Tipping Points John Bissell, Camila Caiado, Sarah Curtis, Michael Goldstein, Brian Straughan, 2015-06-15 This book focuses on the modelling of contemporary health and social problems especially those considered a major burden to communities governments and taxpayers such as smoking alcoholism drug use and heart disease Based on a series of papers presented at

a recent conference hosted by the Leverhulme funded Tipping Points project at the University of Durham this book illustrates a broad range of modelling approaches Such a diverse collection demonstrates that an interdisciplinary approach is essential to modelling tipping points in health and social problems and the assessment of associated risk and resilience Sense and Nonsense Kevin N. Laland, Gillian R. Brown, 2011-04-07 This book asks whether evolution can help us to understand human behaviour and explores diverse evolutionary methods and arguments It provides a short readable introduction to the science behind the works of Dawkins Dennett Wilson and Pinker It is widely used in undergraduate courses around the world

Handbook of Cultural Psychology, Second Edition Dov Cohen, Shinobu Kitayama, 2020-09-07 Now completely revised over 90% new this handbook offers the authoritative presentation of theories methods and applications in the dynamic field of cultural psychology Leading scholars review state of the art empirical research on how culture affects nearly every aspect of human functioning The volume examines how topics fundamental to psychology such as cognition emotion motivation development and mental health are influenced by cultural meanings and practices It also addresses the psychological and evolutionary underpinnings of cultural stability and change The second edition reflects important advances in cultural neuroscience and an increasing emphasis on application among many other changes As a special bonus purchasers of the second edition can download a supplemental e book featuring several notable highly cited chapters from the first edition New to This Edition Most chapters are new reflecting nearly a decade of theoretical and methodological developments Cutting edge perspectives on culture and biology including innovative neuroscientific and biopsychological research Section on economic behavior with new topics including money negotiation consumer behavior and innovation Section on the expansion of cultural approaches into religion social class subcultures and race Reflects the growth of real world applications in such areas as cultural learning and adjustment health and well being and terrorism **Sense and Nonsense** Gillian R. Brown, Kevin N. Lala, 2024-10-08 Evolutionary theory is one of the most wide ranging and inspiring scientific ideas and it offers a battery of methods that can be used to interpret human behaviour However researchers disagree about the best ways to use evolution to explore humanity and a number of schools of thought have emerged Sense and Nonsense third edition provides an introduction to the ideas methods and findings of five such schools namely sociobiology human behavioural ecology evolutionary psychology cultural evolution and gene culture coevolution In this revised and updated edition of their successful monograph Brown and Lala provide a balanced and rigorous analysis that scrutinises both the evolutionary arguments and the allegations of the critics carefully guiding the reader through the mire of confusing terminology claim and counter claim and polemical statements This readable and informative introductory book will be of use to undergraduate and postgraduate students for example in psychology anthropology and zoology as well as experts on one approach who would like to know more about the other perspectives and lay persons interested in evolutionary explanations of human behaviour Having completed the book the reader will feel better placed to assess the legitimacy of claims made

about human behaviour under the name of evolution and to make judgements as to what is sense and what is nonsense

**Nature Revealed** Edward O. Wilson, 2006-03 Two time Pulitzer Prize winner Edward O Wilson is one of the leading biologists and philosophical thinkers of our time In this compelling collection Wilson's observations range from the tiny glands of ants to the nature of the living universe Many of the pieces are considered landmarks in evolutionary biology ecology and behavioral biology Wilson explores topics as diverse as slavery in ants the genetic basis of societal structure the discovery of the taxon cycle the original formulation of the theory of island biogeography a critique of subspecies as a unit of classification and the conservation of life's diversity Each article is presented in its original form dating from Wilson's first published article in 1949 to his most recent exploration of the natural world Preceding each piece is a brief essay by Wilson that explains the context in which the article was written and provides insights into the scientist himself and the debates of the time This collection enables us to share Wilson's various vantage points and to view the complexities of nature through his eyes Wilson aficionados along with readers discovering his work for the first time will find in this collection a world of beauty complexity and challenge

