Leading Architecture & Design, 2004 **Urban Biodiversity and Design** Norbert Muller, P. Werner, J. G. Kelcey, 2010-05-10 With the continual growth of the world's urban population biodiversity in towns and cities will play a critical role in global biodiversity This is the first book to provide an overview of international developments in urban biodiversity and sustainable design It brings together the views experiences and expertise of leading scientists and designers from the industrialised and pre industrialised countries from around the world The contributors explore the biological cultural and social values of urban biodiversity including methods for assessing and evaluating urban biodiversity social and educational issues and practical measures for restoring and maintaining biodiversity in urban areas Contributions come from presenters at an international scientific conference held in Erfurt Germany 2008 during the 9th Conference of the Parties of the Convention on Biodiversity This is also Part of our Conservation Science and Practice book series with Zoological Society of London *Mimarlıkta Malzeme 14* Mimarlar Odası İstanbul Büyükkent Şubesi, Mimarlıkta Malzeme 14 Sayfa

Landscape Architecture Australia, 2006 *Photography, Architecture, and the Modern Italian Landscape* Lindsay Harris, 2024-11-19 Photography Architecture and the Modern Italian Landscape explores the impact of photography at a pivotal moment in Italian architecture and culture focusing on the period between 1910 and the mid 1970s The book analyzes architectural photographs taken by Italian cultural figures who helped transform the Italian landscape into what we know today This study charts the oscillation of Italians ideas about what progress signified For example the book demonstrates that for writers and artists familiar with ancient ideas about civilization in 1910 the Roman countryside exemplified the contradictions inherent in primitivism On the one hand their photographs praised the region's primordial beauty yet their images condemned the crudeness of local living conditions More broadly it traces the history of primitivism and photography in Italy to show how cultural leaders alarm at the nation's pre modern living conditions their aspiration to modernize them and their grasp of photography to catalyze the process helped forge the modern Italian landscape its monuments housing infrastructure and natural environments At the same time it explores a vibrant period in photographic history when the advent of photographic reproduction as a commercial process developed into a medium with its own visual style capable of shaping ideas about modernity This new image making and reproduction technology empowered Italy's cultural leaders not simply to represent the Italian landscape through photography but to determine how it developed Of interest to researchers and students from a range of disciplines modern architecture photography and Italian studies this book demonstrates the power of art to transform society and to reformulate our ideas of progress **Modern Landscape Architecture** Marc Treib, 1994-07-25 Twenty two essays that provide a forum for assessing the tenets accomplishments and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline These twenty two essays provide a rich forum for assessing the tenets accomplishments and limits of modernism in landscape architecture and

for formulating ideas about possible directions for the future of the discipline During the 1930s Garrett Eckbo Dan Kiley and James Rose began to integrate modernist architectural ideas into their work and to design a landscape more in accord with the life and sensibilities of their time Together with Thomas Church whose gardens provided the setting for California living they laid the foundations for a modern American landscape design This first critical assessment of modern landscape architecture brings together seminal articles from the 1930s and 1940s by Eckbo Kiley Rose Fletcher Steele and Christopher Tunnard and includes contributions by contemporary writers and designers such as Peirce Lewis Catherine Howett John Dixon Hunt Peter Walker and Martha Schwartz who examine the historical and cultural framework within which modern landscape designers have worked There are also essays by Lance Necker Reuben Rainey Gregg Bleam Michael Laurie and Marc Treib that discuss the designs and legacy of the Americans Tunnard Eckbo Church Kiley and Robert Irwin Dorothy E Imbert takes up Pierre Emile Leger and French modernist gardens of the 1920s and Thorbjørn Andersson reviews experiments with stylized naturalism developed by Erik Glemme and others in the Stockholm park system

Small Urban Natures Christophe Girot, 2004 Girot's projects are all based on simple geometric and gestural movements His concept of garden architecture begins with the modelling of the earth surface The resulting topography is the basis of a restrained plant vocabulary

Colonialism and Modern Architecture in Germany Itohan Osayimwese, 2017-07-19 Over the course of the nineteenth century drastic social and political changes technological innovations and exposure to non Western cultures affected Germany's built environment in profound ways The economic challenges of Germany's colonial project forced architects designing for the colonies to abandon a centuries long highly ornamental architectural style in favor of structural technologies and building materials that catered to the local contexts of its remote colonies such as prefabricated systems As German architects gathered information about the regions under their influence in Africa Asia and the Pacific during expeditions at international exhibitions and from colonial entrepreneurs and officials they published their findings in books and articles and organized lectures and exhibits that stimulated progressive architectural thinking and shaped the emerging modern language of architecture within Germany itself Offering in depth interpretations across the fields of architectural history and postcolonial studies Itohan Osayimwese considers the effects of colonialism travel and globalization on the development of modern architecture in Germany from the 1850s until the 1930s Since architectural developments in nineteenth century Germany are typically understood as crucial to the evolution of architecture worldwide in the twentieth century this book globalizes the history of modern architecture at its founding moment

