Symmetries of Islamic Geometrical Patterns S. J. Abas, Amer Shaker Salman, 1995 a major contribution to the world of science and of particular value to the documentation of the culture of Islam N Gedal a masterly account of the way in which art and science are combined into aesthetic beauty by the Islamic geometric designs and motifs which decorate much of the Eastern World M Evans This book will allow readers to travel through time and space from ancient ornaments to the most modern computer graphics patterns C Pickover Ever since the discovery of the existence of seventeen space groups in two dimensions by Fedorov in 1891 it has been speculated that all seventeen could be found in Islamic art But it is in this book that this remarkable fact is for the first time detailed and analysed with beautiful illustrations Rarely is there such a

thought provoking blend of esthetics and geometry with abstraction C N Yang Geometrical form Here mathematics combines with art and exhibits clearly its aesthetic appeal Islamic patterns provide a marvellous illustration of symmetry and Drs Abas and Salman perform a useful service by taking this as their theme and blending it with ideas on computer graphics Foreword by Michael Atiyah Abas and Salman have assembled a fascinating collection that combines art history culture science mathematics and philosophy Their examples range from a 12th century minaret in Uzbekistan via the Alhambra in Granada to modern computer graphics of Koranic calligraphy on dodecahedrons and tori They conclude by speculating on the prospect of creating Islamic patterns in virtual reality where a seeker after unity in science and art would be able to submerge himself or herself in exquisite Alhambras of the mind Judging by the evidence presented here it would be an unforgettable experience New Scien

Islamic Heritage Architecture and Art II G Passerini, 2018-07-18 Papers presented at the 2nd International Conference on Islamic Heritage Architecture and Art are contained in this volume The conference attracted important research highlighting the significance of Islamic heritage architecture and art to the world and its influence across different regions The papers deal with the design of many types of buildings in Islamic countries including not only the better known public buildings like mosques mausolea citadels and forts but also houses and gardens engineering works such as bridges and dams irrigation systems and many others which have also had a profound impact on society Traditional architecture and urban environment in most Islamic countries is now being eroded by overemphasis on a global type of architecture and city planning As a consequence many regions are losing their identity The included studies review these developments in the light of what classical Islamic urban design and architecture has to offer modern society Research contained in this book provides an analysis of the materials employed and the types of structural elements used particularly those unique to Islamic architecture Associated topics covered include music textiles and ceramics which are essential parts of the architectural fabric Also looked at are construction materials including not only stone and brick but also more perishable materials like adobe wood and reeds The preservation of heritage features also requires the development of appropriate conservation techniques in response to the different materials used and the ways structural forms work including under extreme conditions such as earthquakes Academics researchers practitioners and government employees actively involved in the topic of Islamic heritage architecture and art will find this publication of interest
