**The City of Grace** David Wadley, 2019-11-29 In this sweeping appraisal of the urban condition David Wadley argues that anything less than high level resolution in modelling the well being of inhabitants is wasting precious time Humanity is encountering rising entropy caused by unsustainable economic and demographic expansion Supported by a strong interdisciplinary backdrop featuring systems and crisis theories *The City of Grace* tackles these obstacles by picturing gracious function and graceful form in a human scale settlement In an attempt to salvage things lost in the teleology of urban development over the last 100 years the outlook is both heterodox and contrarian How long can we all go on in the present way In addressing grace a more elevated concept than those focusing previous urban analyses this manifesto aims not to placate or please but instead to get humanity to face the encompassing realities it tries so hard to forget

**Tactics of Interfacing** Ksenia Fedorova, 2020-08-11 How digital technologies affect the way we conceive of the self and its relation to the world considered through the lens of media art practices In *Tactics of Interfacing* Ksenia Fedorova explores how digital technologies affect the way we conceive of the self and its relation to the world With the advent of ubiquitous computing the self becomes an object of technological application increasingly defined by data received from tracking technologies Subtly these technologies encourage versions of ourselves that are easier to interpret computationally Fedorova views these shifts in self perception through the lens of contemporary media art practices examining a range of artistic tactics that enable embodied and intimate experiences of machinic operations on our lives At the center of Fedorova s analysis are the mechanisms that structure the relations between the self and the world at the level

of the interface she considers interfacing a process in which interrelation happens and different agencies play off against each other She discusses such topics as interfaciality and the face as a medium self image and the boundaries of the self understood through technological mediation of an embodied experience the relation between the self and the other reshaped by algorithmic technologies and the augmentation and alteration of spatial perception The artworks Fedorova discusses present scenarios of interfacing that range from responsive environments to artificial intelligence conversational agents She shows that art and aesthetic experience offer fruitful ways to reflect on the effects of contemporary technological culture enabling encounters that shift our perspectives on the boundaries of the self and challenge the very capacity to feel human
