events such as the various pandemics threatening livestock and increasing awareness of the risks and realities of climate change and the energy and food crises This sense of urgency includes an awareness that our entire social system is in need of fundamental transformation But like the earlier transition between the 1750 s and 1890 s from a pre modern to a modern industrial society this second transition is also a contested one Sustainable development is only one of many options This book addresses the issue on how to understand the dynamics and governance of the second transition dynamics in order to ensure sustainable development It will be necessary reading for students and scholars with an interest in sustainable development and long term transformative change *A Modern Nordic Saga : Politics, Economy and Society* Ryszard M. Czarny,2016-10-13 This book focuses on the Nordic countries through a European perspective and wishes to draw attention to their place in the new world order The volume emphasizes the specificity of their cooperation within the region itself as well as within the European Union and stresses the importance of the Nordic region as an area of possibilities and tangible chances resulting from the challenges of globalization The social cultural political and economic dimensions of these countries are characterized by cooperation among states their collaboration with other regional organizations and within international projects as well as exchange of viewpoints on the specificity of the current Norden issues The cooperation of the Nordic countries and their inhabitants as well as migrations between the Scandinavian states have been a trademark of the common and shared history of Norden

The British National Bibliography Arthur James Wells,2001 **Economies in Transition** Allan E. Young,Ivan Teodorovi?,Peter Koveos,2002 To date the record of economic transition has decidedly been mixed The worldwide political climate is still in favor of economic reform and the process continues to have considerable momentum On the other hand this process now faces a number of formidable obstacles There appears to be general agreement that in many countries the promise of a better standard of living which economic transition offers to the mass of the citizenry has failed to produce the rapid and dramatic results hoped for There is an increasing conflict of interest between multinational firms and the national business community Moreover many transition economies have experienced a slowing of economic growth in real terms and social services have been severely cut This book deals with the development of those forces that have played a major role in the successes and failures of economic transition Its distinctive feature is that it does this from the perspective of economic

political and social analysis taking into account both theoretical constructs and economic realities for those countries which have attempted the grand experiment with economic transition
