Geography Of Religions:

The Geography of Religion Roger W. Stump, 2008-04-04 The only book of its kind this balanced and accessibly written text explores the geographical study of religion Roger W Stump presents a clear and meticulous examination of the intersection of religious belief and practice with the concepts of place and space He begins by analyzing the factors that have shaped the spatial distributions of religious groups including the seminal events that have fostered the organization of religions in diverse hearths and the subsequent processes of migration and conversion that have spread religious beliefs The author then assesses how major religions have diversified as they have become established in disparate places producing a variety of religious systems from a common tradition Stump explores the efforts of religious groups to control secular space at various scales relating their own uses of particular spaces and the meanings they attribute to space beyond the boundaries of their own communities Examining sacred space as a diverse but recurring theme in religious belief the book considers its role in religious forms of spatial behavior and as a source of conflict within and between religious groups Refreshingly jargon free and impartial this text provides a broad comparative view of religion as a focus of geographical inquiry **Sacred**

Geography of Religion Susan Hitchcock, Mpho Tutu, Desmond Tutu, John Esposito, 2004-12 **Geography, Religion, Gods, and Saints in the Eastern Mediterranean** Erica Ferg, 2020-01-16 Geography Religion Gods and Saints in the Eastern Mediterranean explores the influence of geography on religion and highlights a largely unknown story of religious history in the Eastern Mediterranean In the Levant agricultural communities of Jews Christians and Muslims jointly

venerated and largely shared three important saints or holy figures Jewish Elijah Christian St George and Muslim al Khi r These figures share peculiar characteristics such as associations with rain greenness fertility and storms Only in the Eastern Mediterranean are Elijah St George and al Khi r shared between religious communities or characterized by these same agricultural attributes attributes that also were shared by regional religious figures from earlier time periods such as the ancient Near Eastern Storm god Baal Hadad and Levantine Zeus This book tells the story of how that came to be and suggests that the figures share specific characteristics over a very long period of time because these motifs were shaped by the geography of the region Ultimately this book suggests that regional geography has influenced regional religion that Judaism Christianity and Islam are not historically or textually speaking separate religious traditions even if Jews Christians and Muslims are members of distinct religious communities and that shared religious practices between members of these and other local religious communities are not unusual Instead shared practices arose out of a common geographical environment and an interconnected religious heritage and are a natural historical feature of religion in the Eastern Mediterranean This volume will be of interest to students of ancient Near Eastern religions Judaism Christianity Islam sainthood agricultural communities in the ancient Near East Middle Eastern religious and cultural history and the relationships between geography and religion

Passover seder to the Christian celebration of Christ's Resurrection Here too are excerpts from each religion's texts and evocative essays by eminent scholars on what their faith means to them and how it has shaped their view of life In all Geography of Religion reveals a vivid map of the paths we follow toward a higher truth The Geography of Religion is an invitation to understand the great religions of the world This gorgeously illustrated book is an authoritative text that portrays the great religions of humankind with vivid photographs tracing each from its ancient roots to its role in modern life Eminent scholars share the faiths they have lived and studied For each of 5 major religions explore the landscapes areas and cultures where these faiths took hold and flourished See them spread around the world survive conflict and translate into other enduring faiths based on their geographic location and cultures Learn what it means to be a Hindu and bathe in the sacred Ganges for a Buddhist to revere a statue of the Enlightened One for a Muslim to trek to Mecca for Christian martyrs to welcome death Beautiful maps photographs and art illuminate the history of each religion Sacred Words and Worlds, 2011-10-14 This book examines the scholarly genre of geographia sacra in early modern Europe tracing its contours the outlooks and concerns of its practitioners as well as the intersections of religion and geography in an age that saw dramatic revolutions in both fields Sacred Places and Profane Spaces Jamie S. Scott, Paul S. Housley, 1991-09-30 The editors and contributors to this pioneering volume have focused the lens of geography on new territory as they inquire critically into the spatial dimensions of Judaism Christianity and Islam making this interdisciplinary project truly a new idea in the study of comparative religion and human geography Editors Jamie Scott and Paul Simpson Housley have organized the study into three broad areas of inquiry and have coined the term Geographics to encompass the three distinct yet interrelated spatial dimensions implicated in the study of religion The first area concerns the literal role played by specific sites regions or geographical phenomena in the development of the three religions The focus here is on city wilderness river valley and mountain as well as flood earthquake whirlwind and famine with attention devoted to methodological epistemological and ontological issues The symbolic or interpreted role played by these same specific entities in the three religions is the second notion to be explored The third focus is an inquiry into the geography of prophetic and apocalyptic visions and the role of geographical imagination in the development of religious self understanding This interface of natural and historical geography with the geography of the prophetic and apocalyptic imagination produces a graphic sometimes terrifying landscape The volume's nine essayists have approached their chapters with this threefold schematization in mind so that the book consists of one study devoted to each of these dimensions in Judaism Christianity and Islam as well as an introduction and afterword by the editors Each essay discusses the relationship of the spatial and the sacred in scripture and in subsequent literary and theological reflection upon scriptural themes The range of topics and variety of approaches used reflect the interpretive ambiguities that stem from the unique social political and economic functions conferred on places and spaces of particular significance in the life and thought of a religious tradition or community The section on Judaism explores