*Adaptation and Human Behavior* Napoleon Chagnon, 2017-09-08 This volume presents state of the art empirical studies working in a paradigm that has become known as human behavioral ecology The emergence of this approach in anthropology was marked by publication by Aldine in 1979 of an earlier collection of studies edited by Chagnon and Irons entitled *Evolutionary Biology and Human Social Behavior An Anthropological Perspective* During the two decades that have passed since then this innovative approach has matured and expanded into new areas that are explored here The book opens with an introductory chapter by Chagnon and Irons tracing the origins of human behavioral ecology and its subsequent development Subsequent chapters written by both younger scholars and established researchers cover a wide range of societies and topics organized into six sections The first section includes two chapters that provide historical background on the development of human behavioral ecology and compare it to two complementary approaches in the study of evolution and human behavior evolutionary psychology and dual inheritance theory The second section includes five studies of mating efforts in a variety of societies from South America and Africa The third section covers parenting with five studies on societies from Africa Asia and North America The fourth section breaks somewhat with the tradition in human behavioral ecology by focusing on one particularly problematic issue the demographic transition using data from Europe North America and Asia The fifth section includes studies of cooperation and helping behaviors using data from societies in Micronesia and South America The sixth and final section consists of a single chapter that places the volume in a broader critical and comparative context The contributions to this volume demonstrate with a high degree of theoretical and methodological sophistication the maturity and freshness of this new paradigm in the study of human behavior The volume will be of interest to anthropologists and other professions working on the study of cross cultural human behavior

Behavioral Economics Edward Cartwright, 2024-01-22 Over the last few decades behavioral economics has revolutionized

the discipline It has done so by putting the human back into economics by recognizing that people sometimes make mistakes care about others and are generally not as cold and calculating as economists have traditionally assumed The results have been exciting and fascinating and have fundamentally changed the way we look at economic behavior This textbook introduces all the key results and insights of behavioral economics to a student audience Ideas such as mental accounting prospect theory present bias inequality aversion and learning are explained in detail These ideas are also applied in diverse settings such as auctions stock market crashes charitable donations and health care to show why behavioral economics is crucial to understanding the world around us Consideration is also given to what makes people happy and how we can potentially nudge people to be happier This new edition contains expanded and updated coverage of several topics and applications including fraud and cybercrime cryptocurrency public health messaging and the COVID 19 pandemic The companion website is also updated with a range of new questions and worked examples This book remains the ideal introduction to behavioral economics for advanced undergraduate and graduate students

**Genes and Behaviour** David J. Hosken, John Hunt, Nina Wedell, 2019-02-06 Provides a broad snapshot of recent findings showing how the environment and genes influence behavior The great debate of nature versus nurture rages on but our understanding of the genetic basis of many behaviors has expanded over the last decade and there is now very good evidence showing that seemingly complex behaviours can have relatively simple genetic underpinnings but also that most behaviours have very complicated genetic and environmental architecture Studies have also clearly shown that behaviors and other traits are influenced not just by genes and the environment but also by the statistical interaction between the two This book aims to end the nature versus nurture argument by showing that behaviors are nature and nurture and the interaction between the two and by illustrating how single genes can explain some of the variation in behaviors even when they are seemingly complex *Genes and Behaviour Beyond Nature Nurture* puts to rest the nature versus nurture dichotomy providing an up to date synopsis of where we are how far we've come and where we are headed It considers the effects of a dual inheritance of genes and culture and genes and social environment and highlights how indirect genetic effects can affect the evolution of behavior It also examines the effect of non self genes on the behavior of hosts shines a light on the nature and nurturing of animal minds and invites us to embrace all the complexity nature and nurture generates and more Explores exciting new findings about behavior and where we go from here Features contributions by top scholars of the subject Seeks to end the nature versus nurture debate forever *Genes and Behaviour Beyond Nature Nurture* is a unique and eye opening read that will appeal to Ph D Students post doctoral fellows and researchers in evolution and behavior Additionally the book will also be of interest to geneticists sociologists and philosophers

