Evaluation Of Management Information Systems A Dynamic And Holistic Approach:

The Evaluation of Management Information Systems Eric F. Wolstenholme, Simon Henderson, Allan

Gavine, 1993-03-22 Combines managerial problem solving methodology of System Dynamics with a variety of techniques available for structured development of MIS Presents a strategic view of MIS targeted to provide a systemic and dynamic evaluation of an MIS effect on its host organization along with offering a means of assessment which can be implemented at any stage during the MIS development life cycle

The Dynamics of Care Eric Wolstenholme, Douglas McKelvie, 2019-10-10 This book describes numerous projects which shed light on some of the most persistent issues of the day in health and social care The work demonstrates the importance of embedding the concept of flow into everyday health and social care thinking and creates insights into patient journeys through different conditions and treatments It suggests that improving throughput across agencies is the key way to improving the performance of health treatment whereas increasing capacity is the key way to improving the performance of social care by retaining independent living The authors conclude that for state provided care balancing health and social care provision can eliminate the many stressful fire fighting strategies hospitals have to undertake when faced with high demands and this is a win win scenario in terms of patients staff and costs Further that there is a need for better understanding of the dynamics of population ageing the dynamics of health conditions and the provision of better integrated information systems The book will be a valuable resource for practitioners clinicians managers and academics in health social work public health and public policy in many countries In this important book Eric Wolstenholme and Douglas McKelvie bring two lifetimes of award winning experience in applying system dynamics to improving our very clinically advanced but often dysfunctional care systems David F Andersen O Leary Distinguished Service Professor Emeritus State University of New York Albany USA Health and social care suffer from some persistent and serious problems which not only undermine well intended care but also impose considerable costs in many societies This very welcome and exceptional book offers the hope of sound and sustainable solutions to many of these issues Kim Warren Strategy Dynamics London UK

Supporting Reuse in Business Case Development Bart-Jan van Putten, 2013-01-11 Determining the value of an information system for an organization is challenging especially before the execution of the project in which the system is put into operation Many organizations cope with problems when having to identify the potential benefits of the investment while even more have difficulties with their quantification An analysis in which multiple possible investments and approaches are compared with respect to their benefits costs and risks is called a business case BC The current frameworks that can be used to develop BCs offer too little support for the aforementioned challenges Opportunities to improve BC frameworks and thereby the efficiency and effectiveness of BC development are therefore explored in this dissertation

The Golden Thread Fuad Udemans, 2013-09-23 This book is an account of a ten year experiment whereby the scientist became an entrepreneur so as to experience his own theoretical model applied in a live

social system society Profit motives and the clinical nature of science became muddled with norms rules and laws of social systems and how different people applied and responded to these rules The insights to be gained from this journey are often surprising The book highlights many counter intuitive outcomes It also reveals how certain individuals interpret societys rules and norms despite their design to ensure fair and equitable social systems Indeed the manipulation of social laws and standards by those with strong fields of power is self evident and it is explored in a unique manner Understanding how the field of power can be manipulated suggests that no matter how bleak ones current position may be it is very possible and relatively easy to escape conditions of poverty oppression and subjugation vital issues that citizens in all countries face today
