Geneticist Who Played Hoops With My Dna:

The Geneticist Who Played Hoops with My DNA David Ewing Duncan, 2005 Combining myth biography and wit this is a highly original depiction of cutting edge science and its profound implications told through the scientists who are rewriting life on earth

The Geneticist Who Played Hoops with My DNA David Ewing Duncan, 2005-05-10 While the future of human existence is literally being forged by today's genetic scientists and biotechnology leaders the media policymakers ethicists and fellow scientists alike have not been adequately communicating this tremendous potential With the public only vaguely aware of what is happening a new coterie of geniuses tinkerers tycoons and genetic soothsayers are for better or worse about to alter life on earth forever Now journalist David Ewing Duncan has written a narrative about science and personality delving into stem cell research cloning bioengineering extending life span and genetics by telling the stories of the characters at the fulcrum of the science Calling to mind age old stories and myths Prometheus Faustus Eve and

Frankenstein Duncan asks the question Can we trust these scientists From publisher description **Masterminds** David Ewing Duncan, 2009-10-06 James Watson J Craig Venter Francis Collins Cynthia Kenyon you may not know them but you should They are the masterminds of genetics and biotechnology who want you to live to be 150 years old to regenerate your heart and brain to create synthetic life For better or worse they are about to alter life on earth forever Award winning journalist David Ewing Duncan tells the remarkable stories of cutting edge bioscientists revealing their quirky uniquely fascinating sometimes vaguely unsettling personas as a means to understand their science and the astonishing implications of their work This book seamlessly combines myth biography scholarship and wit that poses the all important question Can we actually trust these masterminds *Gene Jockeys* Nicolas Rasmussen, 2014-05-15 The scientific scramble to discover the first generation of drugs created through genetic engineering The biotech arena emerged in the 1970s and 1980s when molecular biology one of the fastest moving areas of basic science in the twentieth century met the business world *Gene Jockeys* is a detailed study of the biotech projects that led to five of the first ten recombinant DNA drugs to be approved for medical use in the United States human insulin human growth hormone alpha interferon erythropoietin and tissue plasminogen activator Drawing on corporate documents obtained from patent litigation as well as interviews with the ambitious biologists who called themselves gene jockeys historian Nicolas Rasmussen chronicles the remarkable and often secretive work of the scientists who built a new domain between academia and the drug industry in the pursuit of intellectual rewards and big payouts In contrast to some who critique the rise of biotechnology Rasmussen contends that biotech was not a swindle even if the public did pay a very high price for the development of what began as public scientific resources Within the biotech enterprise the work of corporate scientists went well beyond what biologists had already accomplished within universities and it accelerated the medical use of the new drugs by several years In his technically detailed and readable narrative Rasmussen focuses on the visible and often heavy hands that construct and maintain the markets in public goods

like science He looks closely at how science follows money and vice versa as researchers respond to the pressures and potential rewards of commercially viable innovations In biotechnology many of those engaged in crafting markets for genetically engineered drugs were biologists themselves who were in fact trying to do science This book captures that heady fleeting moment when a biologist could expect to do great science through the private sector and be rewarded with both wealth and scientific acclaim *Cloning* Tina Kafka,2007-12-14 In nature clones occur naturally in plants but not in animals According to the National Human Genome Research Institute animals must be scientifically manipulated through different processes to create an identical copy of the genetic material known as cloning This thought provoking volume explores the history of cloning the ethical issues it raises where research may lead it in the future and cloning s role in curing diseases creating custom organs improving food and saving animals **A Life Decoded** J. Craig Venter,2007-10-18 The triumphant memoir of the man behind one of the greatest feats in scientific history Of all the scientific achievements of the past century perhaps none can match the deciphering of the human genetic code both for its technical brilliance and for its implications for our future In *A Life Decoded* J Craig Venter traces his rise from an uninspired student to one of the most fascinating and controversial figures in science today Here Venter relates the unparalleled drama of the quest to decode the human genome a goal he predicted he could achieve years earlier and more cheaply than the government sponsored Human Genome Project and one that he fulfilled in 2001 A thrilling story of detection *A Life Decoded* is also a revealing and often troubling look at how science is practiced today *The Promethean Illusion* Bob Tostevin,2014-01-10 This book explores two contradictory realities our continuing belief that nature is subject to our willful control and nature s refusal to abide by this belief It investigates particular aspects of modern science and spotlights the impact Newtonian science had upon the Western world It then critically assesses twentieth century developments in science presenting a number of biological and ecological case studies that document the various limitations that the natural world places upon human knowledge The analysis argues against programmatic proposals to control nature via genetic engineering and planet management **The Art of Woo** G. Richard Shell,Mario Moussa,2007-10-18 You may need *The Art of War* to defeat your enemies but if you prefer to win them over read *The Art of Woo* G Richard Shell and Mario Moussa know what it takes to drive new ideas through complex organizations They have advised thousands of executives from companies such as Google Microsoft and General Electric to organizations like the World Bank and even the FBI s hostage rescue training program In *The Art of Woo* they present their systematic four step process for winning over even the toughest bosses and most skeptical colleagues Beginning with two powerful self assessments to help readers find their Woo IQ they show how relationship based persuasion works to open hearts and minds Ranging across history from Charles Lindbergh to Sam Walton the authors examine how savvy negotiators use persuasion not confrontation to achieve goals U S News World Report **A to Z of Women in Science and Math** Lisa Yount,2007 From ancient times to the present day scientifically inclined women in many cultures have had to battle against

