McBrayer,2020-09-22 The world is swimming in misinformation Conflicting messages bombard us every day with news on everything from politics and world events to investments and alternative health The daily paper nightly news websites and social media each compete for our attention and each often insist on a different version of the facts Inevitably we have questions Who is telling the truth How would we know How did we get here What can we do Beyond Fake News answers these and other queries It offers a technological and market based explanation for how our informational environment

became so polluted It shows how purveyors of news often have incentives to mislead us and how consumers of information often have incentives to be misled And it chronicles how as technology improves and the regulatory burdens drop our information scape becomes ever more littered with misinformation Beyond Fake News argues that even when we really want the truth our minds are built in such a way so as to be incapable of grasping many facts and blind spots mar our view of the world But we can do better both as individuals and as a society As individuals we can improve the accuracy of our understanding of the world by knowing who to trust and recognizing our limitations And as a society we can take important steps to reduce the quantity and effects of misinformation

Genetically Modified and non-Genetically Modified Food Supply Chains Yves Bertheau,2012-09-10 In the European Union nations and other countries including Japan Australia and Malaysia it is a legal requirement that food products containing genetically modified organism GMO materials are labelled as such in order that customers may make informed purchasing decisions For manufacturers and consumers to be confident about these assertions systems must be in place along the entire food chain which support the co existence of GM and non GM materials whilst maintaining a strict segregation between the two This book is an output of a European Union funded project entitled Co Extra GM and non GM food and feed supply chains their Co Existence and Traceability The objective of this four year project is to provide practical tools and methods for implementing co existence that will enable the co existence of genetically modified GM and non GM crops enable the segregation and tracing of genetically modified organism GMO materials and derived products along the food and feed chains anticipate the future expansion of the use of GMOs The project is designed to foster a robustly science based debate amongst all of the stakeholders involved in the food and feed chains and the tools will be assessed not only from a technical point of view but with regard to the economic and legal aspects It also surveys the GMO related legal regimes and practices that exist in and beyond the EU This book examines the practical tools and methods available to implement the co existence and traceability of GM and non GM food materials along the entire food and feed chains as demanded by consumers and by legislation in force in the EU and elsewhere GM and Non GM Supply Foods is a source of valuable information for food manufacturers food research institutions and regulatory bodies internationally
