Tides Jonathan White, 2017-01-16 In *Tides* The Science and Spirit of the Ocean, writer, sailor, and surfer Jonathan White takes readers across the globe to discover the science and spirit of ocean tides. In the Arctic, White shimmies under the ice with an Inuit elder to hunt for mussels in the dark cavities left behind at low tide. In China, he races the Silver Dragon, a twenty-five foot tidal bore that crashes eighty miles up the Qiantang River. In France, he interviews the monks that live in the tide-wrapped monastery of Mont Saint Michel. In Chile and Scotland, he investigates the growth of tidal power generation, and in Panama and Venice, he delves into how the threat of sea level rise is changing human culture. The very old and very new *Tides* combines lyrical prose, colorful adventure travel, and provocative scientific inquiry into the elemental, mysterious paradox that keeps our planet's waters in constant motion. Photographs, scientific figures, line drawings, and sixteen color photos dramatically illustrate this engaging expert tour of the tides.

Narratives of Art Practice and Mental Wellbeing Olivia Sagan, 2014-10-17 *Narratives of Art Practice and Mental Wellbeing* draws on extensive research carried out with mental health service users who are also practicing artists. Using narrative data gained through hours of reflective conversation, it explores not whether art can contribute to positive wellbeing and improved mental health, as this is now established ground, but rather how art works and the role art-making can play in people's lives as they encounter crises, relapse, recovery, or beyonding. The book maps the delicate ways in which finding a means to tell our story, sometimes, is the creative project we seek and offers a reminder of how intrinsically linked our life trajectories are with creative opportunities. It describes the wide range of artistic activity occurring in health and community settings and the meanings of these practices to people with histories of mental turbulence. Drawing on psychoanalytic theory, the book explores the stories and various forms of visual arts practices, spoken of and considers the art-making processes, the creative moments, and the objects which, in some cases, have changed people's lives. The seven chapters of the book offer a blend of personal testimony, theory, debate, critique, and celebration and examine key topics of deliberation within the fields of art therapy, arts in health, community arts practice, participatory arts, and widening participation within arts education. It will be valuable reading for researchers, students, artists, and practitioners in these fields.

Kinship and Collective Action Gero Bauer, Anya Heise-von der Lippe, Nicole Hirschfelder, Katharina Luther, 2020-09-28 Make kin, not babies. Donna Haraway demands in an attempt to offer new and creative ways of thinking what kinship might mean in an age of ecological devastation. At the same time, the

emergence of a seemingly new culture of public protest and political opinion have provoked scholars such as Judith Butler to address the contexts and dynamics of public collective action This volume explores the dynamic relationship between structures of kinship and the material conditions under which collective action emerges from a literary and cultural studies perspective How are kinship and collective action negotiated in literature the arts or in specific historical moments and how does this affect the role of representation How have conceptualizations of both concepts developed over time and what can we infer from this for questions of kinship and collective action today *Musical Prodigies* Gary E. McPherson, 2016-08-26

Child prodigies have been observed in a range of disciplines particularly music mathematics chess and art The question of what makes a prodigy has long been controversial Some have dismissed the notion of giftedness arguing that most famous prodigies had strong parental cultural and environmental influences that helped them develop their extraordinary abilities One recent theory suggested that anyone could achieve outstanding success in whatever endeavour they wanted with a minimum of 10 000 hours of practice Nevertheless many studies of prodigies have suggested that there might be strong underlying cognitive differences regarding their use of short term versus long term memory spatial memory imagery and language Whatever the arguments for those interested in child development prodigies remain a fascinating subject of study when considering questions about creativity intelligence development and the impact of nature versus nurture This book breaks new ground in presenting the first scientific exploration on the topic of musical prodigies It brings together research from a range of disciplines including psychology neurobiology and genetics to provide a thorough exploration of prodigious talent In addition the book includes fascinating case studies of prodigies and also looks at their long term development into adulthood many child prodigies have had problems making the transition into adolescence and adulthood Musical prodigies will be required reading for anyone interested in child development music and the arts **Madness and the Romantic**

is a fascinating phenomenon which has captured the imagination of scientists and artists alike This title brings together a broad body of knowledge about this condition into one definitive state of the art handbook *Vasari's Words* Douglas Biow, 2018-10-18 In this book Douglas Biow analyzes Vasari's *Lives of the Artists* often considered the first great work of art history in the modern era from a new perspective He focuses on key words and shows how they address a variety of compelling culturally determined ideas circulating in late Renaissance Italy The keywords chosen for this study investigate five seemingly divergent yet still interconnected ideas What does it mean to have a profession *professione* and possess genius *ingegno* in the visual arts How is speed *prestezza* valued among visual artists of the period and how is time *tempo* conceptualized in Vasari's narrative and descriptions of visual art Finally how is the night *notte* conceived and visually represented as a distinct span of time in *The Lives* Written in an engaging manner for specialists and non specialists alike *Vasari's Words* places the *Lives* a truly foundational and innovative book of Western culture within the context of the modern discipline of intellectual history *Theological Anthropology in Mozart's La clemenza di Tito* Steffen Lösel, 2022-07-13 This book asks what theological messages theologically educated Catholics in late eighteenth century Prague might have perceived in Mozart's late opera *La clemenza di Tito* The book's thesis is two fold first that Catholics might have heard the opera's advocacy of enlightened absolutism as a celebration of a distinctly Catholic understanding of political governance and second that they might have found in the opera a metaphor for the relationship between a gracious God and humanity caught up in sin expressed as sexual concupiscence pride and lust for power The book develops its interpretation of the opera through narrative character analyses of the main protagonists an examination of their dramatic development and by paying attention to the biblical and theological associations they may have evoked in a Catholic audience The book is geared towards academic readers interested in opera theologians historians and those who work at the intersection of theology and the arts It contributes to a better understanding of the theological implications of Mozart's operatic work