the traditional belief that men are more cognitively adept than women At times throughout history women were persecuted for their attempts to break down traditional gender barriers Today women scientists and mathematicians must continue to defend the quality of their work and demand the respect they deserve in the mathematical and scientific communities A to Z of Women in Science and Math Revised Edition profiles 195 women who fought against these stereotypes throughout history and all over the world to forge new discoveries and theories that would eventually change the way we view science This thoroughly revised book updates the story of each individual to the present day and features 38 new profiles Among the profiles included are those of chemists astronomers geologists environmental scientists and a range of other professions and careers In addition new photographs have been added and the bibliography has been updated Subject indexes allow the reader to search by such professions as microbiology and paleontology Additional subject indexes organize individuals by country of birth country of major scientific activity and year of birth **Beyond Technocracy** Massimiano

Bucchi, 2009-06-02 Nuclear energy stem cell technology GMOs the more science advances the more society seems to resist But are we really watching a death struggle between opposing forces as so many would have it Can today's complex technical policy decisions coincide with the needs of a participatory democracy Are the two sides even equipped to talk to each other *Beyond Technocracy: Science, Politics, and Citizens* answers these questions with clarity and vision Drawing upon a broad range of data and events from the United States and Europe and noting the blurring of the expert lay divide in the knowledge base the book argues that these conflicts should not be dismissed as episodic or the outbursts of irrationality and ignorance but recognized as a critical opportunity to discuss the future in which we want to live Massimiano Bucchi's analysis covers the complex realities of post academic science as he Explores the widely debated theme of science and democracy across a broad range of technological controversies Overviews issues raised by the current relationship among scientists policymakers business interests and the public Dispels stereotypes of the detached scientific community versus the uninformed general public Examines the role of the media in framing scientific debate Addresses the question of how to move beyond technocracy to a more fruitful collaboration between scientists and citizens Offers a bold vision for a future in which the scientific and public spheres regard each other as partners working toward a shared purpose *Beyond Technocracy: Science, Politics, and Citizens* has great value as a postgraduate text for courses in technology and society political science and science policy It will also find an interested audience among scientists policymakers managers in the technological sector and concerned lay readers *Soul* Tobsha Learner, 2025-09-23

Learner's *The Witch of Cologne* is an erotically charged novel of people swept inexorably along by events they could not control In *Soul* Learner relates the story of Lavinia and Julia Huntington passionate women trapped in emotional whirlpools that threaten to drown them and everyone they love In 19th century Britain Lavinia is married to an older man who seems to appreciate her lively curiosity Lavinia proves to be an apt pupil in both the study and the bedroom glorying in the pleasures of the physical In 21st century Los Angeles geneticist Julia

is trying to identify people who can kill without remorse Stunned to discover that she seems to possess the trait she is looking for Julia is reassured of her emotions by her intense passion for her husband and her delight in her pregnancy In the past Lavinia s desire for her husband grows but his cools as he becomes fascinated with another In the present Julia s love overwhelms her husband who leaves her Lavinia and Julia feel the tortures of passion unspent Cold logic tells them that the deaths of their tormentors will bring them peace Separated by a hundred years two Huntington women face the same decision Their choices will echo far into the future At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied

Biotechnology and Genetic Engineering Kathy Wilson Peacock,2010 Explains why biotechnology is a relevant and volatile issues Begins with a history of biotechnology and its effect on agriculture medicine and the environment Equal space is devoted to discussing the efforts of human rights advocates animal rights advocates and environmentalists to create definitive governmental regulations for this budding industry Simple Solutions for Humanity Patrick Kenji Takahashi,2008-02-29 Book 1 SIMPLE SOLUTIONS for Planet Earth dealt with energy and the environment SIMPLE SOLUTIONS for Humanity provides ultimate answers for our society and beyond Ever wonder if there could ever be a way to end crime and war forever or the prospects for immortality or a better educational system or the reality of extraterrestrial intelligence or the future of religion If all the above can be satisfactorily resolved then just in case there is no afterlife where is the best place to live on Earth today Simple solutions of course are hardly that How to end crime What about three strikes and you re dead Sure this should work but it s not morally rational The solution to war is incredibly simple Just read the book and find out how Scientists are getting very close to determining a way to disarm our aging gene When will this happen Our educational system is flawed Be prepared to be shocked by the Stanford Marshmallow Study Then find out that our terrible student scores relative to the developed world might not be worth all the anguish The USA will prevail because of our superiority in Could the solution for world peace or curing cancer be streaming in from space The Search for Extraterrestrial Intelligence could someday soon detect what would be the most monumental discovery since the invention of God How can religion overcome the immorality of purporting to promise an afterlife WITHOUT ANY PROOF A Golden Evolution is suggested Are you one of those who largely wasted your life looking out only for yourself family and friends Could there be a higher calling You too can make a positive difference Rainbow Vision is explained to equip you with the tools to help save Planet Earth and Humanity *Post-Traditional Public Administration Theory* David Farmer,2021-03-22 This book describes what is argued to be the most effective way of doing public administration thinking Its aim is to encourage governments to govern fundamentally better in terms of policy and administration A better understanding of context and identities imaginization epistemic pluralism anti administration and the context of economics are examples of what is critical for high effectiveness The pieces included in this book have been handpicked from the vast academic collection that David Farmer has authored over the last thirty years and which were published in the Journal of

