## **Europe's Ambiguous Unity:**

Europe's Ambiguous Unity Alan W. Cafruny, Carl F. Lankowski, 1997 Although the European Union as an entity now enjoys support from across most of the political spectrum this has by no means resulted in the acceptance of a single vision of the EU The apparent success engendered by the Single European Act and the Maastricht Treaty have led instead to both a broadening and a reformulation of opposition

*European Integration and the Postmodern Condition* Peter Van Ham, 2013-02-01 This is the first book to look at the process of European integration by drawing on both established and new trends in postmodern thinking and analysis The book asks how we can study the process of European integration in the current climate and maps out the central elements of the academic debate dealing with the future of integration and Europe in general The author stimulates fresh readings of the European issue encouraging the development of new analytical horizons This is a significant cutting edge contribution to debates in politics comparative politics and European studies

*Multi-level Governance* Ian Bache, Matthew Flinders, 2004-02-26 The power and future role of nation states are a topic of increasing importance The dispersion of authority both vertically to supranational and subnational institutions and horizontally to non state actors has challenged the structure and capacity of national governments Multi level governance has emerged as an important concept for understanding the dynamic relationships between state and non state actors within territorially overarching networks Multi level Governance explores definitions and applications of the concept by drawing on contributions from scholars with different concerns within the broad discipline of Political Studies It contends that new analytical frameworks that transcend traditional disciplinary boundaries and epistemological positions are essential for comprehending the changing nature of governance In this context this volume undertakes a critical assessment of both the potentialities and the limitations of multi level governance

*Reinventing France* S. Milner, N. Parsons, 2003-11-25 Undermined from above by economic globalization and European integration and from below by the rise of identity politics the French state has attempted to redefine its relationship to its citizens Reinventing France examines the ways in which state action has endeavoured to promote social integration in an increasingly fragmented nation and has challenged traditional concepts of an indivisible Republic and universal citizenship rights in order to achieve the core republican ideals of freedom equality and solidarity

**Franco-German Relations** Alistair Cole, 2014-09-25 Suitable for use as a core text in courses of comparative European politics or in departments of Politics Can also be used for courses that explore the Political Dynamics of the European Union Franco German relations lie at the heart of European integration and are central to an understanding of major issues like monetary union and foreign policy Based on extensive research this concise text contains a multi level analysis of this key topic Describing historical background and examining contemporary debates it considers the domestic settings of French and German politics the internal operation of the Franco German relationship itself and the impact of the relationship in the wider European context Cole provides students with a much needed accessible introduction

and framework for theoretical analysis      Deepening and Widening Pierre-Henri Laurent, Marc Maresceau, 1998 Eighteen articles discuss the leading EU issues and institutional reforms at the end of this century such as enlargement security and monetary union as well as relations with the US Russia and the new World Trade Organization Although the contents are not exclusively determined by that agenda the volume was prepared and edited on the eve of and during the early months of the 1996 IGC which highlighted the struggle between those who seek a more integrated and even a federal Europe and those proposing a looser confederation Annotation copyrighted by Book News Inc Portland OR      The Federal Vision Kalypso Nicolaidis, Robert Howse, 2001-11-01 The Federal Vision is about the complex and changing relationship between levels of governance within the United States and the European Union Based on a transatlantic dialogue between scholars concerned about modes of governance on both sides it is a collective attempt at analysing the ramifications of the legitimacy crisis in our multi layered democracies and possible remedies Starting from a focus on the current policy debate over devolution and subsidiarity the book engages the reader in to the broader tension of comparative federalism Its authors believe that in spite of the fundamental differences between them both the EU and the US are in the process of re defining a federal vision for the 21st century This book represents an important new contribution to the study of Federalism and European integration which seeks to bridge the divide between the two It also bridges the traditional divide between technical legal or regulatory discussions of federal governance and philosophical debates over questions of belonging and multiple identities It is a multi disciplinary project bringing together historians political scientists and theorists legal scholars sociologists and political economists It includes both innovative analysis and prescriptions on how to reshape the federal contract in the US and the EU It includes introductions to the history of federalism in the US and the EU the current debates over devolution and subsidiarity the legal framework of federalism and theories of regulatory federalism as well as innovative approaches to the application of network analysis principal agent models institutionalist analysis and political theories of citizenship to the federal context The introduction and conclusion by the editors draws out cross cutting themes and lessons from the thinking together of the EU and US experiences and suggest how a federal vision could be freed from the hierarchical paradigm of the federal state and articulated around concepts of mutual tolerance and empowerment      Early Modern Concepts for a Late Modern World Thomas O. Hueglin, 2006-01-01 Who was Althusius and why is the work of a seventeenth century political theorist important in modern times Johannes Althusius 1557 1638 was a political theorist and a combative city politician who defended the rights of small communities against territorial absolutism He designed a system of politics in which sovereignty would be shared and jointly exercised by a plurality of collectivities spatial as well as social on the basis of mutual consent and social solidarity Early Modern Concepts for a Late Modern World places Althusius in the context of his times and explains the main features of his political thought It also suggests perhaps most significantly why his theories continue to resonate today Hueglin's use of sources is thorough and scrupulous He has worked in depth in Germanic scholarship and this

access to German language sources some of which are almost unknown to the English speaking world provides a new interpretation of Althusius theory With its emphasis on pluralized governance negotiated compromise instead of majority rule and the inclusion of the economic sphere into the political Althusius theory belongs to a countertradition in Western political thought Although it was written at the beginning of the modern age of sovereign politics it applies to today s search for a post sovereign system of politics

