

#1- QUESTGARDEN: FIND THE GEOMETRY WEBQUEST

<http://questgarden.com/89/25/8/091029084413/>

This WebQuest takes students through different steps where the students analyze how Geometry is in the world around them. The students first look to describe parallel and transversal lines, vertical angles, circles and concentric circles, etc. in a picture or object that they know. They then summarize their findings in a paragraph. For the next step, they create a picture that uses specific geometric properties such as perpendicular lines, concentric circles, midpoints, etc. Then next step they take is to extend their knowledge. The students create their own picture and directions on how to create the geometric picture using the appropriate properties and vocabulary. The last step has the students search for artwork in the world around us that is inspired by mathematics. The students are to then write about the piece and how math is used in this. Once the students have completed all four steps, the students then create a poster that shows their four steps and creations.

Teaching for

Understanding with Technology Martha Stone Wiske, Lisa Breit, 2013-12-23 Teaching for Understanding with Technology shows how teachers can maximize the potential of new technologies to advance student learning and achievement. It uses the popular Teaching for Understanding framework that guides learners to think, analyze, solve problems, and make meaning of what they've learned. The book offers advice on tapping into a rich array of new technologies such as web information, online curricular information, and professional networks to research teaching topics, set learning goals, create innovative lesson plans, assess student understanding, and develop communities of learners.

Integrating Technology in the Classroom, 1999

Web-based Instruction Susan Sharpless Smith, 2006 Since publication of the first edition of *Web Based Instruction*, many significant advances in Web based instruction have occurred. New technologies and tools have emerged, different ways of accessing the Internet are available, and virtual reference trends are redefining some library users' idea of the library and information literacy skills are recognized as essential to students' success. Expanding on the popular practical *How to Web Guide for Public, Academic, School, and Special Libraries*, technology expert Smith has thoroughly updated the discussion to include new tools and trends including browsers, access methods, hardware, and software programs. She also supplies tips to secure project funding and provides strategic information for different library types including K-12, public, academic, and corporate libraries. This completely revised edition also includes a new section on learning theory applied to Web based instruction, translates Web speak, and defines the lingo with an expanded glossary and acronym list. Illustrates new procedures with fresh screen shots and URLs from top library Web programs. Addresses the limitations and benefits of Web based instruction with clear criteria for decision making. A proven winner, this thoroughly updated hands-on manual is a must-have for owners of the first edition. Librarians facing the challenge of creating a Web based project will find easy-to-understand guidance to create an educational and interactive Web site from start to finish.
