Images of Justice Dorothy Eber, 1997 The Yellowknife courthouse displays a collection of fourteen Inuit carvings representing landmark cases the legal history of the Northwest Territories The cases which came to trial before the NWT Supreme Court between 1955 and 1970 and the carvings that represent them illuminate a pivotal period of overwhelming social change when the Inuit camp system was eroding and age old practices and traditional mores were being called into question Dorothy Harley Eber tells the stories behind the carvings and provides fascinating insight into the unusual situations and special problems that developed as the Inuit came contact with Canada's justice system The collection of carvings was started when J H Sissons first resident justice of the NWT Supreme Court received a carving of himself on the bench from an Inuit defendant He decided to have Inuit artists document more cases and collected carvings that represented important decisions involving murder assisted suicide adoption custom law marriage and infractions of game laws The collection was added to by his successor William Morrow Both Sissons and Morrow believed that to serve justice the North the law and the courts must adapt and they were instrumental in spurring the fight for Native rights and making changes to the law to secure them Eber provides colourful portraits of the two men based on recollections of those who travelled on circuit with them and observed their battles with Ottawa bureaucrats and the higher courts Images of Justice resonates with voices of the North and comes alive through interviews with many of those involved in the cases Inuit and whites defendants judges and prosecutors Eber brings her story up to date with a look at the courts today and presents views of Inuit and non Inuit with regard to future directions She also provides valuable information on the remarkable but little known artists who created the unique works of art the Yellowknife Courthouse Collection of Inuit Sculpture At a time when alternative legal systems for Native peoples are being debated Images of Justice provides a lively accessible account of the northern courts their evolution and their future a changing northern society

The Experimenters Eva Díaz, 2014-12-25 In the years immediately following World War II Black Mountain College an unaccredited school in rural Appalachia became a vital hub of cultural innovation Practically every major artistic figure of the mid twentieth century spent some time there Merce Cunningham Ray Johnson Franz Kline Willem de Kooning Robert Motherwell Robert Rauschenberg Dorothea Rockburne Aaron Siskind Cy Twombly the list goes on and on Yet scholars have tended to view these

artists time at the College as little more than prologue a step on their way to greatness With *The Experimenters* Eva D az reveals the importance of Black Mountain College and especially of three key teachers Josef Albers John Cage and R Buckminster Fuller to be much greater than that D az s focus is on experimentation Albers Cage and Fuller she shows taught new models of art making that favored testing procedures rather than personal expression These methodologies represented incipient directions for postwar art practice elements of which would be sampled and often wholly adopted by Black Mountain students and subsequent practitioners The resulting works which interrelate art and life in a way that imbues these projects with crucial relevance not only reconfigured the relationships among chance order and design they helped redefine what artistic practice was and could be for future generations Offering a bold compelling new angle on some of the most widely studied creative figures of modern times *The Experimenters* does nothing less than rewrite the story of art in the mid twentieth century **'Geschichtszahlen der Phonetik' (1941), together with 'Quellenatlas der Phonetik' (1940)**

Giulio Panconcelli-Calzia,1994-01-01 In this volume two monographs are reprinted in their entirety these texts by the most distinguished phonetician of the first half of this century Giulio Panconcelli Calzia 1878 1966 are even today still the most comprehensive accounts of the 3000 year history of the study of sound by humans An introduction in English on the history of phonetics by the editor provides the setting for these reprints but also for the ongoing research in the field A 16 page bibliography covers phonetic history writing from the last hundred years **New Views on R. Buckminster Fuller**

Hsiao-yun Chu,Roberto G. Trujillo,2009 In this book leading scholars in architecture design history and communications discuss the work of R Buckminster Fuller in the context of the larger social and cultural patterns of the twentieth century

Scientists, Mathematicians and Inventors Doris Simonis,2019-11-04 *Scientists Mathematicians and Inventors* provides biographies of 200 men and women who changed the world by leaving lasting legacies in the fields of science mathematics and scientific invention It fills a gap in the biographical reference shelf by offering far more than basic facts about a scientist s life and work each entry describes not only the immediate effects of the individual s discoveries but also his or her impact on later scientific findings *Focus On: 100 Most Popular American Agnostics* Wikipedia contributors,

Electronic Inventions and Discoveries G.W.A Drummer,2021-09-17 In a remarkably short time electronics has penetrated almost every aspect of modern life and the pace of development in the field shows no sign of slackening One of the first books to cover electronic inventions in depth *Electronic Inventions and Discoveries* Electronics from Its Earliest Beginnings to the Present Day Fourth Edition traces the development of electronics from its earliest beginnings to the present day Spanning a period of two and a half centuries the book presents a mini encyclopedia full of valuable information on practically all inventions in electronics from 1745 to 1996 This fourth edition has been brought up to date and made more attractive by a complete redesign while still maintaining the successful features of previous editions The first nine chapters supply concise yet comprehensive histories of the main areas of the subject Subsequent chapters provide a list of inventions

by subject and succinct descriptions of each invention in date order with over 1 000 references The book concludes with a list of acronyms and abbreviations a list of books on inventions and inventors and a comprehensive index During his seventy years in the field the author has collected a variety of published data to form an up to date systematic review of the major developments in electronics and the pattern of advances in electronic techniques The book forms an essential source of reference to practicing engineers wishing to broaden their knowledge Teachers and students who require a sound background and understanding of electronics will also find the book invaluable Written in an easily understood largely nontechnical language this fascinating and authoritative history of electronic developments will be of great interest to electronic hobbyists and general science readers

Always Inventing Tom L. Matthews, Tom Matthews, 2006 With photographs and quotes from Bell himself this photobiography follows this well known inventor from his childhood in Scotland through his life long efforts to come up with ideas that would improve people s lives Foreword by Bell s great grandson and current chairman of the National Geographic Society 60 two color illustrations *Firsts in Flight* Terrance W.

MacDonald, 2017-09-01 Alexander Graham Bell and his team of innovative young engineers created groundbreaking new technologies during three years of furious activity in Baddeck Nova Scotia in the early 1900s The knowledge and skills of this group allowed them to innovate flight technologies which have continued to be fundamental to aircraft design In this book aviation author Terrance MacDonald puts together for the first time the full story of their achievements Bell s unique group of engineers a mechanical specialist and a military officer built over twenty airplanes which incorporated many new sophisticated technological developments Bell s well known Silver Dart was only one of a long line of his team s experimental airplanes This book describes the aircraft the people and the communities who participated with Bell in his mission to construct a reliable and secure flying machine Over the years the group started to lose members and when the Canadian government refused to purchase aircraft based on Bell s experiments the reconfigured group folded Meanwhile one group member left to found a major aircraft manufacturing operation in the US Bell s team carefully documented all their work and as a consequence there are hundreds of compelling photos from this era The book includes 60 of these images and offers links to early movies documenting these aircraft and their flights

Seven Structural Engineers Félix Candela, 2008 Since 1997 the Structural Engineers Association of New York has hosted a lecture series in honour of the structural engineer Felix Candela This book presents all eight lectures in written form for the first time The lectures cover varying topics related to structural engineering and have been given by some of the most prominent structural engineers working and teaching today Each essay is fully illustrated
