*Gender, Work and Wages in Industrial Revolution Britain* Joyce Burnette, 2008-04-17 A major study of the role of women in the labour market of Industrial Revolution Britain It is well known that men and women usually worked in different occupations and that women earned lower wages than men These differences are usually attributed to custom but Joyce Burnette here demonstrates instead that gender differences in occupations and wages were instead largely driven by market forces Her findings reveal that rather than harming women competition actually helped them by eroding the power that male workers needed to restrict female employment and minimising the gender wage gap by sorting women into the least strength intensive occupations Where the strength requirements of an occupation made women less productive than men occupational segregation maximised both economic efficiency and female incomes She shows that women's wages were then market wages rather than customary and the gender wage gap resulted from actual differences in productivity

**Only Paradoxes to Offer** Joan Wallach Scott, 2009-06-30 When feminists argued for political rights in the context of liberal democracy they faced an impossible choice On the one hand they insisted that the differences between men and women were irrelevant for citizenship On the other hand by the fact that they acted on behalf of women they introduced the very idea of difference they sought to eliminate This paradox the need both to accept and to refuse sexual difference in politics was the constitutive condition of the long struggle by women to gain the right of citizenship In this new book remarkable in both its findings and its methodology award winning historian Joan Wallach Scott reads feminist history in terms of this paradox of sexual difference Focusing on four French feminist activists Olympe de Gouges who wrote the Declaration of the Rights of Woman and Citizen during the French Revolution Jeanne Deroin a utopian socialist and candidate for legislative office in 1848 Hubertine Auclert the suffragist of the Third Republic and Madeleine Pelletier a psychiatrist in the early twentieth century who argued that women must virilize themselves in order to gain equality Scott charts the repetitions and variations in feminist history Again and again feminists tried to prove they were individuals according to the standards of individuality of their day Again and again they confronted the assumption that individuals were men But when sexual difference was taken to be a fundamental difference when only men were regarded as individuals and thus as citizens how could women also be citizens The imaginative and courageous answers feminists offered to these questions are the subject of this engaging book
