Five Proofs for the Existence of God Edward Feser, 2017-08-18 Five Proofs of the Existence of God provides a detailed updated exposition and defense of five of the historically most important but in recent years largely neglected philosophical proofs of God's existence the Aristotelian proof the Neo-Platonic proof the Augustinian proof the Thomistic proof and the Rationalist proof This book also offers a detailed treatment of each of the key divine attributes unity simplicity eternity omnipotence omniscience perfect goodness and so forth showing that they must be possessed by the God whose existence is demonstrated by the proofs Finally it answers at length all of the objections that have been leveled against these proofs This book offers as ambitious and complete a defense of traditional natural theology as is currently in print Its aim is to vindicate the view of the greatest philosophers of the past thinkers like Aristotle Plotinus Augustine Aquinas Leibniz and many others that the existence of God can be established with certainty by way of purely rational arguments It thereby serves as a refutation both of atheism and of the fideism which gives aid and comfort to atheism
