

received by Lord Albemarle for his capture of Havana in 1762? To be sure, this is of interest to specialists in British history, but are they likely to read a 1600 page book on Cuba? Does it really matter whether the rebels and/or government officials rode to military camps in Buicks or Cadillacs? Although the explanations of policy decisions in other countries dealing with Cuba are useful in placing the events in perspective, the detailed accounts of American and Spanish policy making in 1898 constitute diversions from the mainstream of Cuban developments, and represent a restatement of material that is readily available.

Inevitably in a work of this size, there are bound to be a few slips. For example, upon encountering references to Jose Marti's arrest as a youth, the reader is surprised to learn on page 295 that he was sentenced to six years in prison, having been told on page 256 that his term was six months. At one point (p. 313) Charles Dana rather than Joseph Pulitzer is identified as the owner of the *New York World*, although this is corrected in other references to the paper. A series of footnotes in chapter LXII to 1942 *Foreign Relations* cite volume V instead of volume VI (see p. 732 for example).

More important, however, is the matter of footnote citations and the use of quotations. A random check revealed several instances when an omission in a quotation was not indicated by ellipses (see for example, the quotations from George Cabot Lodge on p. 1180, from Lee Lockwood on p. 1326, from Ruby Hart Phillips on p. 607, and from *Foreign Relations*, 1942 on p. 732). In addition, in the quote from Lodge (p. 1180) the word "trucks" has been changed to "lorries" without the use of brackets or any indication that the phraseology has been altered. Professor Thomas cites only the page numbers of *Foreign Relations* volumes, without an identification of the document involved. The terminology "evidence of John Smith" is never explained, leaving the reader in doubt as to whether this means an interview, a manuscript, or documentation in private hands (and if the latter, what type of documentation). The bibliography lists only secondary works, and hence fails to collect, explain, or identify the location of other types of sources.

Professor Thomas has produced a formidable and extremely valuable reference work, but it must be used with caution. Unfortunately its readership will doubtless be more limited than should be the case, due to its size. It merits attention by all those interested in Cuba, for it provides a handy compendium of information available in the vast array of secondary works on Cuba. The portions on the early Castro years represent a significant contribution to an understanding of the complex currents of this era.

European economic history Elias H. Tuma, 1971 A Bibliography of Historical Economics to 1980 Deirdre N. McCloskey, George K. Hersch, Jr, 1990

Historians and economists will find here what their fields have in common: the movement since the 1950s known variously as cliometrics, economic history or historical economics. A leading figure in the movement, Donald McCloskey, has compiled with the help of George Hersch and a panel of distinguished advisors a highly comprehensive bibliography of historical economics covering the period up until 1980. The book will be useful to all economic historians as well as quantitative historians, applied economists, historical demographers, business historians, national income accountants and social historians.

An Economic and Social History of the Netherlands, 1800-1920 Michael Wintle, 2000-09-21

An Economic and Social History of the Netherlands 1800-1920 provides a comprehensive account of Dutch history from the late eighteenth to the early twentieth century, examining population and health, the economy and socio-political history. The Dutch experience in this period is fascinating and instructive: the country saw extremely rapid population growth, awesome death rates, staggering fertility, some of the fastest economic growth in the world, a uniquely large and efficient service sector, a vast and profitable overseas empire, characteristic pillarization and relative tolerance. Michael Wintle also examines the lives of ordinary people: what they ate, how much they earned, what they thought about public affairs and how they wooed and wed. This book will be of central importance to Dutch specialists as well as European historians more generally.

The Journal of European Economic History, 1980 **The Individual Vs. The Public Interest** Richard M. Alston, 2019-07-11

Central to the controversy surrounding U.S. natural resources policy is the conflict between environmentalists and proponents of development. Examining the evolution of the philosophies underlying that conflict, Dr. Alston traces the failure to achieve a unified resources policy to the seemingly incompatible ideological positions held by resource specialists, interest groups, policymakers, economists and foresters. His analysis goes beyond his case study of national forest policy to focus on an ancient question basic to policy making in a democratic society: How can government provide a sociopolitical framework that accommodates both individual interests and the need for unity in a collective existence? Only within this broader framework, he argues, is it possible to determine the proper division between private and public resource management or the proper role of government in natural resources planning. Incorporating a critical evaluation of

the development of classical and neoclassical economic theory this work makes clear the need to strike a balance between a strictly individualistic and an ecological point of view Dr Alston illustrates the ideological conflicts that complicate resources planning and explores the possibility of a new ideology capable of accommodating and integrating differences to meet the complex needs of society *Newsletter* United States.