*Nationalism in Internationalism* Michael Holmes, Kathryn Simpson, 2023-01-01 This book interprets the relationship between Ireland and the European Union EU We are coming up to 50 years since Ireland acceded to the EU 2023 and the links between the two are unique and distinctive The volume presents an original interpretation of Irish EU relations and this in turn has implications for a wider understanding of the EU Its aim is to analyse the Irish EU relationship from the idea of two apparently contradictory political ideas internationalism as represented by European integration in this particular instance and nationalism long the dominant value in Irish politics The authors argue that to date the contradictions have been managed with considerable ease leading us to characterise the Irish EU relationship as nationalism within internationalism

**Sweden and the 'Third Way'** Philip Whyman, 2018-02-06 This title was first published in 2003 The creation of a Third Way between unfettered capitalism and old style Keynesian corporatist forms of social democracy has become the driving force behind the policy programmes of many left of centre political parties in the industrialised nations of the world today Sweden and the Third Way critically evaluates this new social democracy by examining the profound shift in Swedish political economy from being the prototype old style social democracy towards the Third Way synthesis of neo liberalism and elements of traditional social democracy Philip Whyman evaluates internal and external challenges to Swedish macroeconomic policy including globalisation European integration post Fordist technological change and the relative empowerment of capital to discover the extent to which national economic autonomy is constrained Furthermore he considers the plausibility of revising the core elements of the traditional Swedish Model as an alternative to the prevailing macroeconomic platform

The European Commission and the Integration of Europe Liesbet Hooghe, 2001 What kind of European Union do top Commission officials want Should the European Union be supranational or intergovernmental Should it promote market liberalism or regulated capitalism Should the Commission be Europe s government or its civil service This 2002 book examines top officials preferences on these questions through analysis of unique data from 137 interviews Understanding the forces that shape human preferences is the subject of intense debate Hooghe demonstrates that the Commission has difficulty shaping its employees preferences in the fluid multi institutional context of the European Union Top officials preferences are better explained by experiences outside rather than inside the Commission political party country and prior work leave deeper imprints than directorate general or cabinet Preferences are also influenced more by internalized values than by self interested career calculation Hooghe s findings are surprising and will challenge a number of common assumptions about the workings and motives of the European Commission

And she explores the crucial roles played by such factors as sovereignty honoring elements within the institutional structure of the federation the circumstances of its formation revolt against distant empire versus aftermath of war among member states and notably the internal culture of respect for the rule of law in the member states

**The Territorial Factor** Gertjan Dijink, Hans Knippenberg, 2001 Nowadays political territoriality is profoundly put to the test by globalization the rise of the network society international migration and new types of risk that state governments find hard to control Yet new political configurations do not invalidate the relevance of territory and territorial identity right away Moreover people who want to escape or forget foreign dominace still reach for the traditionally sovereign state Eastern Europe Asia In this book an international group of political geographers analyse the meaning of post modern transfromation in territoriality at different geographical scales global inter national and local They cover such varied topics as the probability of a clash between civilizations the rise of World cities the disintegration of African States ethnic conflicts and politics in Europe the meaning of a supranational territorial order European Union the end of the welfare state nation building and its symbols Israeli cultural politics urban regimes and local conflict defense mechanisms The perspectives put forward match more general theoretical geography and political science and involve case studies from different parts of the World This important new study is of immediate interest to students of all levels of politcial science sociology social geography administrative science international relations contermpoary history and to policy makers and politicians

**A Ruined Fortress?** Alan W. Cafruny, Magnus Ryner, 2003-06-28 This challenging book argues convincingly that research on European integration has lagged behind important theoretical developments in the fields of international relations international political economy and international organization The contributors contend that prevailing theories of integration despite their considerable differences all suffer from an excessive focus on institutions and ideas while overlooking the ways in which these institutions and ideas have promoted a neoliberal agenda during the last decade To overcome these weaknesses this volume draws on one of the key strands of theoretical innovation critical political economy or transnational historical materialism to develop a more comprehensive and consistent analysis of processes of European integration Although not claiming that states have ceded their role as masters of the treaties the contributors develop innovative case studies of national and transnational processes to illustrate the salience of trans European business networks and the primacy of neoliberalism as central organizing concepts of the post Maastricht European project Contributions by Baastian van Apeldoorn Hans J rgen Bieling Alan W Cafruny Ben Clift Stephen Gill Colin Hay Otto Holman Henk Overbeek Kees van der Pijl Magnus Ryner Thorsten Schulten Giles Scott Smith Leila Simona Talani and Matthew Watson
