and economists support this view Writing in a crisp plain style Townley demonstrates that public policy considerations are still relevant in that provision He also examines how and where they are currently considered and then suggests why how and where this might be changed The book explains how some of the most complex competition law cases can be understood and offers a framework for those fighting or deciding such cases in the future As such it will be of interest to European competition lawyers both academics and practitioners furnishing them with a framework for hard cases as well as students seeking a deeper understanding of how the European competition rules work and how they interact both with European Union and Member State public policy goals It will also help competition economists by revealing the mechanisms through which public policy considerations impact upon the consumer welfare test in European law

The EU Internal Market in Comparative Perspective Dominik Hanf, 2008 The European Union's internal market is the hard core of integration and by far its most precious asset However a number of deep seated factors have impeded the development of a systematic and wide ranging academic research programme dedicated to the internal market The purpose of this book is to begin to address this predicament with a tri disciplinary analysis of the internal market as scant opportunities for mutual understanding and learning across disciplines law economics and politics currently exist Internal market scholars from all three disciplines collaborated on this project in which each chapter was read and critiqued by a scholar from a different discipline The editors trust that this unique exercise reveals to many readers the enormous potential for in depth and continuous analysis of the internal market and all that it entails It also provides an accessible text for students and scholars from all three disciplines interested in the internal market

Competition Law in times of Economic Crisis : in Need of Adjustment ? Jacques Derenne, Massimo Merola, José Rivas, 2013-12-02 Throughout this unprecedented crisis which is hitting all major economies in the EU the escalation of the Eurozone recession increasingly undermines public confidence in the ability of competitive markets to deliver positive outcomes A debate on the most appropriate way to enforce competition rules in light of the crisis is definitely useful A relaxed stance to competition during difficult periods may be tempting and indeed this has often been the approach used in the past However the enforcement of competition rules is no less important during times of crisis than during normal periods It has also been argued that when public resources are stretched to the limit and businesses are struggling to survive competition authorities should seek to focus their limited resources on those anticompetitive practices which are most detrimental to consumer welfare such as cartels Indeed if over enforcement is perhaps undesirable when the economy is functioning well it will inevitably become more problematic during an economic downturn In addition business managers may be increasingly tempted to resort to anticompetitive practices when faced with economic hardship This book will appeal to judges and lawyers in competition law European law business corporate law and insolvency law the study of European competition law European institutions national competition authorities and companies
