**Trusts Law** Graham Moffat, 2005-09-29 With its unique contextual emphasis and authoritative commentary *Trusts Law Text and Materials* is a book that no serious undergraduate on trust law courses can afford to be without The book is divided into four main parts trusts and the preservation of family wealth trusts and family breakdown trusts and commerce and trusts and non profit activity Within each of these parts leading cases statutes and historical and research materials are placed alongside the narrative of the author's text to give emphasis both to general theories of trust concepts and to the practical operation of trusts Attention is also given to important themes such as the developing relationship between trusts law and other areas of private law such as the Law of Restitution This new edition takes account of all relevant judicial and legislative developments since the third edition and expands discussion of key themes in current developments of the law

Euthanasia for Death Duties Barry Bracewell-Milnes, 2002 Death duties are a minor source of revenue to the British Exchequer This work analyses the traditional criticism of death duties and adds some arguments based on the concept of saving in perpetuity saving which is never drawn down whether or not it was initially planned as perpetual Happiness, Economics and Public Policy Helen Johns (M. Sc.), Paul Ormerod, 2007 This book contains commentaries by Samuel Brittan and Melanie Powell In *Happiness Economics and Public Policy* Helen Johns and Paul Ormerod analyse the economic research that underlies politicians' growing preoccupation with measures of well being In a lucid and compelling analysis written for economists and non economists alike the authors find that happiness research cannot be used to justify government intervention in the way its proponents suggest Those who wish governments to take into account measures of well being when setting policy often point to the fact that increases in income have not led to increases in measured happiness and thus governments should concentrate on redistribution and improving the quality of life rather than on allowing people to benefit from economic growth *Alternatives to the Current Federal Estate Tax System* United States. Congress. Senate.

Committee on Finance, 2008 **Moffat's Trusts Law** Jonathan Garton, Graham Moffat, Gerard M. D. Bean, Rebecca Probert, 2015-08-13 Detailed thorough and authoritative new edition of Moffat's *Trusts Law* Studies in the History of Tax Law, Volume 2 John Tiley, 2007-01-29 This work contains the full text of the papers presented at the second Tax Law History Conference in July 2004 The Conference was organised by the Cambridge Law Faculty's Centre for Tax Law The papers range widely in terms of period from the Old Testament to the twentieth century and geographical areas with papers on matters relating to not only the United Kingdom but also Canada Australia and the US The matters discussed are also broad and include the concept of taxation developed by Adam Smith and his fellow United Kingdom writers of the Enlightenment problems of adjudication in tax law and of access to justice for taxpayers definitions of income and its UK subset total income capital gains tax stamp duty on newspapers the wartime excess profits tax the nature of tithes the strange tale of Jasper Moore the real nature of the decision in the Duke of Westminster case the demise of wealth transfer taxes in Canada the

nature of the US corporate tax and debates in the US about whether to raise war finance by issuing bonds or levying tax As a whole the papers illustrate not only the wide variety but also the real depth of the issues waiting to be investigated in this rapidly growing field of scholarship

**Inherited Wealth, Justice and Equality** John Cunliffe, Guido Erreygers, 2013 The core of the book consists of a selection of papers presented at an international workshop where researchers from a variety of fields and countries discussed the connections between inherited wealth justice and equality The volume is complemented by a few other papers commissioned by the editors The contributions cover historical political philosophical sociological and economic aspects

Meritocracy and Americans' Views on Distributive Justice Richard T. Longoria, 2009-01-01 This book focuses on public opinion on issues related to the theory of meritocracy It employs survey data from a variety of sources in an attempt to understand public sentiments highlighting the contradictory nature of American public opinion and questioning the belief that Americans fully embrace the meritocratic ethos

Liberalism and the Welfare State Roger Backhouse, Bradley W. Bateman, Tamotsu Nishizawa, Dieter Plehwe, 2017 Liberalism and the Welfare State investigates the thinking of liberal economists about welfare focusing on Britain Germany and Japan each of which had a different tradition of economic thinking and different institutions for welfare provision

**The Inheritance of Wealth** Daniel Halliday, 2018 Daniel Halliday examines the morality of the right to bequeath or transfer wealth and argues that inheritance is unjust to the extent that it enhances the intergenerational replication of inequality concentrating opportunities in certain groups He presents an egalitarian case for imposition of a significant inheritance tax

