

The background of the cover is a solid red color. Overlaid on this is a complex technical drawing in black lines. It features several circles of different sizes, some of which are divided into four quadrants by a crosshair. These circles are interconnected by a network of straight lines, some of which are longer and more prominent than others. The overall effect is that of a blueprint or a technical sketch, which is a common theme in engineering and manufacturing books.

The contents of this book propose a solution to the current problem in physics specifically concerning the areas of Grand Unification of space time matter and force Grand unification describes the nature of combining the known forces in nature the Electro magnetic strong weak and Gravitational forces into a singular equilibrium That is the need for a framework to predict the behavior of systems at very small scales such as atoms and particles and those of the very large scales such as galaxies stars planets etc and thus far within the articles of physics there is still no reasonable explanation of the origins of

space time and matter The current difficulty in physics is the incompatibility of the two theories which define space time at different levels quantum mechanics predicts the behavior of systems of the atomic world and general relativity which predicts the behavior of systems on the cosmic scale There exists an element in reality which makes it a paradox that is it is not seemingly consistent if small matter is imputed into the equations of large matter and vice versa If for example the information of the moon is inserted into an equation defining its physical properties and if the same is done for an electron then the outcomes of both ought yield an equivalent solution      Cathode-ray Tube Instrument Synthesis System R.