Jewish agricultural settlements in Palestine the Temple Mount al haram al sharif and the Garden of Eden Indepth looks at Finland women s geography and the apocalyptic world comprise the section on Christianity Iranian feasting and pilgrimage circuits modern Egypt and sacred geography are assessed in the final section on Islam This carefully edited innovative study offers a unique approach to the study of religion and will be read profitably by scholars and students of religion and geography

Emerging Geographies of Belief Catherine Brace, 2010-10-12 This interdisciplinary book presents new research from international scholars that explores questions of belief faith and religion Focusing on theoretically informed cultural geographical and historical analyses of faith belief religion society and space the book presents new and revised theoretical approaches and methodologies grounded in rigorous empirical research both contemporary and historical The volume takes a deliberately eclectic approach reflecting the complex interactions of the political and poetic dimensions of sacredness in contemporary societies Taking this research agenda forward this book explores how religious beliefs inform and construct social identities public knowledge and modes of governance In particular the book meets an urgent need for a critical understanding of how terms such as religion faith fundamentalism and secularism for example inform public debates and foster constructive engagements both between faith groups and between people of faith and people of no faith The essays in *Emerging Geographies of Belief* also show that religion cannot be mapped neatly onto faith or belief We attempt to tease out the different circumstances in which for example belief can operate without religious adherence or faith can inspire social action in geographies of hope The geography of the title relates to an overarching concern with space and spatiality rather than describing a single disciplinary approach Our concern with belief faith and religion operates at different temporal and spatial scales in different localities from the contemporary appeal to a more global sense of responsibility to a historically situated account of faith led educational practices This reflects more generally the so called spatial turn in the social sciences and humanities But despite this wide historical and geographical sweep the authors share some key concerns This collection is unique in combining theoretical conceptual and discursive approaches to the emerging geographies of belief with substantive examples of the intersection of belief faith and religion with aspects of everyday life Discussions of the potential subversive and prophetic capacities of faith belief and religion sit alongside consideration of how these have become implicated in the spaces and performances of hope It provides a critique of the situationist and substantive approaches to religion along with insights into the role of faith in education community and social work It considers the practices of remembrance representation and pilgrimage and the place of religion in contemporary identity politics In sum the book problematises the seemingly simple categories of faith religion and belief calling attention to how these are mobilised and implicated differently in different circumstances In addressing these themes the book provides a key theoretical resource but crucially goes on to show how multiple perspectives on belief however defined can be applied in practice Whilst there has been much contemporary work on the individual areas covered by the book they have not been brought together before to

provide a dynamic insight into issues of the most pressing relevance