Contemporary Landscapes of Contemplation Rebecca Krinke, 2005-11-14 Contemplative landscape and contemplative space are familiar terms in the areas of design landscape architecture and architecture Krinke and her highly regarded contributors set out to explore definitions theories and case studies of contemplative landscapes The contributors Marc Treib John Beardsley Michael Singer Lance Necker Heinrich Hermann and Rebecca Krinke have spent their careers researching critiquing and making landscapes

Here they investigate the role of contemplative space in a post modern world and examine the impact of nature and culture on the design or interpretation of contemplative landscapes The essays drawn from both scholarship and personal experience explore the links between spaces designed to provide health benefits and contemplative space

Events, Places and Societies Nicholas Wise, John Harris, 2019-03-21 Events can be synonymous with a particular place helping shape and promote a location Given the rise of the global events industry this book uncovers how events impact upon places and societies looking at a range of different events and geographical scales Geographers are concerned with how notions of space and place impact people communities and identity and events have played a central role in how places are perceived consumed and even contested This book will discuss international event cases to frame knowledge around the increased demands pressures and complexities that globalisation transnationalism regeneration and competitiveness has put on events places and societies Integrating discussions of theory and practice this book will explore the range of conceptual perspectives linked to how geographers and sociologists understand events and the role events play in contemporary times This involves recognizing histories and planning strategies the purpose of bidding for an event or the local meanings that have emerged and changed in the place This helps us analyse how events have the potential to redefine place identities This international edited collection will appeal to academics across disciplines such as geography planning and sociology as well as students on events management and events studies courses

Places of Commemoration Joachim Wolschke-Bulmahn, 2001 Everyone is occupied consciously or unconsciously with identity one's origin and the question of one's place in humankind and society of the past present and future Identity and memory are not stable and objective things but representations or constructions of reality related to a particular interest such as class gender of power relations Identity is problematic without history and without the commemoration of history and of course such remembrance may distort historical events and facts When dealing with gardens a substantial part of our physical environment there are always unspoken questions of identity *Places of Commemoration* examines commemorative sites of different character including gardens landscapes memorials cemeteries and sites of former Nazi concentration camps detailing the ideas behind the creation of memorials and monuments and the struggles over the narratives they present

Architecture and the Nazi Cultural Landscape David H. Haney, 2022-09-13 This book traces cultural landscape as the manifestation of the state and national community under the Nazi regime and how

the Nazi era produced what could be referred to as a totalitarian cultural landscape For the Nazi regime cultural landscape was indeed a heritage resource but it was much more than that cultural landscape was the nation The project of Nazi racial purification and cultural renewal demanded the physical reshaping and reconceptualization of the existing environment to create the so called new Nazi cultural landscape One of the most important components of this was a set of monumental sites thought to embody blood and soil beliefs through the harmonious synthesis of architecture and landscape This special group of landscape bound architectural complexes was interconnected by the new autobahn highway system itself thought to be a monumental work embedded in nature Behind this intentionally aestheticized view of the nation as cultural landscape lay the all pervasive system of deception and violence that characterized the emerging totalitarian state This is the first historical study to consider the importance of these monumental sites together with the autobahn as evidence of key Nazi cultural and geographic strategies during the pre war years This book concludes by examining racial and nationalistic themes underlying cultural landscape concepts today against this historic background

Events That Formed the Modern World Frank W. Thackeray, John E. Findling, 2012-05-31 This comprehensive five volume set contains readable essays that describe and interpret the most important global events since the European Renaissance some accompanied by related document excerpts and primary source materials What were the effects of the Age of Exploration on today s ethnic groups and social structure How did the development of moveable type pave the way for Facebook and Twitter Why is the Reformation so critical for understanding today s religious controversies This set will help readers answer these questions by exploring the most significant historical events of the modern world This five volume set covers times from the Renaissance to the present Each volume focuses on a specific historic period and examines 12 events within those time frames that changed the world Each entry provides an introduction that lays out factual material in a chronological manner an in depth essay interpreting the event s significance and an annotated bibliography of the most important current works on the topic Select entries are followed by primary sources pertaining to the event under consideration such as diary entries Targeted to both general readers as well as entry level university students this book also directly supports high school and undergraduate curricula allowing students to identify and contextualize events in order to think critically about their causes aftermath and legacy

