Genetic Imaginary Dna In The Canadian Criminal Justice System:

The Genetic Imaginary Neil Gerlach, 2004-01-01 DNA testing and banking has become institutionalized in the Canadian criminal justice system As accepted and widespread though the practice is there has been little critique or debate of this practice in a broad public forum on the potential infringement of individual rights or civil liberties Neil Gerlach s *The Genetic Imaginary* takes up this challenge critically examining the social legal and criminal justice origins and effects of DNA testing and banking Drawing on risk analysis Gerlach explains why Canadians have accepted DNA technology with barely a ripple of public outcry Despite promises of better crime control and protections for existing privacy rights Gerlach s examination of police practices courtroom decisions and the changing role of scientific expertise in legal decision making reveals that DNA testing and banking have indeed led to a measurable erosion of individual rights Biogovernance and the biotechnology of surveillance almost inevitably lead to the empowerment of state agent control and away from due process and legal protection *The Genetic Imaginary* demonstrates that the overall effect of these changes to the criminal justice system has been to emphasize the importance of community security at the expense of individual rights The privatization and politicization of biogovernance will certainly have profound future implications for all Canadians **Genetic Suspects**

Engineering Facts On File, Incorporated, 2008 Provides an overview chronology of events glossary and annotated bibliography on biotechnology and genetic engineering **Miscarriages of Justice in Canada** Kathryn M.

Campbell, 2018-06-12 Innocent people are regularly convicted of crimes they did not commit A number of systemic factors have been found to contribute to wrongful convictions including eyewitness misidentification false confessions informant testimony official misconduct and faulty forensic evidence In *Miscarriages of Justice in Canada* Kathryn M Campbell offers an extensive overview of wrongful convictions bringing together current sociological criminological and legal research as well as current case law examples For the first time information on all known and suspected cases of wrongful conviction in Canada

is included and interspersed with discussions of how wrongful convictions happen how existing remedies to rectify them are inadequate and how those who have been victimized by these errors are rarely compensated Campbell reveals that the causes of wrongful convictions are in fact avoidable and that those in the criminal justice system must exercise greater vigilance and openness to the possibility of error if the problem of wrongful conviction is to be resolved *Genetic Policing* Robin Williams, Paul Johnson, 2013-05-13 This book is about the increasing significance of DNA profiling for crime investigation in modern society It focuses on developments in the UK as the world leader in the development and application of forensic DNA technology and in the construction of DNA databases as an essential element in the successful use of DNA for forensic purposes The book uses data collected during the course of Wellcome Trust funded research into police uses of the UK National DNA Database NDNAD to describe the relationship between scientific knowledge and police investigations It is illustrated throughout by reference to some of the major UK criminal cases in which DNA evidence has been presented and contested **Technologies of InSecurity** Katja Franko Aas, Helene Oppen Gundhus, Heidi Mork Lomell, 2008-08-21

Technologies of Insecurity examines how general social and political concerns about terrorism crime migration and globalization are translated into concrete practices of securitisation of everyday life Who are we afraid of in a globalizing world How are issues of safety and security constructed and addressed by various local actors and embodied in a variety of surveillance systems Examining how various forms of contemporary insecurity are translated into and reduced to issues of surveillance and social control this book explores a variety of practical and cultural aspects of technological control as well as the discourses about safety and security surrounding them Insecurity is a politically and socially constructed phenomenon with a variety of meanings and modalities And exploring the inherent duality and dialectics between our striving for security and the simultaneous production of insecurity **Technologies of Insecurity** considers how mundane objects and activities are becoming bearers of risks which need to be neutralised As ordinary arenas such as the workplace the city centre the football stadium the airport and the internet are imbued with various notions of risk and danger and subject to changing public attitudes and sensibilities the critical deconstruction of the nexus between everyday surveillance and insecurity pursued here provides important new insights about how broader political issues are translated into concrete and local practices of social control and exclusion Capturing the Criminal Image Jonathan Mathew Finn, 2009 This title traces how the act of representing and watching is central to modern law enforcement Finn analyzes the development of police photography in the 19th century to foreground a critique of three identification practices that are fundamental to current police work

Tracing Technologies Helena Machado, Barbara Prainsack, 2016-02-24 The real heroes of television crime shows in the twenty first century are no longer police detectives but forensic technologies The immense popularity of high tech crime television shows has changed the way in which crime scene work is viewed The term CSI effect was coined to signify a situation where people's views and practices have been influenced by such media representations e.g. judges and jurors

putting more weight on forensic evidence that has been produced with high tech tools in particular DNA evidence than on other kinds of evidence While considerable scholarly attention has been paid to examining the CSI effect on public jurors judges and police investigators prisoners views on forensic technologies and policing have been under explored Drawing on a research sample of over 50 interviews carried out with prisoners in Portugal and Austria this groundbreaking book shows how prisoners view crime scene traces how they understand crime scene technologies and what effect they attribute to the existence of large police databases on their own lives careers and futures Through critically engaging with STS sociological and criminological perspectives on the use of DNA technologies within the criminal justice system this work provides the reader with valuable insights into the effect of different legal political discursive and historical configurations on how crime scene technologies are utilized by the police and related to by convicted offenders

The People's House of Commons David E. Smith, 2007-04-21 Canada's House of Commons has come under considerable attack in recent years Many critics have contended that the House has been unresponsive to public opinion and that its party leaders have too much control while leaving individual MPs essentially powerless The House has also faced challenges by the courts since the introduction of the Charter a powerful bureaucracy equipped with specialized knowledge and new telecommunications systems that are redefining the transfer of information Through an examination of academic judicial political and legal commentary *The People's House of Commons* explores the role of the House as a public institution While addressing much of the criticism that has been levelled at the House David E Smith considers the competing political models and inherent tensions and their affect on public understanding Smith maintains that court decisions are transforming the political system from one dominated by parties to one that promotes individual participation He argues that reforms such as fixed election dates or stronger parliamentary committees have constitutional significance since their implementation would alter the practice of responsible government

which for more than a century has been a party government A definitive work by one of Canada's foremost experts in the field of political science The People's House of Commons explores the ramifications of many of the changes currently being proposed to Canada's political system with particular reference to their affect on prerogative power parliamentary privilege party discipline bicameralism and the role of the opposition

Becoming Biosubjects Neil Gerlach, Sheryl Hamilton, Rebecca Sullivan, Priscilla Walton, 2011-01-01 Becoming Biosubjects examines the ways in which the Canadian government media courts and everyday Canadians are making sense of the challenges being posed by biotechnologies The authors argue that the human body is now being understood as something that is fluid and without fixed meaning This has significant implications both for how we

understand ourselves and how we see our relationships with other forms of life Focusing on four major issues the authors examine the ways in which genetic technologies are shaping criminal justice practices how policies on reproductive technologies have shifted in response to biotechnologies the debates surrounding the patenting of higher life forms and the Canadian and global response to bioterrorism Regulatory strategies in government and the courts are continually evolving and are affected by changing public perceptions of scientific knowledge The legal and cultural shifts outlined in Becoming Biosubjects call into question what it means to be a Canadian a citizen and a human being
