Secretariat, 2002 The UN has identified 49 nations as being least developed countries LDCs in terms of low GDP per capita and a high degree of economic vulnerability This report is based on a new set of poverty estimates which enable comparative analysis of the relationship between poverty development and globalisation The report finds that extreme poverty is pervasive in most LDCs and is highest in those LDCs dependent on primary commodity exports

Most LDCs are caught in an international poverty trap and the cycle of economic stagnation and poverty is being reinforced by international trade and finance relationships The report argues that current national and international poverty reduction strategies are not grasping the opportunities for sustained economic development and an alternative approach is suggested A supportive international environment is required which recognises the interdependence between the socio economic marginalisation of the poorest countries and the increasing polarisation of the global economy This should include the delivery of more effective aid and debt relief as well as a review of international commodity policy Health in the Americas 2002 Pan American Health Organization, 2002 The 2002 edition of this quadrennial publication presents a regional analysis of the health situation and trends in the Americas region as well as for each of the 47 countries and territories in the region It is published in two volumes and covers mainly the years from 1997 2000 This edition focuses upon the inequalities in health Volume One looks at issues dealing with leading health and health related indicators ranging from mortality and changes in life expectancy to the relationship between health and income distribution It also considers current health conditions and trends including disease prevention and control health promotion and environmental protection Volume Two examines each country's overall health conditions including institutional organisation health regulations and the overall operation of health China Perspectives ,2004 Building a Future on Peace and Justice Kai Ambos, Judith Large, Marieke services Wierda, 2008-12-04 Results of the 2007 Nuremberg Conference on Peace and Justice Tensions between peace and justice have long been debated by scholars practitioners and agencies including the United Nations and both theory and policy must be refined for very practical application in situations emerging from violent conflict or political repression Specific contexts demand concrete decisions and approaches aimed at redress of grievance and creation of conditions of social justice for a non violent future. There has been definitive progress in a world in which blanket amnesties were granted at times with little hesitation There is a growing understanding that accountability has pragmatic as well as principled arguments in its favour Practical arguments as much as shifts in the norms have created a situation in which the choice is increasingly seen as which forms of accountability rather than a stark choice between peace and justice It is socio political transformation not just an end to violence that is needed to build sustainable peace This book addresses these dilemmas through a thorough overview of the current state of legal obligations discussion of the need for a holistic approach including development analysis of the implications of the coming into force of the ICC and a series of hard case studies on internationalized and local approaches devised to navigate the tensions between peace and justice The DAC Journal, 2002 Geographical Distribution of Financial Flows to Aid Recipients 2002 OECD, 2002-01-17 This publication provides comprehensive data on the volume origin and types of aid and other resource flows to over 180 recipient countries including countries in transition in eastern Europe
