Geography And Social Movements Comparing Antinuclear Activism In The Boston Area:

Geography and Social Movements Byron A. Miller, 2000 Context matters as students of social movements increasingly agree and yet very little attention has been paid to the role geography plays in activism Geography and Social Movements corrects this oversight bringing a geographical perspective to the study of social movements Byron A Miller directly addresses the implications of space place and scale in social movement mobilization and then demonstrates their significance in a detailed comparative analysis of peace movements in three municipalities around Boston In focusing on the Boston area an old northeastern region heavily industrialized with many companies working on military contracts and also a center of education Miller is able to explore how campaigns aimed at curbing nuclear arms operate within the cultural political social and economic confines of particular places and spaces He shows how the decisions and actions of local peace movement organizations played a central role in the movement s successes and failures and how local organizations had to respond to the differing class race and gender characteristics of different locales Miller s empirical analysis clearly demonstrates that geographic strategies for social movement organizations have direct consequences for the successes and failures of specific campaigns

Geography and Social Movement Byron A. Miller, 2014-05-28 Byron A Miller directly addresses the implications of space place and scale in social movement mobilization and then demonstrates their significance in a detailed comparative analysis of peace movements in three municipalities around Boston

The Geographies of Social Movements Ulrich Oslender, 2016-03-10 In The Geographies of Social Movements Ulrich Oslender proposes a critical place perspective to examine the activism of black communities in the lowland rain forest of Colombia s Pacific Coast region Drawing on extensive ethnographic fieldwork in and around the town of Guapi Oslender examines how the work of local community councils which have organized around newly granted ethnic and land rights since the early 1990s is anchored to space and place Exploring how residents social relationships are entangled with the region s rivers streams swamps rain and tides Oslender argues that this aquatic space his conceptualization of the mutually constitutive relationships between people and their rain forest environment provides a local epistemology that has shaped the political process Oslender demonstrates that social mobilization among Colombia s Pacific Coast black communities is best understood as emerging out of their place based identity and environmental imaginaries He argues that the critical place perspective proposed accounts more fully for the multiple multiscalar rooted and networked experiences within social movements

American Anti-Nuclear Activism, 1975-1990 K. Harvey, 2014-10-28 Looking at national peace organizations alongside lesser known protest collectives this book argues that anti nuclear activists encountered familiar challenges common to other social movements of the late twentieth century

Social Movements and Protest Politics Greg Martin, 2023-12-22 This fully revised and updated edition of Social Movements and Protest Politics provides interdisciplinary perspectives on the sociology of protest movements It considers major theories and concepts which are presented in a clear accessible and engaging format The

second edition contains new chapters on methods and ethics of social movement research and legal mobilisation protest policing and criminal justice activism including calls to abolish or defund police made at protests during the COVID 19 pandemic This edition introduces readers to the concept of the post protest society wherein the right to protest is whittled away to near vanishing point and authorities have considerable legal recourse to ban protests and render the tactics of protest movements ineffective The book also looks at recent developments and novel social movements including Black Lives Matter Extinction Rebellion Gilets Jaunes MeToo and Hong Kong s Umbrella Movement as well as the rise of contemporary forms of populism in democratic societies The book presents specific chapters outlining the early origins of social movement studies and more recent theoretical and conceptual developments It considers key ideas from resource mobilisation theory the political process model and new social movement approaches It provides extensive commentary on the role of culture in social protest including visual images emotions storytelling music and sport religious movements geography and struggles over space media and movements and global activism Historical and contemporary case studies and examples from a variety of countries are provided throughout including the American civil rights movement Greenpeace Pussy Riot Indigenous peoples movements liberation theology Indignados Occupy Tea Party and Arab Spring Each chapter also contains illustrations and boxed case studies to demonstrate the issues under discussion Social Movements and Protest Politics will be an indispensable resource for undergraduate and postgraduate students in the social sciences and humanities wanting to be introduced to or extend their knowledge of the field The book will also prove useful to university teachers and academic researchers activists and practitioners interested in the study of social cultural and political protest

Global Feminism Myra Marx Ferree, Aili Mari Tripp, 2006-07 Since the UN s World Conference on Women in Mexico City in 1975 feminists around the world have campaigned with increasing success for recognition of women s full personhood and empowerment This book explores the social and political developments that have energised this movement