**Essentials of Human Behavior** Elizabeth D. Hutchison, Leanne Wood, 2020-12-17 *Essentials of Human Behavior* combines Elizabeth D Hutchison's two best selling *Dimensions of Human Behavior* volumes into a single streamlined volume for understanding human behavior The text presents a multidimensional framework integrating person environment and time to show students the dynamic changing nature of person in environment In this Third Edition Hutchison is joined by new co author Leanne Wood Charlesworth who uses her practice and teaching experience to help organize the book's cutting edge research and bring it into the classroom The text will thoroughly support students understanding of human behavior theories and research and their applications to social work engagement assessment intervention and evaluation across all levels of practice This title is accompanied by a complete teaching and learning package

**The Biological Mind** Justin Garson, 2014-10-17 For some biology explains all there is to know about the mind Yet many big questions remain is the mind shaped by genes or the environment If mental traits are the result of adaptations built up over thousands of years as evolutionary psychologists claim how can such claims be tested If the mind is

a machine as biologists argue how does it allow for something as complex as human consciousness The Biological Mind A Philosophical Introduction explores these questions and more using the philosophy of biology to introduce and assess the nature of the mind Drawing on the four key themes of evolutionary biology molecular biology and genetics neuroscience and biomedicine and psychiatry Justin Garson addresses the following key topics moral psychology altruism and levels of selection evolutionary psychology and modularity genes environment and the nature nurture debate neuroscience reductionism and the relation between biology and free will function selection and mental representation psychiatric classification and the maladapted mind Extensive use of examples and case studies is made throughout the book and additional features such as chapter summaries annotated further reading and a glossary make this an indispensable introduction to those teaching philosophy of mind and philosophy of psychology It will also be an excellent resource for those in related fields such as biology

**Theory in Social and Cultural Anthropology** R. Jon McGee, Richard L. Warms, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why if you will In response SAGE Reference plans to publish the two volume Theory in Social and Cultural Anthropology An Encyclopedia Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader's Guide groups entries thematically and each entry is followed by Cross References In the electronic version the Reader's Guide combines with the Cross References and a detailed Index to provide robust search and browse capabilities An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion

*Law, Economics and Evolutionary Theory* Peer Zumbansen, Galf-Peter Calliess, 2011-01-01 Evolutionary theory belongs to the rare species of theories that are simultaneously fundamental and over arching implicating as it does numerous life contexts as well as an array of scholarly disciplines Armed with a profound grasp of evolutionary theory and its implications to social research Professors Zumbansen and Calliess have mobilized an appropriately diverse and truly stellar group of academics to investigate how this theory may provide new insights about law economics and their inter relations

Cast against an especially broad intellectual backdrop set by the editors this volume is sure to become a standard reference in literature Amir N Licht Radzyner School of Law Israel Zumbansen and Calliess have done a wonderful job in assembling papers from the leading scholars in the field who draw on evolutionary approaches for explaining developments in both economics and the law Anybody interested in issues of institutional change will be inspired by the wealth of ideas and the diversity of perspectives Stefan Voigt University of Hamburg Germany Law and economics has arguably become one of the most influential theories in contemporary legal theory and adjudication The essays in this volume authored by both legal scholars and economists constitute lively and critical engagements between law and economics and new institutional economics from the perspectives of legal and evolutionary theory The result is a fresh look at core concepts in law and economics such as institutions institutional change and market failure that offer new perspectives on the relationship between economic and legal governance The increasingly transnational dimension of regulatory governance presents lawyers economists and social scientists with an unprecedented number of complex analytical and conceptual questions The contributions to this volume engage with legal theory new institutional economics economic sociology and evolutionary economics in an interdisciplinary assessment of the capacities and limits of the state markets and institutions Drawing as well upon legal sociology and the philosophy of law the authors expand and transform the known terrain of law and economics by applying evolutionary theory to both law and economics from a domestic and transnational perspective Legal scholars evolutionary and regulatory theorists economists economic sociologists economic historians and political scientists will find this cutting edge volume both challenging and engaging
