tradition get little guidance on this aspect of research from the positivist centered training they receive This book is an authoritative examination of the concepts and processes underlying the design of an interpretive research project Such an approach to design starts with the recognition that researchers are inevitably embedded in the intersubjective social processes of the worlds they study In focusing on researchers theoretical ontological epistemological and methods choices in designing research projects Schwartz Shea and Yanow set the stage for other volumes in the Routledge Series on Interpretive Methods They also engage some very practical issues such as ethics reviews and the structure of research proposals This concise guide explores where research questions come from criteria for evaluating research designs how interpretive researchers engage with world making context systematicity and flexibility reflexivity and positionality and such contemporary issues as data archiving and the researcher's body in the field

How to Prepare a Research Proposal

David R. Krathwohl, 1988 The public assumes the researcher spends the day dreaming up and trying out creative ideas In reality proposal development is an invisible but critical barrier over which even a good researcher may tumble This book is intended to lower that barrier It should increase first trial recognition of good ideas and ensure that rejections do not result because a proposal poorly represented either the ideas the investigator or both