Geographies of Religious Spaces and Sacred Landscapes Darius Liutikas, 2025-07-15 This illuminating book explores the pivotal role of sacred landscapes in today s globalized world analysing the latest research of how political social and historical factors influence their creation preservation and transformation It examines the significance of sacred landscapes in shaping social identity and community history providing valuable insights into their rich heritage and evolving traditions

Grounds for Review Andrew C. Theokas, 2004-01-01 In recent decades suburban growth and the decline of industry have left cities throughout Europe and America searching for creative and effective ways to revitalize blighted areas and reclaim underused land In *Grounds for Review* Andrew Theokas examines one particularly exciting tool for

reinvigorating urban areas the garden festival These festivals which began in post war Europe have been popular throughout the Continent for decades but are just beginning to gain currency in the United States A garden festival temporarily transforms a previously derelict area such as an abandoned factory lot into a festival of horticulture combining luxurious landscapes with exhibits and carnival rides Most garden festivals last about six months during which time they draw millions of visitors but the success of the fair itself is only the initial step in a detailed plan for urban improvement At the conclusion of the festival funds from its operation are used to transform the grounds once again this time with an eye toward the long term use of the land The enduring result of a successful garden festival is thus the transformation of derelict land into a community asset such as a new urban park or an affordable housing project Theokas considers here fifteen garden festivals in Europe England and the United States in all their dimensions He examines the role they play in stimulating urban redevelopment their effects on the practice of landscape architecture and the contentious debates over their financing purposes and future prospects This highly illustrated volume will serve as a useful introduction to garden festivals for all those interested in urban planning horticulture and the future of cities **The Making of Place** John Dixon

Hunt, 2015-11-15 Gardening is rich in tradition and many gardens are explicitly designed to refer to or honor the past But garden design is also rich in innovation and in *The Making of Place* John Dixon Hunt explores the wide varieties of approaches aesthetics and achievements in garden design throughout the world today The gardens Hunt explores offer surprising new ideas about how we can carve out a space for respite in nature Taking readers to gardens public and private busy and hidden away to botanical gardens small parks university campuses and vernacular gardens Hunt showcases the differences between cultures and countries around the globe including the United States United Kingdom France Germany China and Australia Richly illustrated *The Making of Place* is sure to enchant and inspire even the most modest of home gardeners *European Landscapes of Rock-Art* Christopher Chippindale, George Nash, 2003-09-02 Rock art the ancient images which still scatter the rocky landscapes of Europe is a singular kind of archaeological evidence Fixed in place it does not move about as artefacts as trade objects do Enigmatic in its meaning it uniquely offers a direct record of how prehistoric Europeans saw and envisioned their own worlds *European Landscapes of Rock Art* provides a number of case studies covering a range of European locations including Ireland Italy Scandinavia Scotland and Spain which collectively address the chronology and geography of rock art as well as providing an essential series of methodologies for future debate Each author provides a synthesis that focuses on landscape as an essential part of rock art construction From the paintings and carved images of prehistoric Scandinavia to Second World War graffiti on the German Reichstag this volume looks beyond the art to the society that made it The papers in this volume also challenge the traditional views of how rock art is recorded Throughout there is an emphasis on informal and informed methodologies The authors skilfully discuss subjectivity and its relationship with landscape since personal experience from prehistoric times to the present day plays an essential role in the

interpretation of art itself The emphasis is on location on the intentionality of the artist and on the needs of the audience This exciting volume is a crucial addition to rock art literature and landscape archaeology It will provide new material for a lively and greatly debated subject and as such will be essential for academics non academics and commentators of rock art in general *The cultural & heritage guide for Germany*, 2025-09-25 *When Modern Was Green* David Haney, 2010 Today contemporary landscape design is increasingly drawing from ideas of sustainability and ecological stability Not in fact new the foundations of this approach stem from early twentieth century Germany where architects and planners were already beginning to use the design concepts which are now referred to as green This ecological school of thought was driven by modernist landscape architect Leberecht Migge 1881 1935 Working with significant modernist architects of the age including Martin Elsaesser Ernst May Bruno Taut and Martin Wagner Migge was responsible for some of the most important housing and planning projects of the age the mass housing settlements or Gro siedlungen of Frankfurt Main and Berlin Using biotechnic principles to integrally link dwelling and garden Migge was able to recycle household waste to grow foodstuffs through the use of innovative infrastructure and open space planning Also a skilled park and garden designer he drew together green and architectural elements in his garden architectonic approach David H Haney s book is the first to fully document Leberecht Migge s life and work Using Migge as a starting point Haney addresses conceptual and theoretical aspects of German ecological design challenging conventional assumptions about modernism and ecological design history With 200 illustrations and photographs *When Modern Was Green* is ideal for students and academics interested in modernism landscape history and higher level German studies
