Genetic Experiential Factors In Percep:

Genetic and Experiential Factors in Perception Robert A. McCleary,1970 **Biology of Perceptual Systems** Edward Carterette,2012-12-02 Handbook of Perception Volume III Biology of Perceptual Systems reviews the literature on the biological aspects of human perception with emphasis on perceptual systems and elements of sensory physiology This volume is organized into 19 chapters and begins with a discussion of energy transduction detection and discrimination along with the properties of neurons alone and as conjoined in nets The focus then shifts to psychogenesis the relatively new field of ethology and the natural diversity and evolutionary divergence of sensory systems The chapters that follow examine the genetics of behavior the facts and theories about the way in which animals and men construct patterned stimulation of receptors into significant objects and the structure and function of sensory systems on which vertebrates depend for their construction of the varieties of experience The book methodically introduces the reader to chemoreception tasting and smelling cutaneous mechanoreception of position velocity transients active texture perception mechanisms of spatial orientation and of motion in space thermoreception vision and audition In almost every case the underlying physiological mechanisms are related to the psychophysical or perceptual observations This book is a valuable resource for psychologists biologists and natural scientists as well as for those who are interested in the biology of human perception **Social and Psychological Aspects of Applied Human Genetics** James R. Sorenson,1972 About 1400 references to books and journal articles primarily concerned with social and psychological issues of applied human genetics in general and genetic counseling in particular Excludes literature dealing with ethical or proscriptive areas Also covers foreign language titles Citations mostly from 1960 s through 1972 Classified arrangement No index *The Nature of Thought* P. W. Jusczyk,R. M. Klein,2014-05-22 First published in 1980 This is a collection of lectures around Professor Emeritus Don O Hebb of Dalhousie University on the major trends in cognitive psychology It includes essays on Hebb s ideas and impact on current psychological theorizing his structure of thought and a collection under the section of Information Processing Analysis

Visual Coding and Adaptability C. S. Harris, 2014-02-25 First published in 1980 This book is the first integrated presentation of two of the most active areas in present day visual research Its inspiration and nucleus were provided by two Optical Society of America symposia one on the coding of spatial information in the visual system and the other on adaptability of the visual system Although the two topics might seem at first sight only distantly related they are actually extensively intertwined in contemporary research Some investigators focus on mechanisms of visual analysis but rely on experimental modification of perception to reveal the nature of the coding others focus on perceptual modification but look at analytic elements for indications about what it is that gets modified Likewise most of the chapters in this book combine in varying proportions both themes Adult human perception is the primary concern but illuminating data from animal infant and neurophysiological studies are also discussed **Perceiving in Depth, Volume 1: Basic Mechanisms** Ian P.

Howard, 2012-01-27 The three volume work *Perceiving in Depth* is a sequel to *Binocular Vision and Stereopsis* and to *Seeing in Depth* both by Ian P Howard and Brian J Rogers This work is much broader in scope than the previous books and includes mechanisms of depth perception by all senses including aural electrosensory organs and the somatosensory system Volume 1 reviews sensory coding psychophysical and analytic procedures and basic visual mechanisms Volume 2 reviews stereoscopic vision Volume 3 reviews all mechanisms of depth perception other than stereoscopic vision The three volumes are extensively illustrated and referenced and provide the most detailed review of all aspects of perceiving the three dimensional world Volume 1 starts with a review of the history of visual science from the ancient Greeks to the early 20th century with special attention devoted to the discovery of the principles of perspective and stereoscopic vision The first chapter also contains an account of early visual display systems such as panoramas and peepshows and the development of stereoscopes and stereophotography A chapter on the psychophysical and analytic procedures used in investigations of depth perception is followed by a chapter on sensory coding and the geometry of visual space An account of the structure and physiology of the primate visual system proceeds from the eye through the LGN to the visual cortex and higher visual centers This is followed by a review of the evolution of visual systems and of the development of the mammalian visual system in the embryonic and post natal periods with an emphasis on experience dependent neural plasticity An account of the development of perceptual functions especially depth perception is followed by a review of the effects of early visual deprivation during the critical period of neural plasticity on amblyopia and other defects in depth perception Volume 1 ends with accounts of the accommodation mechanism of the human eye and vergence eye movements Cognitive Neurosciences Mr. Rohit

Cognitive Neurosciences Michael S. Gazzaniga, 2009-09-18 The fourth edition of *The Cognitive Neurosciences* continues to chart new directions in the study of the biologic underpinnings of complex cognition the relationship between the structural and physiological mechanisms of the nervous system and the psychological reality of the mind The material in this edition is entirely new with all chapters written specifically for it Book Jacket *A Christian Response to the New Genetics* David H. Smith, Cynthia B. Cohen, 2003 Life is a gift that includes powers to be used and celebrated but that doesn't necessarily justify the use of every new power that comes along This volume appeals to both secular and religious readers in the centre of the great debate over our new genetic powers These essays affirm many traditional Christian perspectives and virtues while also introducing new insights transfer genetic manipulation patenting health insurance and the moral status of embryos They conclude that it is naive to either to reject outright or wholeheartedly embrace the new genetic powers In fact sometimes the best we can expect is to learn how to cope with moral uncertainty

The Cognitive Neurosciences, fifth edition Michael S. Gazzaniga, George R. Mangun, 2014-10-24 The fifth edition of a work that defines the field of cognitive neuroscience with entirely new material that reflects recent advances in the field Each edition of this classic reference has proved to be a benchmark in the developing field of cognitive neuroscience The fifth edition of *The Cognitive Neurosciences* continues to chart new directions in the study of the biological underpinnings of complex cognition the relationship between the structural and physiological mechanisms of the nervous system and the psychological reality of the mind It offers entirely new material reflecting recent advances in the field Many of the developments in cognitive neuroscience have been shaped by the introduction of novel tools and methodologies and a new section is devoted to methods that promise to guide the field into the future from sophisticated models of causality in brain function to the application of network theory to massive data sets Another new section treats neuroscience and society considering some of the moral and political quandaries posed by current neuroscientific methods Other sections describe among other things new research that draws on developmental imaging to study the changing structure and function of the brain over the lifespan progress in establishing increasingly precise models of memory research that confirms the study of emotion and social cognition as a core area in cognitive neuroscience and new findings that cast doubt on the so called neural correlates of consciousness
