**The Economic Geography of Production, Trade, and Development** Karsten Junius, 1999 Technological progress has led to rapidly declining costs for transport and communication trade integration via NAFTA or the EU reduces the costs of economic distance even further This can have substantial consequences for the distribution of industries between peripheral and core regions Based on recent advances in modeling economic geography this study shows the forces that influence the degree of economic concentration in the course of economic development and globalization The models are based on trade costs and economies and diseconomies of scale all of which are found to be empirically relevant factors for spatial concentration The study finds that in early stages of economic development rising GDP levels and lower trade costs increase spatial concentration while they decrease concentration in later stages so that it peaks at per capita incomes of around US 12 000 Moreover the historic degree of spatial concentration is found to have a long lasting influence in the cross section of

countries under study      *Contemporary Issues in Urban and Regional Economics* Lawrence Yee, 2005 If all politics are local then all economics are regional and local Globalisation for all its mystery and so called inevitability has its foundations and bloodlines in urban and regional economics The economic impacts of poverty housing transportation education and crime are included This new book includes within its scope multiplier and impact analysis input output models growth theory migration urban and regional labour markets urban and regional public policy regional devolution small firms policy and foreign direct investment      *International Trade Issues* Robert V. research The second part examines the cases of five countries Bulgaria Estonia Hungary Romania and Slovenia and the final part includes three comparative analyses which explain the underlying factors that determine the changing patterns of location of manufacturing activity the adjustment pattern of regional wages and adaptation processes in border regions in the five countries **International Encyclopedia of Geography, 15 Volume Set** Noel Castree, Michael F.

Martin Jones, Anssi Paasi, 2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region This idea prioritises both the intellectual and the practical development of regional studies This book drives the discussion further It stresses the complex forms of agency advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations This book was based on a special issue of Regional Studies **Adjusting to EU Enlargement** Constantine A. Stephanou, 2006-01-01 Before the latest EU enlargement substantial changes in the integration process were predicted as a result of the accession of 10 new member states with some forecasting cataclysmic consequences This book the first ex post assessment of EU enlargement provides evidence to the contrary while also providing examples in which the new members have been able to

influence the EU policy output with their liberal attitudes on economic and social policy      **Industrial Location and Economic Integration** Barbara Dluhosch,2000-01-01 Barbara Dluhosch identifies and analyses the main pillars of the new economic geography She then presents an essentially new approach focusing on the decline of communication costs and introduces cost competition and technological choice which have largely been neglected The policy implications of this are critically evaluated by drawing on experiences of European economic integration BOOK JACKET      **Economic Integration and Spatial Location of Production** Miroslav N.
