Events That Changed History Prof. Jamal Sanad Al-Suwaidi, 2019-01-01 This book is the second part of a comprehensive academic and research project initiated by H E Prof Jamal Sanad Al Suwaidi In the first part of the project *Eternal Imprints Figures That Made History and Others That Changed the Future of Their Countries* first published in 2016 he wrote about personalities who achieved great accomplishments to influence their countries and the world The second part of the project looks at historical events that triggered major shifts both positive and negative and changed the history of regions and countries or humanity itself In *Events That Changed History* the author revisits events that made history from the perspective that history will never repeat itself However its events may share similarities Therefore a retrospective narrative of the past is in fact an attempt to better understand the present and not a tendency to ponder on and seek refuge in the past The book examines twenty issues and events relevant to

different periods of history which fall within categories such as politics the military the economy and technology Some of these events took place in the Arab region and others outside it Not content with analyzing events of the distant past the author also covers a wide range of events from recent times including the establishment of the UAE Federation in December 1971 the October War of 1973 the building of Aswan High Dam in 1970 and the attacks of September 11 2001 The book also reviews historical events in which the past present and future interplay These events are closely linked to the sweeping changes the contemporary world is witnessing which have implications for the future This book is an invitation from an intellectual who is concerned with issues relevant to both his homeland and world an invitation to comprehensively and not selectively re read both our history and that of the world from an open and enlightened perspective in order to narrate historical events the way they happened It is our responsibility to help the new generation understand the past and present and not to be an accomplice in deceiving and confusing them which is a heinous historical crime that distorts awareness and poisons the mind

technology and modernity Heidegger suggests that refocusing on the primary questions that make it meaningful to be human the question of Being could create the means for alternative discourses that both challenge and sidestep the attempt for total surveillance and total control He advocates recognising the problematic relationship humanity has with the environment and reinventing new trajectories of understanding ourselves and our planet This book aims to properly integrate environment into philosophy and political theory offering a constructive critique of modernity with some helpful suggestions for establishing a readiness for blue sky scenarios for the future The book lays out the practical implications of Heidegger s ideas and engages with philosophy of technology considering the constraints and the potentials of technology on culture and environment