Megacity Slums Marie-Caroline Saglio-Yatzimirsky, 2013 This book looks at slums and social exclusion in the four major megacities of India and Brazil and analyzes the interrelationships between urban policies and housing and environmental issues The challenges posed in Delhi Mumbai Rio de Janeiro and Sao Paulo have spurred public reformers into action through housing rehabilitation and conservation programs Civil society and the inhabitants of these cities have also begun to get involved On the other hand one must wonder whether these challenges were partly created by the deficiencies of these very reformers and civil society be it their lack of intervention as advocates of government intervention would argue or the flaws and inadequacies of their actions as supporters of the free market would suggest Are policies alleviating or aggravating social exclusion This book explores these questions and more

Strategic Alliances Nella Van Dyke, Holly J. McCammon, *Spaces of Contention* Byron Miller, 2016-04-01 As social movements have become more complex geographers are increasingly studying the spatial dynamics of collective resistance and sociologists and political scientists increasingly

analyzing the role of space place and scale in contentious political activity Occupying a position at the intersection of these disciplinary developments this book brings together leading scholars to examine how social movements have employed spatial practices to respond to and shape changing social and political contexts It is organised into three main sections 1 Place Space and Mobility sites of mobilization and regulation 2 Scale and Territory structuring collective interests identities and resources and 3 Networks connecting actors and resources across space It concludes by suggesting that different spatialities place scale networks interlink within one another in particular instances of collective action playing distinctive yet complementary roles in shaping how these actions unfold in the political arena By mapping state of the art conceptual and empirical terrain across Geography Sociology and Political Science Spaces of Contention provides readers with a much needed guide to innovative research on the spatial constitution of social movements and how social movements tactically and strategically approach and produce space

The Political Economy of Work in the Global South Anita Hammer,Adam Fishwick,2020-03-28 Part of the Critical Perspectives on Work and Employment series this edited collection brings together contributions from leading international scholars to initiate an important dialogue between labour process analysis and scholarship on work in the Global South This book characterises the forms of work and labour process that characterise globalising capitalism today and addresses core analytical concerns within Labour Process Theory and research on work in the South It explores how a wide range of production relations in the Global South ranging from formal to informal employment and self employment are embedded in wider social relations of gender caste religion and ethnicity and are related to wider patterns of commodification and resistance Drawing on cutting edge research the book s chapters consider a diverse range of working situations covering migrant workers in the Middle East commercial surrogacy work in India and cooperative garment workers in Argentina In offering a novel reading of the political economy of work in the Global South and shedding light on lesser considered fields of work and worker organization this volume will provide new insights for making sense of the changing world of work for students scholars labour activists and practitioners alike

Solidarities Beyond Borders Pascale Dufour,Dominique Masson,Dominique Caouette,2010-08-01 Scholars of social movements tend to overlook the achievements and political significance of women s movements Through theoretical discussions and empirical examples Solidarities Beyond Borders demonstrates the creativity and dynamism of transnational women s movements around the world These timely case studies from North America Latin America and Southeast Asia introduce feminists activists and scholars to the benefits and challenges of building relationships dialogues and perspectives that extend beyond the boundaries of nation states and disciplines The contributors open a dialogue between feminist theorists and scholars of social movements in other disciplines in order to foster mutual recognition of common interests and identities Although feminists and women s groups face challenges as they build solidarities beyond borders this book makes the case that these links can be extended to embrace other progressive movements and their goals

Young People, Border Spaces and

Revolutionary Imaginations Stuart Aitken, Fernando Bosco, Thomas Herman, Kate Swanson, 2013-12-16 Drawing from discussions that pulled together child researchers working near the borders of Mexico the United States and Canada this book explores how material and metaphoric borders give way to young people's experimentations with cultural social and political change The contributors highlight the capacities of children to revolutionize thought and practice through creative reimagining of the boundaries borders events circumstances and familial relations that affect their everyday lives The first section in different ways highlights borders and movements through them as a bricolage of images symbols tensions and joys In the second section the idea of a portable border is explored in three chapters that consider a migrants lifecourse citizenship and political activism respectively The last section of the book brings together three chapters that uncover how youth resist confront and transform the borders that envelop their lives By weaving narratives pertaining to young people's creative stories transnational migrations personal identities pen pal programs masculinities inter generational change border crossings political activism and addictions the contributors in toto raise the idea of young people taking bounded and embodied events places and institutions and moving them towards something emancipatory sin fronteras without borders This book was published as a special issue of Children's Geographies