Administrative Theory and Praxis and the Journal of Public Administration Education Collectively these chapters are intended to help governments use post traditional public administration theory in order to achieve better praxis

The Lighting of the Fire Fr. Benigno P. Beltran, 2019-10-15 The book contains deeply insightful objectively argued clear and succinct and synthesized ideas in education philosophy theory and practice

Neuroscience and Social Work Practice Rosemary L. Farmer, 2008-12-17 Over the past 30 years findings in the neurosciences have grown exponentially and have provided a profound understanding of the link between behavior and biology Although the Social Work community has long taken pride in using a bio psycho social spiritual BPSS framework in conceptualization and intervention the biological aspect of this BPSS framework has been sorely missing Neuroscience and Social Work Practice provides the critical missing link Introducing the latest neuroscience research it gives practitioners essential data in an easily accessible form with which to take on the challenges of increasingly complex human problems and diagnoses Key Features Takes readers on a tour of the brain and makes dense scientific material more engaging Provides a framework for how human service professionals can understand and implement neuroscience clinical data with the use of the Transactional Model Uses case vignettes to explain how neuroscience findings have been applied to specific practice situations Offers a deeper understanding of the links between neuroscience research and social work in such areas as trauma attachment psychotherapy substance abuse and the effects of psychotropic medications Intended Audience This cutting edge text is indispensable for practitioners in the human services field and is an essential supplement for upper level undergraduate or graduate students of courses in Human Behavior in the Social Environment and Social Work Direct Practice as well as courses on Interpersonal Practice with Individuals Children and Families

Drawing the Map of Life Victor K. McElheny, 2010-10-19 Drawing the Map of Life is the dramatic story of the Human Genome Project from its origins through the race to order the 3 billion subunits of DNA to the surprises emerging as scientists seek to exploit the molecule of heredity It s the first account to deal in depth with the intellectual roots of the project the motivations that drove it and the hype that often masked genuine triumphs Distinguished science journalist Victor McElheny offers vivid insightful profiles of key people such as David Botstein Eric Lander Francis Collins James Watson Michael Hunkapiller and Craig Venter McElheny also shows that the Human Genome Project is a striking example of how new techniques such as restriction enzymes and sequencing methods often arrive first shaping the questions scientists then ask Drawing on years of original interviews and reporting in the inner circles of biological science Drawing the Map of Life is the definitive up to date story of today s greatest scientific quest No one who wishes to understand genome mapping and how it is transforming our lives can afford to miss this book

ID Susan Greenfield, 2009-08-06 If you ve ever wondered what effect video games have on your children s minds or worried about how much private information the government and big companies know about you ID is essential reading Professor Susan Greenfield argues persuasively that our individuality is under the microscope as never before now more than ever we urgently need to look at what we want for ourselves as

individuals and for our future society ID is an exploration of what it means to be human in a world of rapid change a passionately argued wake up call and an inspiring challenge to embrace creativity and forge our own identities **Public Administration in Perspective** David John Farmer, 2015-01-30 Throughout its history public administration has used a number of different perspectives for analyzing the discipline s theory and practice and both mainstream and alternative lenses have produced valuable insights and prescriptions At the same time an individual way of looking at PA can be misleading Alone a solitary lens can miss critical aspects and often gives only part of the picture Public Administration in Perspective has been specifically crafted to give new life to public administration theory and practice by helping readers view the discipline through a variety of perspectives Designed for the capstone course in public administration programs as well as a fresh approach for courses in PA theory and organizational theory this unique book provides a culminating experience bringing together what has been learned in previous MPA courses without simply rehashing old content It offers a comprehensive guide to eleven major approaches to PA and synthesizes them to deepen our understanding of the discipline Each chapter in Part I describes the key features of the selected perspective history content and proponents and discusses the strengths and weaknesses related to PA theory and practice Part II synthesizes the various perspectives with specific implications for PA management and practice Part III concludes with a complete overview identifying ways in which readers can think more creatively and productively about PA putting the perspectives themselves into perspective **The British National Bibliography** Arthur James Wells, 2006
