Geographic Information Research Transatlantic Perspectives:

Geographic Information Research Massimo Craglia, H. Onsrud, 2004-01-14 Geographic Information Research is a broad discipline and is being actively pursued world wide. A group of researchers in both North America and Europe have come together as contributors to this volume as a way of combining their expertise. The emphasis is on matters of political, strategic and organizational importance rather than on technology or systems and covers the theory and social and political practice which goes hand in hand with GIS.

Geographic Information Research Massimo Craglia, Harlan Joseph Onsrud, 1998 Geographic Information Research is a broad discipline and is being actively pursued world wide. A group of researchers in both North America and Europe have come together as contributors to this volume as a way of combining their expertise. The emphasis is on matters of political, strategic and organizational importance rather than on technology or systems and covers the theory and social and political practice which goes hand in hand with GIS.

Geographic Information Science and Public Participation Laxmi Ramasubramanian, 2010-01-23 Computer mediated participation is at the crossroads. In the early heady days of the digital revolution, access to high technologies such as GIS promised the empowerment of marginalized communities by providing data and information that was previously hidden away from public view. To a great extent, this goal has been achieved at least in the U.S. and Western Europe: data about a range of government initiatives and raw data about different aspects of spatial planning such as land use, community facilities, property ownership are available a mouse click away. Now that we, the public, have access to information, are we able to make better plans for the future of our cities and regions? Are we more inclusive in our planning efforts? Are we able to foster collaborative governance structures mediated by digital technologies? In the book, these issues will be discussed using a three-part structure. The first part of the book will be theoretical; it will review the literature in the field, establish a framework to organize the literature and to link three different subject areas: participation and community development, GIS and other related technologies and planning processes. The second part of the book will be a series of success stories, case studies that review actual situations where participatory planning using GIS has enabled community wellbeing and empowerment. These case studies will vary in scale and focus on different planning issues, broadly defined. The final part of the book will step back to review alternative scenarios for the future, exploring where we are headed as the technologies we are using to plan rapidly change.

Advancing Geographic Information Science: The Past and Next Twenty Years Harlan Onsrud, Werner Kuhn, 2016-02-03 This book is the result of invited and competitive submissions to a 2015 academic institute on Advancing Geographic Information Science: The Past and Next Twenty Years. A core goal of the institute was to review the research challenges of the past twenty years and discuss emerging challenges of the next twenty.

The Handbook of Geographic Information Science John P. Wilson, A. Stewart Fotheringham, 2008-04-15 This Handbook is an essential reference and a guide to the rapidly expanding field of Geographic Information Science. Designed for students and researchers who want an in-depth

treatment of the subject including background information Comprises around 40 substantial essays each written by a recognized expert in a particular area Covers the full spectrum of research in GIS Surveys the increasing number of applications of GIS Predicts how GIS is likely to evolve in the near future

European Geographic Information Infrastructures Peter A. Burrough,I. Masser,2003-05-20 Although it is generally accepted that there is a growing demand for multinational and pan European databases there is little available on the problems encountered in different types of multinational geographic information applications nor has there been much discussion of the broader legal and constitutional issues involved at the supranational

The SAGE Handbook of GIS and Society Timothy Nyerges,Helen Couclelis,Robert

McMaster,2011-05-09 The definitive guide to a technology that succeeds or fails depending upon our ability to accommodate societal context and structures This handbook is lucid integrative comprehensive and above all prescient in its interpretation of GIS implementation as a societal process Paul Longley University College London This is truly a handbook a book you will want to keep on hand for frequent reference and to which GIS professors should direct students entering our field Selection of a few of the chapters for individual attention is difficult because each one contributes meaningfully to the overall message of this volume An important collection of articles that will set the tone for the next two decades of discourse and research about GIS and society Journal of Geographical Analysis Over the past twenty years research on the evolving relationship between GIS and Society has been expanding into a wide variety of topical areas becoming in the process an increasingly challenging and multifaceted endeavour The SAGE Handbook of GIS and Society is a retrospective and prospective overview of GIS and Society research that provides an expansive and critical assessment of work in that field Emphasizing the theoretical methodological and substantive diversity within GIS and Society research the book highlights the distinctiveness and intellectual coherence of the subject as a field of study while also examining its resonances with and between key themes and among disciplines ranging from geography and computer science to sociology anthropology and the health and environmental sciences Comprising 27 chapters often with an international focus the book is organized into six sections Foundations of Geographic Information and Society Geographical Information and Modern Life Alternative Representations of Geographic Information and Society Organizations and Institutions Participation and Community Issues Value Fairness and Privacy Aimed at academics researchers postgraduates and GIS practitioners this Handbook will be the basic reference for any inquiry applying GIS to societal issues Interacting with Geospatial Technologies Mordechai (Muki)