Local Environmental Movements Pradyumna Karan, 2010-09-12 Increasing evidence of the irreparable damage humans have inflicted on the planet has caused many to adopt a defeatist attitude toward the future of the global environment Local Environmental Movements A Comparative Study of the United States and Japan analyzes how local groups in both Japan and the United States refuse to surrender the Earth to a depleted and polluted fate Drawing on numerous case studies scholars from around the world discuss efforts by grassroots organizations and movements to protect the environment and to preserve the landscapes they love and depend upon The authors examine citizen campaigns protesting nuclear radiation and chemical weapons disposal Other groups have organized to protect farmlands and urban landscapes to groups that organize to preserve streams wildlife habitats tidal flats coral reefs National Parks and biodiversity These small groups of determined citizens are occasionally successful demonstrating the power of democracy against seemingly insurmountable odds In other cases the groups failed to bring about the desired change This book explores the distinctive leaders the relevant laws and regulations local politics and the historical and cultural contexts that influenced the goals and successes of the various groups The contributors conclude that there is no one single environmental movement but many and the volume emphasizes grassroots movements and advocacy groups that represent local constituencies By studying these groups and their respective challenges Local Environmental Movements highlights the common themes as well as the distinctive features of environmental advocates in the United States and Japan Over decades these groups have nurtured environmental awareness and promoted the concept of sustainable development that respects the need for both environmental protection and cultural preservation

Geographies of Anticolonialism Andrew Davies, 2019-10-09 A fresh approach to scholarship on the diverse nature of Indian anticolonial

processes Brings together a varied selection of literature to explore Indian anticolonialism in new ways Offers a different perspective to geographers seeking to understand political resistance to colonialism Addresses contemporary studies that argue nationalism was joined by other political processes such as revolutionary and anarchist ideologies to shape the Indian independence movement Includes a focus on a specific anticolonial group the Pondicherry Gang and investigates their significant impact which went beyond South India Helps readers understand the diverse nature of anticolonialism which in turn prompts thinking about the various geographies produced through anticolonial activity *Fighting for Peace* Lisa Leitz, 2014-04-15 *Fighting for Peace* brings to light an important yet neglected aspect of opposition to the Iraq War the role of veterans and their families Drawing on extensive participant observation and interviews Lisa Leitz demonstrates how the harrowing war experiences of veterans and their families motivated a significant number of them to engage in peace activism Married to a Navy pilot herself Leitz documents how military peace activists created a movement that allowed them to merge two seemingly contradictory sides of their lives an intimate relation to the military and antiwar activism Members of the movement strategically deployed their combined military peace activist identities to attract media attention assert their authority about the military and war and challenge dominant pro war sentiment By emphasizing the human costs of war activists hoped to mobilize American citizens and leaders who were detached from the wars in Iraq and Afghanistan bring the wars to an end and build up programs to take care of returning veterans and their families The stories in *Fighting for Peace* ultimately reveal that America's all volunteer force is contributing to a civilian military divide that leaves civilians with little connection to the sacrifices of the military Increasingly Leitz shows veterans and their families are being left to not only fight America's wars but also to fight against them **Democracy in the Making** Kathleen M. Blee, 2012-03-30 Winner of the 2012 ARNOVA Outstanding Book in Nonprofit and Voluntary Action Research Award 2013 Charles Tilly Award for Best Book from the American Sociological Association Section on Collective Behavior and Social Movements *Democracy in the Making* offers a marvelous synthesis of sociological acumen and hope Kathleen Blee finds that while social activists often narrow their visions of doable social change they also can learn together and take surprising new directions with unpredictable results A wide range of activists will recognize themselves in this book's wonderfully fine grained portraits of politics at the grassroots Paul Lichterman author of *Elusive Togetherness* Church Groups Trying to Bridge America's Divisions This book is an enormous breath of fresh air in an area that often recycles concepts and perspectives Blee offers a strikingly original approach to grassroots activism that will substantially reorient research in collective action and social movements Marc W Steinberg Associate Professor of Sociology Smith College With civic engagement commonly understood to be on the decline and traditional bases of community and means of engagement increasingly fractured how do people become involved in collective civic action How do activist groups form What hampers the ability of these groups to invigorate political life and what enables it Kathleen Blee's groundbreaking new study provides a provocative answer the early times matter By following