**Waging the War of Ideas** John Blundell, 2001 Discussing how wars of ideas can be waged this work features essays reviews and introductions that show how the founders of the IEA successfully fought the conventional planning wisdom of the 1960s and 1970s providing the ideas

which by the 1980s and 1990s had brought about increased freedom and a revival in the use of markets *The Euro as Politics* Pedro Schwartz, 2004 States that the British Government has focused the discussion on the adoption of the Euro on its economic consequences This title argues that the UK should seek to build a free trade Europe based upon competition and not based upon harmonization of regulation and laws *Corporate Governance* Elaine Sternberg, 2004 Corporate governance has come to prominence in recent years because of the perceived political importance of issues such as executive pay and apparent accounting scandals As might be expected in this frenzied climate politicians have reacted US politicians reacted with particular speed through the passing of the Sarbanes Oxley Act Dr Elaine Sternberg brings some sobriety and clear thinking to the debate in this new and fully revised edition of *Corporate Governance Accountability in the Marketplace* lucidly defining the purposes of corporate governance and analysing different models of corporate regulation The Anglo American model allows corporations to fulfil their corporate purposes more effectively than the stakeholder or the German Japanese models Given that problems of executive pay accounting scandals and so on result in corporations not achieving their proper purposes Sternberg finds that a change in the regulatory model cannot be the answer Instead she proposes that we should look at the ways in which regulation prevents the Anglo American model from working in practice as effectively as it should in theory Sternberg shows how a genuine market in corporate governance could be created so that firms had to compete for funds with their mode of governance being one of the attractions to potential shareholders Economy and Virtue Dennis O'Keeffe, 2004 Explores the relationship between virtue morality and alternative forms of economic organisation This work analyses how a free society both relies on and promotes values It argues that we cannot judge the market economy by observing the obvious process of getting and spending Should We Have Faith in Central Banks? Otmar Issing, 2002 Central bank independence is now in vogue because of previous experience of politicisation of monetary policy But can the central bankers be trusted more than the politicians In this Occasional Paper Professor Otmar Issing the leading monetary economist and one of Europe's most influential central bankers argues that price stability is a common good and that it is better in the hands of an independent central bank with a clear price stability mandate The independent central bank with such a mandate in effect represents a set of rules which impose constraints on the abuse of power either by politicians or by central bankers Central bankers operate best in institutions which have a clear objective and are held accountable to the public Professor Geoffrey Wood adds a commentary which puts Issing's paper in the context of the rules versus discretion debate and deals with three related issues the meaning of price stability the importance of stable money to the functioning of a market economy and the central bank's role in maintaining financial stability The Poverty of 'development Economics' Deepak Lal, 2002 This is a classic IEA text first Published in 1983 but revised and expanded in 1997 Its critique of that type of development economics highly influential in the early 1980s which the author branded the dirigiste dogma proved extremely controversial in the first few years of the book's life Professor Lal concluded that the demise of the

dogma would be beneficial to the health of both economics and the economies of developing countries The history of the last twenty years has demonstrated the force of the Lal critique The dogma in its old form has gone as Professor Lal shows in a postscript that brings the original text up to date both in terms of statistics and in terms of the history of ideas Nevertheless as he warns dirigiste tendencies have not disappeared but are emerging in new guises The Vote Motive Gordon Tullock,2006 In this classic introductory public choice text Gordon Tullock analyses the motives and activities of politicians civil servants and voters Government servants can most likely be assumed to be pursuing their own interests just like those in the private sector although given the coercive power of the state the effects can be far from benign The incentive structures present within public institutions mean that government action may well fail to improve economic welfare and frequently has results different from those intended The application of the economic theory of politics effectively undermines the market failure approach to government policy making which relies on the assumption that benevolent and far sighted governments are capable of clearing up the failings of private markets This new edition includes a reflection by Gordon Tullock and commentaries by Peter Kurrild Klitgaard Charles K Rowley Stefan Voigt and Michael C Munger These contributions consider the impact of the original publication of The Vote Motive in 1976 Thirty years later with public sector bureaucracies retaining substantial control over large swathes of the economy it is clear that policy makers still have much to learn from Tullocks seminal work **The New Rural Economy** Berkeley Hill,David Campbell,2005 Charts the development of the rural economy and considers whether government policy has similarly developed This book analyzes the roles of the public and private sectors in the developing rural economy and questions whether evidence of market failure necessarily justifies government intervention