Haklay,2015-10-26 This book provides an introduction to HCI and usability aspects of Geographical Information Systems and Science Its aim is to introduce the principles of Human Computer Interaction HCI to discuss the special usability aspects of GIS which designers and developers need to take into account when developing such systems and to offer a set of tried and tested frameworks matrices and techniques that can be used within GIS projects Geographical Information Systems and other applications of computerised mapping have gained popularity in recent years Today computer based maps are common on the World Wide Web mobile phones satellite navigation systems and in various desktop computing packages The more sophisticated packages that allow the manipulation and analysis of geographical information are used in location decisions of new businesses for public service delivery for planning decisions by local and central government Many more applications exist and some estimate the number of people across the world that are using GIS in their daily work at several millions However many applications of GIS are hard to learn and to master This is understandable as until quite recently the main focus of software vendors in the area of GIS was on the delivery of basic functionality and development of methods to present and manipulate geographical information using the available computing resources As a result little attention was paid to

usability aspects of GIS This is evident in many public and private systems where the terminology conceptual design and structure are all centred around the engineering of GIS and not on the needs and concepts that are familiar to the user This book covers a range of topics from the cognitive models of geographical representation to interface design It will provide the reader with frameworks and techniques that can be used and description of case studies in which these techniques have been used for computer mapping application *Creating Spatial Information Infrastructures* Peter van Oosterom,Sisi Zlatanova,2008-04-23 Initiatives such as INSPIRE and the US DHS Geospatial Data Model are working to develop a rich set of standards that will create harmonized models and themes for the spatial information infrastructure However this is only the first step Semantically meaningful models must still be developed in order to stimulate interoperability Creatin The SAGE Handbook of Visual Research Methods Luc Pauwels,Dawn Mannay,2019-12-10 The second thoroughly revised and expanded edition of The SAGE Handbook of Visual Research Methods presents a wide ranging exploration and overview of the field today As in its first edition the Handbook does not aim to present a consistent view or voice but rather to exemplify diversity and contradictions in perspectives and techniques The selection of chapters from the first edition have been fully updated to reflect current developments New chapters to the second edition cover key topics including picture sorting techniques creative methods using artefacts visual framing analysis therapeutic uses of images and various emerging digital technologies and online practices At the core of all contributions are theoretical and methodological debates about the meanings and study of the visual presented in vibrant accounts of research design analytical techniques fieldwork encounters and data presentation This handbook presents a unique survey of the discipline that will be essential reading for scholars and students across the social and behavioural sciences arts and humanities and far beyond these disciplinary boundaries The Handbook is organized into seven main sections PART 1 FRAMING THE FIELD OF VISUAL RESEARCH PART 2 VISUAL AND SPATIAL DATA PRODUCTION METHODS AND TECHNOLOGIES PART 3 PARTICIPATORY AND SUBJECT CENTERED APPROACHES PART 4 ANALYTICAL FRAMEWORKS AND PERSPECTIVES PART 5 MULTIMODAL AND MULTISENSORIAL RESEARCH PART 6 RESEARCHING ONLINE PRACTICES PART 7 COMMUNICATING THE VISUAL FORMATS AND CONCERNS Cybercartography D.R. Fraser Taylor,Tracey Lauriault,2006-01-12 For generations the map has been central to how societies function all over the world Cybercartography is a new paradigm for maps and mapping in the information era Defined as the organization presentation analysis and communication of spatially referenced information on a wide variety of topics of interest to society cybercartography is presented in an interactive dynamic multisensory format with the use of multimedia and multimodal interfaces Cybercartography Theory and Practice examines the major elements of cybercartography and emphasizes the importance of interaction between theory and practice in developing a paradigm which moves beyond the concept of Geographic Information Systems and Geographical Information Science It argues for the centrality of the map as part of an integrated information communication and analytical package This volume is a result of a

multidisciplinary team effort and has benefited from the input of partners from government industry and other organizations The international team reports on major original cybercartographic research and practice from a variety of disciplinary perspectives including the humanities social sciences including human factors psychology cybernetics English literature cultural mediation cartography and geography This new synthesis has intrinsic value for industries the general public and the relationships between mapping and the development of user centered multimedia interfaces Discusses the centrality of the map and its importance in the information era Provides an interdisciplinary approach with contributions from psychology music and language and literature Describes qualitative and quantitative aspects of cybercartography and the importance of societal context in the interaction between theory and practice Contains an interactive CD Rom containing color images links to websites plus other important information to capture the dynamic and interactive elements of cybercartography

Spatial Data Quality Wenzhong Shi,Peter Fisher,Michael F. Goodchild,2002-09-05 As research in the geosciences and social sciences becomes increasingly dependent on computers applications such as geographical information systems are becoming indispensable tools But the digital representations of phenomena that these systems require are often of poor quality leading to inaccurate results uncertainty error propagation and

2014 International Conference on Information GIS and Resource Management ,2014-02-03 The 2014 International Conference on Information GIS and Resource Management ICGRM2014 was held in Guangzhou China from January 3 to January 5 2014 ICGRM2014 aims to bring researchers engineers and students to the areas of GIS and Resource Management ICGRM2014 features unique mixed topics of Computer Science Earth Science Surveying and Mapping and Resources and Environment Science in the context of building healthier ecology and environment The conference will provide a forum for sharing experiences and original research contributions on those topics The proceedings of ICGRM2014 tends to collect the up to date comprehensive and worldwide state of art knowledge on GIS and resource management All of accepted papers were subjected to strict peer reviewing by 2 4 expert referees The papers have been selected for this proceedings based on originality significance and clarity for the purpose of the conference The selected papers and additional late breaking contributions to be presented will make an exciting technical program on conference The conference program is extremely rich featuring high impact presentation We hope this conference will not only provide the participants a broad overview of the latest research results on GIS and resource management but also provide the participants a significant platform to build academic connections The Technical Program Committee worked very hard to have all papers reviewed before the review deadline The final technical program consists of 57 papers which are divided into four sessions The proceedings were published as a volume in by DEStech publishing Inc