grassroots groups from their very beginnings Blee traces how their sense of possibility shrinks over time as groups develop a shared sense of who they are that forecloses options that were once open At the same time she charts the turning points at which options re open and groups become receptive to change and reinvention Based on observing more than sixty grassroots groups in Pittsburgh for three years *Democracy in the Making* is an unprecedented look at how ordinary people come together to change society It gives a close up look at the deliberations of activists on the left and right as they work for animal rights an end to the drug trade in their neighbourhood same sex marriage global peace and more It shows how grassroots activism can provide an alternative to civic disengagement and a forum for envisioning how the world can be transformed At the same time it documents how activist groups become mired in dysfunctional and undemocratic patterns that their members dislike but cannot fix By analyzing the possibilities and pitfalls that face nascent activist organizations Blee reveals how critical early choices are to the success of grassroots activism Vital for scholars and activists alike this practical yet profound study shows us through the examples of both groups that flourish and those that flounder how grassroots activism can better live up to its democratic potential *Handbook of Social Movements Across Disciplines* Bert Klandermans, Conny Roggeband, 2009-12-18 This book aims to revisit the interdisciplinary roots of social movement studies Each discipline raises its own questions and approaches the subject from a different angle or perspective The chapters of this handbook are written by internationally renowned scholars representing the various disciplines involved They each review the approach their sector has developed and discuss their disciplines contributions and insights to the knowledge of social movements Furthermore each chapter addresses the unanswered questions and discusses the overlaps with other fields as well as reviewing the interdisciplinary advances so far **Leverage of the Weak** Hwa-Jen Liu, 2015-07-21 Comparing Taiwan and South Korea strategically Hwa Jen Liu seeks an answer to a deceptively simple question Why do social movements appear at different times in a nation s development Despite their apparent resemblance a colonial heritage authoritarian rule rapid industrialization and structural similarities Taiwan and South Korea were opposites in their experiences with two key social movements South Korea followed a conventional capitalist route labor movements challenged the system long before environmental movements did In Taiwan pro environment struggles gained strength before labor activism Liu argues that part of the explanation lies in an analysis of how movements advance their causes by utilizing different types of power Whereas labor movements have the power of economic leverage environmental movements depend on the power of ideology Therefore examining material factors versus ideational factors is crucial to understanding the successes or failures of social movements *Leverage of the Weak* is a significant contribution to the literature on social movements to the study of East Asian political economies and to the progress of the comparative historical method It enhances knowledge of movement emergence investigates the possibilities and obstacles involved in forging labor environment alliances and offers the first systematic multilayered comparisons across movements and nations in East Asia

Fighting for the Future of Food Rachel Schurman, William A. Munro, 2013-11-30 When scientists working in the agricultural biotechnology industry first altered the genetic material of one organism by introducing genes from an entirely different organism the reaction was generally enthusiastic To many these genetically modified organisms GMOs promised to solve the challenges faced by farmers and to relieve world hunger Yet within a decade this gene revolution had abruptly stalled Widespread protests against the potential dangers of Frankenfoods and the patenting of seed supplies in the developing world forced the industry to change course As a result in the late 1990s some of the world's largest firms reduced their investment in the agricultural sector narrowed their focus to a few select crops or sold off their agricultural divisions altogether *Fighting for the Future of Food* tells the story of how a small group of social activists working together across tables continents and the Internet took on the biotech industry and achieved stunning success Rachel Schurman and William A. Munro detail how the anti biotech movement managed to alter public perceptions about GMOs and close markets to such products Drawing strength from an alternative worldview that sustained its members sense of urgency and commitment the anti GMO movement exploited political opportunities created by the organization and culture of the biotechnology industry itself *Fighting for the Future of Food* ultimately addresses society's understanding and trust or mistrust of technological innovation and the complexities of the global agricultural system that provides our food

Groundswell Stephanie Gilmore, 2013 *Groundswell* Grassroots Feminist Activism in Postwar America offers an essential perspective on the post 1960 movement for women's equality and liberation Tracing the histories of feminist activism through the National Organization of Women NOW chapters in three different locations Memphis Tennessee Columbus Ohio and San Francisco California Gilmore explores how feminist identity strategies and goals were shaped by geographic location Departing from the usual conversation about the national icons and events of second wave feminism this book concentrates on local histories and asks the questions that must be answered on the micro level Who joined Who did not What did they do Why did they do it Together with its analysis of feminist political history these individual case studies from the Midwest South and West coast shed light on the national women's movement in which they played a part In its coverage of women's activism outside the traditional East Coast centers of New York and Boston *Groundswell* provides a more diverse history of feminism showing how social and political change was made from the ground up
